# Renati Vinod Kumar Reddy
# Certified Boomi Developer

Vinodkumarreddyr519@gmail.com Mbl:6300809132

---

**PROFESSIONAL SUMMERY:**

- Having 6 years of experience in IT industry with more than 5 years of experience in Boomi emphasis on Analysis, Design, Development, Implementation and Management of Projects using Boomi (IPASS Tools).
- Involve in implementing the full life cycle of integrations solutions. Identifying integration opportunities, gather requirements, implement, test and deploy targeted automation solutions.
- Involved in process walk through with business team.
- Knowledge on EDI, MDM, MDH.
- Done the feasibility checking of the process.
- Involved in Creation of high level and low-level documents.
- Hands-on design, development, deployment, and maintenance of integration processes.
- Managing, Monitoring, Troubleshooting and supporting in deployment, Go-live phase.
- Working on various connectors Sale force, SFTP, FTP, Database, Mail, Disk etc.
- Good understanding of Cloud Computing – SaaS, PaaS, IaaS, and iPaas.
- Worked on different profiles JSON, XML, and Flat file.
- Knowledge on the web services (SOAP, REST).
- Knowledge on Add to Cache, Retrieve from Cache, Route and Branch Shapes.
- Build reusable integrations connectors by using Process Call, Process Route.
- Worked on Atom, Atom Cloud and Molecule configurations.
- Debug issues with integration solution by using Try catch and Exceptions Shape.
- Knowledge on java scripting and groovy scripting in extreme case of integrating.
- Worked on Real time integrations and Schedule integrations.

**TECHNICAL SKILLS:**

| | |
|---|---|
| Databases: | MY SQL Server, Oracle. |
| Scripting Languages | Java Script and Groovy Script |
| Integrations Tools: | Boomi, WorkAto |
| Platform: | Windows. |
| Web & Client server Technologies | XML, REST, SOAP |

## ORGANIZASIONS:

Present **Working Birla Soft Private Limited** 2024-May to Sep-2025
Previously worked for **WIPRO Limited** May-2022 to April-2024
Previously worked for **Accenture** (Delta ITech Solutions) 2018-Jun to 2020-Dec

**PROJECTS EXECUTED**

**Client: Daikin Applied Americas, Inc.**
**Role: Production Support**
**Duration: May 2024 – Aug 2025**
**Reporting Tools: Service Now**
**Team Size:7**

**Synopsis**
The Daikin Applied Inc. Project involved the design and deployment of high-efficiency HAVC systems with cloud-based solutions, utilizing Boomi technology services to streamline and optimize data management and system performance. As part of this initiative, I worked on the integration of Daikin's HAVC systems with cloud platforms to enable real-time monitoring, predictive maintenance, and enhanced data analytics. the project aimed to leverage IoT (Internet of Things) technologies and cloud -based solutions to improve operational efficiency, reduce energy consumption, and enhance the overall performance of HAVC systems across commercial and industrial applications.

**Responsibilities**:

- Monitor and maintain the health of system, applications, and infrastructure for Daikin enterprise Solutions.
- Proactively identify and resolve system performance issues to ensure minimal disruption to production operations.
- Investigate diagnose and resolve production issues promptly and efficiently by troubleshooting software, hardware, or network related problems.
- Provide timely responses to Incident tickets and ensure root cause analysis is performed for recurring issues.
- Assist in deploying patches, updates, and fixes to production system while ensuring minimal downtime.
- Coordinate and execute system upgrades and maintenance activities in accordance with change management process.
- Provide Support for user's access management, ensuring appropriate permissions and access controls are in place for users in production systems.
- Provide on-call support during non-business hours to resolve high-priority incidents and emergencies, ensuring continuity of operations.
- Work closely with the development team to ensure smooth transaction of application deployment from development to production.
- Ensure production systems comply with Daikins security protocols, industry standards, and regulatory requirements.
- stakeholders to communicate system status, report incidents, and provide progress updates on issue resolution.

