Work Experience

Software Development Engineer - II April 2025 – Present
ZopSmart (E-Commerce) *Bangalore*

- Currently designing and building new microservices in Go using Domain-Driven Design principles, collaborating closely with product and engineering teams.
- Taking ownership of end-to-end service redesign to improve maintainability and boost performance.
- Setting up service alerts, writing deployment manifests, and integrating Prometheus and Grafana for monitoring and alerting.
- Proactively debugging production issues including database inconsistencies and service panics, and implementing long-term fixes.
- Actively contributing to sprint planning, onboarding new members, and sharing knowledge within the team to enhance productivity.

Software Development Engineer - I July 2023 – March 2025
ZopSmart (E-Commerce) *Bangalore*

- Proficient in advanced techniques such as go-routines and channels to optimize application performance and enhance user experience.
- Collaborated with cross-functional teams to migrate legacy back-end technology architectures to modern stacks, gaining strong experience in ETL workflows and Agile development.
- Utilized Test Driven Development (TDD) to build integration and unit tests with over 95% coverage, improving code quality and maintainability.
- Deployed applications using HELM charts and managed CI/CD pipelines with GitHub workflows for reliable delivery.
- Designed and optimized microservices with Swagger-based API documentation for better scalability and performance.
- Built standalone scripts to fix production database issues, reducing downtime and improving data accuracy.

Software Development Intern July 2022 – July 2023
ZopSmart (E-Commerce) *Bangalore*

- Worked closely with senior developers to understand backend architecture and implement features in Go and Python.
- Built and enhanced internal tools to support development workflows and reduce manual effort.
- Wrote unit tests, performed code reviews, and contributed to documentation to improve service reliability.
- Gained hands-on experience with microservices, REST APIs, Kafka, and relational databases.
- Demonstrated strong learning ability and transitioned into a full-time role based on performance.

Projects

Employee Data Management API | *Go, Postgres, Docker, CI/CD* August 2022 - September 2022

- Developed a robust Employee Data Management API in Golang with secure RESTful interactions and Swagger documentation. Employed TDD and collaborated with teams for scalable, maintainable solutions.

Car Rental Website (Front End) | *HTML, CSS, JavaScript* March 2020 - April 2020

- Built an interactive car rental website with a user-friendly UI, supporting browsing, details view, and smooth navigation features.

MargStories – Travel Blog Platform | *Go, React.js, PostgreSQL, JWT, Bootstrap* Jan 2025 – Present

- Currently developing a full-stack web application for users to post, like, and comment on travel blogs.
- Implemented features including blog submission, commenting (with edit capability), liking system, and paginated article display.
- Created a role-based authentication system using JWT and built an admin portal to monitor and moderate articles.
- Used PostgreSQL as the database and Bootstrap (via CDN) for a responsive, clean user interface.

Skills

Languages: Go, C/C++, Python, SQL, JavaScript (basic), HTML (basic), CSS (basic)
Developer Tools: Git, Docker, MongoDB, Postman, Jira
DevOps Tools: Rancher, Harness, Kubernetes
Others: DBMS, Basics of Software Testing, SDLC, Kafka, Monitoring tools like Grafana

Education

Lovely Professional University Aug. 2019 – June 2023
B.Tech in Computer Science and Engineering
CGPA: 8.37
