Name: Subhashini
E-mail: bsubha0610@gmail.com
Mobile: +91 8431954977

Professional Summary:

- 5.4 years of total professional experience including 4.2 years as Dell Boomi Developer and 1.2 years in non-IT roles.
- Strong expertise in designing, developing, and deploying Dell Boomi integrations for Cloud, On-Premises, and Hybrid environments.
- Extensive hands-on experience with Dell Boomi connectors: Disk, FTP, SFTP, Mail, Salesforce, Database, Web Services SOAP Client, HTTP Client, Web Services Server, Atom Queue, and API Management.
- Skilled in building Boomi processes using Flow Control, Business Rules, Try/Catch, Document Cache, Decision, Set Properties, Map, Process Call, Route shapes and more.
- Proficient in handling multiple data formats: XML, JSON, CSV, and Database; capable of creating profiles, mappings, and transformations as per business needs.
- Experience in REST/SOAP API integrations; familiar with SOAP UI and Postman tools for API testing and validation.
- Strong knowledge of process properties, dynamic process properties, document properties, extensions, cross-reference tables, and process routing techniques.
- Good understanding of **Groovy** scripting to handle custom logic within Dell Boomi processes.
- Expertise in exception handling and error management, designing resilient integrations with high fault tolerance.
- performance enhancements in production environments.
- Participated in requirement gathering and client interactions, translating business processes into technical designs and delivering integration solutions.
- Knowledge of EDI concepts, SQL queries, WSDL, SOAP, REST; exposure to configuring and managing Boomi API components and API management features.

Professional Experience:

- Worked as Boomi Developer in **Infosys** from **july**2023 to **Aug** 2025
- Worked Boomi developer at **Wipro** from September 2020 to May 2023.

Education Qualification:

- BTech Computer science and Engineering from JNTU K University.

Technical Skills:

- **Integration Platforms:** Dell Boomi Atom Sphere, Boomi Cloud Integration, MuleSoft, Salesforce Integration, SAP Integration, Kronos.
- **Connectors Used:** Disk, FTP, Mail, Database, Salesforce, Web Services (SOAP & REST), HTTP Client, Web Services Server, Atom Queue, SAP
- **Web Services & APIs:** RESTful APIs, SOAP, WSDL, API Management using Postman
- **Data Formats & Scripting:** XML, JSON, CSV, SQL, Groovy Script
- **Databases:** SQL Server
- **Enterprise Integration:** Integration with various systems, data mapping, transformation, and process configuration
- **Monitoring & Management:** Process Reporting, Exception Handling, Atom Management
- **Project Skills:** End-to-End Implementation, Migration, Support Projects, Requirement Analysis, Client Communication

---

Project 1:

Project : Healthcare Provider & Patient Data Sync
Company : Infosys
Role : Dell Boomi Developer

Key Activities Performed

- Created Boomi integrations for extracting patient, doctor, and appointment data from EHR (Electronic Health Record) and synchronizing it with CRM and billing platforms.
- Created and configured Boomi connectors such as FTP, JMS, REST APIs, and Database.
- Created complex process maps and error handling strategies for seamless data flow between EHR and ERP platforms.
- Created automated alerts and email notifications for data inconsistencies and transaction failures.
- Developed data mapping documents, process design documents, and implemented best practices for error recovery and retry strategies.
- Created deployment pipelines and implemented automated test and deployment strategies across environments.
- Created performance optimization strategies including partitioning, caching, and batch processing.

Project 2:

Project : E-commerce Data Sync

Company **:** Wipro
Role : Dell Boomi Developer

Key Activities Performed

- Integrated Salesforce Account and Opportunity data into the database using Salesforce and Database connectors in Dell Boomi.
- Worked extensively with Boomi connectors such as Disk, FTP, SFTP, Mail, JMS, Database, Salesforce, Web Services Listener, HTTP Client, and SOAP Client.
- Monitored integration process success and failure, sending automated email alerts using the Mail connector.
- Coordinated with onsite teams to gather and analyse accurate business and technical requirements.
- Understood business requirements and designed process maps and data transformations accordingly.
- Developed functional specifications based on integration needs and client inputs.
- Designed scalable integration architecture to support multiple business use cases.
- Managed the complete end-to-end development lifecycle, from design to deployment.
- Handled error logging and email notifications for exception scenarios in integration flows.
- Completed unit testing and performance tuning, including optimization of Spark jobs using partitioning, caching, and join strategies.