**Client: Emerson, Manufacturing, Sydney.**
**Role: Boomi Developer**
**Duration: Sep 2023 – Apr 2024**
**Reporting Tool: Windows/MSSQL**
**Team Size: 6**

**Synopsis**

At Emerson, we're passionate about what we do. By fusing decades of technology and engineering expertise, Emerson continues to solve some of the world's most complex challenges with innovative

solutions for customers in industrial, commercial, and residential markets. We recruit the greatest talent and apply the best technologies to benefit our customers worldwide.

**Responsibilities**:

- Co-ordination with onsite team to gather the accurate requirements.
- Prepared Boomi process documents for better understanding of integration processes.
- Created and deployed the build process in different environments.
- Responding to reported issues, requests and inquiries of a technical or functional nature.
- Working with team members to build knowledge and provide backup assistance when necessary.
- Preparing the Design documents as per client requirements.
- Developing the integrations which includes processes, maps, connectors and many other components/steps to transfer the data from one system to other systems by performing required validations.

Client: **Suncor, Oil and Gas Calgary**
Role: Boomi Developer & Support
Duration: Mar 2022 – Aug 2023
Reporting Tool: MKS integrity tool
Team Size: 8

Synopsis

Suncor's operations include oil sands development and upgrading, conventional and offshore oil and gas production, petroleum refining, and product marketing under the Petro-Canada brand. Our renewable energy portfolio includes investments in four operating wind farms and the operation of an ethanol plant. Our use of innovative technology has made us an industry leader in the energy business – and with a strong strategy for growth, Suncor offers a solid foundation for you to continue building your career.

**Responsibilities:**

- Gathered the requirements by interacting with Vendors and Stakeholders.
- Designed interfaces using Boomi where quality and performance were of utmost importance.
- Designed and Configured Extensions for Connector components.
- Designed and developed multiple processes.
- Created components like mappings, business rules, and profiles needed for the processes.
- Used Document cache, Map components, Process properties and Dynamic Process properties in the project.
- Worked extensively on tools like postman and SOAP UI to test the endpoints developed on Boomi.
- Worked on multiple connectors like SAP, Database, Web services Server, Salesforce, HTTP Client, SFTP, Mail.
- Designed and developed SOAP/REST based web services using XML/JSON payload interacting with external web services.
- Worked on XML, JSON, SQL, & Groovy script.
- Assisted in designing an error handling framework and assisted in managing all environments extensions and code releases on each.

Client: **Amadeus, France**
Role: Boomi Developer & Support

Duration: May 2019 – Dec 2020
Reporting Tool: MKS integrity tool

Synopsis

Amadeus a travel technology company that build the critical solutions that help airlines and airports, hotels and railways, search engines, travel agencies, tour operators and other travel players to run their operations and improve the travel experience, billions of times a year, all over the world.

**Responsibilities:**

- Requirement gathering, analysis, Process design and development.
- Configured various connectors to interface with Different source and target systems.
- Implemented various Inbound and Outbound processes to connect with different source and target systems in Dell Boomi.
- Designed various reporting processes for daily reports.
- Identified gaps and developed multiple reusable processes.
- Deployed boomi processes on various environments including production.
- Deployed processes and web services across different environments using API and manual deployment process. ---/ws/SOAP (WS url) (/ws/user choice given name for API operation)
- Implemented webservices on Boomi integration tool.
- participated in go-live, migration and post-production support.
- Involved in DB upgrade activities, deployments and testing.
- Extensively used logic shapes like Route, Branch, process call, business rules, cache and Exception in Boomi processes.
- Extensively worked with Flat files such as .CSV, .TXT, TSV, XLSX by configuring FTP creations in Boomi.
- used various Boomi connectors like JMS, JDBC, Mail, Disk, FTP, SFTP, Salesforce, APIs.
- Used SOAP UI as primary testing tool. Created test cases and test suite on SOAP UI.

## EDUCATION:

- MCA from SV University in 2018 with 81%.
- BCA from Rayalaseema University in 2015 with 87%.

## CERTIFICATIONS:

- Associate Boomi Developer Certification.
- Boomi Professional Developer Certification.
- Boomi Professional API Management Certification.
