Summary

Software Engineer with 12+ years of experience in designing, developing, and maintaining scalable backend and full-stack applications using C#, .NET 1.1 -> 8, and modern frontend frameworks. Skilled in building microservices, containerized applications, and cloud-based solutions. Strong focus on clean architecture, test-driven development, and collaborative teamwork in distributed environments.
Key expertise includes:
- C#, .NET Core, ASP.NET Core, EF Core
- SQL Server, PostgreSQL, MongoDB
- Docker, Kubernetes, RabbitMQ, gRPC
- Angular, React, Vue
- CI/CD, Azure DevOps, GitLab, GitHub
- TDD, unit, integration, and functional testing
- AI dev tools: Github Copilot (Claude Sonnet 4/4.5/GPT-5), Windsurf

Professional Experience

Eurofins – Senior Full-stack Developer (C# .NET & Angular, B2B) | Nov 2024 – Present, Remote from Portugal

- Developed and enhanced internal CRM system for multinational company.
- Designed and implemented new .NET Core services and Angular components.
- Managed builds, releases, and dev environments in Azure.
- Conducted code reviews and collaborated within distributed Scrum team.
- Leveraged GitHub Copilot for tasks implementation and development acceleration.

SD Technologies, Inc. – Senior Developer (C# .NET, B2B) | Nov 2022 – Nov 2024, Remote from Portugal

- Developed cloud POS system used across multiple US states.
- Built and maintained microservices and monolithic modules in .NET 7.
- Improved system reliability by managing technical debt and resolving production incidents.
- Implemented unit and functional testing, FluentValidation, and xUnit.
- Collaborated via Jira/Confluence and managed releases in GitLab CI/CD.

SibDigital – Head of .NET Department / .NET Resource Manager (Part-time) | Jul 2021 – Jul 2022

- Hired, onboarded, and managed mid/senior/lead developers.
- Created internal .NET code style guide and organized knowledge-sharing sessions.
- Grew department from 5 to 14 developers aligned with project expansion.

SibDigital – Senior .NET Developer | Jun 2019 – Jul 2022

- Developed backend for 'Digital Repairs' and 'Digital Rounds' mobile applications used across 25 factories.
- Migrated backend from monolithic service to microservices with gRPC and RabbitMQ.
- Resolved memory leaks and optimized performance of distributed services.
- Advocated TDD and integrated automated tests into CI/CD pipelines.
- Improved architecture using CQRS and .NET Core built-in tools.

Alfa-Bank – Full-stack Developer (.NET, React) | May 2017 – Jun 2019

- Built Commission Management System enabling tariff modifications.
- Designed backend with .NET Core, EF Core, and SQL Server; frontend with React/Redux.
- Introduced Jenkins CI pipelines and shared libraries for ~30 developers.
- Increased test coverage from 0% to ~45% through unit and integration testing.
- Delivered in-house training on .NET testing practices.

LifeIT, LLC – Full-stack Developer (.NET, ASP.NET MVC) | Nov 2014 – May 2017

- Developed multiple customer solutions in .NET Framework, ASP.NET MVC, WPF, and Windows Forms.
- Implemented SOLID principles, CI, and Git version control.

Telekom Service IT – C# .NET Developer | Jun 2013 – Nov 2014

- Developed desktop and web applications with WinForms, WPF, Entity Framework, and SQL Server.
- Gained practical experience with source control and regex parsing.

Education

Moscow State University of Civil Engineering (MSUCE), GPA: 4.88
Specialist, Automated Control Systems – 2013, High Score Diploma

Professional Development & Certifications

- Getting Started with .NET Core Clean Architecture – Udemy, 2022
- Azure Essentials for Developers – LinkedIn Learning, 2022
- AWS Essentials for Developers – LinkedIn Learning, 2022
- Software Architecture: Domain-Driven Design – LinkedIn Learning, 2022
- Domain Driven Design – Luxoft Training, 2018
- Test-Driven Development (TDD) – Luxoft Training, 2018
- Requirements Management in Agile Projects – ScrumTrek, 2015
- MCP: Programming in C# – Microsoft Official Course, 2013

Skills

Languages & Frameworks: C#, .NET Core, ASP.NET Core, EF Core, LINQ, SQL, PostgreSQL, MongoDB, React, Angular
Architecture & Practices: TDD, DDD, SOLID, CQRS, CQS, Microservices, Clean Architecture
Tools & Platforms: Docker, Kubernetes, RabbitMQ, Grafana, ELK, Azure DevOps, GitHub, GitLab, Jira, Confluence, VS Code, GitHub Copilot with Claude Sonnet 4/4.5/GPT-5, Windsurf
Testing: xUnit, NUnit, MS Test, FluentAssertions, Functional and Unit Testing
Languages: English (B2 – Upper-Intermediate), Russian (Native)

Side projects

- https://postvibe.app – Your personal AI copilot for social growth (NodeJS, Typescript, PostgreSQL, Github Copilot, Cloudflare);
- Faceless Telegram channel about art – AI-automated posts generating via Make.com tied with Perplexity API, OpenAI API and Telegram Bot API (check out my post on LinkedIN how it saved me hours and money - https://www.linkedin.com/feed/update/urn:li:activity:7388919610764500992/);
- Chernika App – personal financial managing app, decommissioned 3 years ago (ASP.NET Core, PostgreSQL, Docker, microservices).
