- Good experience in Agile (Scrum) software development methodologies.
- Working experience on Star schema/Snowflake schema. Analyzed Source Systems, Fact and Dimension tables in Target D/W.
- Having good experience in OLAP features.
- Working experience on UNIX commands and WINDOWS operating systems.
- Proven strong analytical and logical skills with ability to follow project standards and procedures as per client specifications.

Technical Experience:

Skills	
Software Testing	ETL Testing
Programming Languages	SQL
ETL Tools	SSIS, Informatica Power Center
Operating System	Windows, Unix
Database	SQL Server, Oracle, Teradata
Test Management & other Tools	HP QC, HP ALM, SQL Server Management Studio, Oracle SQL Developer,Rally,Jira

Education Qualification

- Bachelors of Technology from AkulaSreeramuluCollege of Engineering,JNTUK.

Project Profile

Project #1:

Project name	Radian
Client	USA
Industry and Business of Client	Mortgage Insurance
Environment	SSIS , Rally, Jira
Databases	Sql Server Management Studio
Role in the project	Etl Test Engineer

Description:

About Radian

- Radian is a group of separately capitalized companies offering products and services through two primary business segments:
- **Private Mortgage Insurance** (MI) through its principal MI subsidiary Radian Guaranty Inc.
- **Mortgage and Real Estate Services** through its principal services subsidiaries Clayton Holdings, Radian Title Insurance Inc., Green River Capital, Red Bell Real Estate, LLC, and Radian Settlement Services.
- Radian is headquartered in Philadelphia and traded on the New York Stock Exchange under the symbol RDN.

Radian Companies

Radian Guaranty

- Radian's core business, **Radian Guaranty Inc.,** provides private MI to protect mortgage lenders from default-related losses and enable homebuyers to purchase homes more quickly with downpayments less than 20%.

Clayton

- Clayton Holdings, based in Denver, is the largest and longest-standing due diligence and surveillance firm in the mortgage industry

Objective:

- Radian has chosen Guidewire PolicyCenter as part of their overall program to manage their data and business logic related to their business. The main business functions are

Primary Mortgage Insurance, Contract Underwriting, and Pool Mortgage Insurance. In order to maximize their investment in PolicyCenter, Radian desires to maximize their use of the base functionality of the application which will result in reduced implementation cost in the short-term and reduced maintenance cost in the long-term

Roles and responsibilities:

- Understanding the project requirements from the Design Specifications.
- Developed test cases and test scripts based on the knowledge obtained from the existing system.
- Preparation of queries for reconciliation of test cases.
- Reported defects in Rally on testing the Application.
- Execution of test cases in Rally.
- Preparation of Daily Status Report.
- Performed Integration testing.
- Reconciling the source and target tables.
- Preparing defect report and tracking defects till closure.
- Reviewing of test cases and Rally updates thoroughly to ensure not compromising the quality

Performed sanity testing and smoke testing and raised few bugs before integration testing started

Project #2:

Project name	Rexel
Client Location	USA
Industry and Business of Client	Retail
Environment	Informatica, HP -QC, Unix
Databases	SQL Server, Oracle
Role in the project	ETL Test Engineer

Description:

Rexel is a company in retail business of consumer electronic goods spread over World. This project is creating an effective data warehouse to meet the reporting requirements of Rexel Electricals. Data warehouse plays a major role in enabling various stores to view the data at a lowest level. Data was Extracted, Validated and Loaded into the Warehouse Database using SQL Server as a Source And Oracle as a Target database. The aim this project is to extracting business data from different OLTP systems and loads data into data warehouse.

Roles and Responsibilities:

- Comparing Record Counts of Source and Target.
- Performing Data Validations between Source and Target.
- To compare the test results with the expected results.

- Designed & executed test cases.
- Developed, Reviewed & Executed Test Scripts in QC.
- Defect Reporting and Tracking in QC.
- Interactions with BA & Dev teams to resolve the issues.
- Sending testing status reports on a daily basis to onshore team

Project #3:

Project name	Radian
Client	USA
Industry and Business of Client	Mortgage Insurance
