CONNECT

Company Overview *(https://mckinleyrice.com/)*

McKinley Rice is not just a company; it's a dynamic community, the next evolutionary step in the world of professional development. Spiritually, we're a hub where individuals and companies converge to unleash their full potential. Organizationally, we are a conglomerate composed of various entities, each contributing to the larger narrative of global excellence.

Redrob by McKinley Rice: The Next Frontier in Professional Development

Propelled by a substantial 4-million-dollar pre-seed investment from top venture capitalists in Korea, Redrob emerges as McKinley Rice's latest venture, marking a new chapter in our expansion. Proudly introducing Redrob—a groundbreaking AI platform—we're set to redefine professional development.

Going beyond traditional academic measures, Redrob embodies our commitment to nurturing talents and bridging the gap between industry demands and professionals' aspirations. Fueled by our funded growth, we're poised to revolutionize recruitment and assessments, ensuring candidates are not just academically proficient but also industry-ready.

Redrob is the cornerstone of our vision to catalyze the formation of A-grade teams for organizations. Through seamless recruitment processes, we aim to be the indispensable right hand, facilitating the creation of high-calibre teams that surpass industry standards.

EXPERIENCE

Duties you'll be entrusted with:

- Design, develop and support web based applications and solutions, primarily with MERN stack.
- Integrate the web application with other Blockchain and AI based applications using APIs.
- Develop application code and unit tests across the full application technology stack, as per the approved designs.
- Automate tests and review test cases and scenarios.
- Perform code reviews of peer developers.
- Ensure performance, quality, operational stability and security of applications.
- Perform tests to identify bugs and resolve application defects.
- Ensure that the source code repository is up-to-date with the latest source code, automated tests and Product Design documents.
- Support operational teams with required knowledge transfer and provide required automation to monitor the applications.

Expectations from you:

Mandatory Requirements

- Validated hands-on experience in design and developing sophisticated and secure MERN stack based full stack applications.
- Strong proficiency in JavaScript, including DOM manipulation and the JavaScript object model.
- Expertise in React, Angular, Express, NodeJS, RESTful API development and CI/CD tools like Jenkins and GitHub Actions.
- Design and development of databases like MongoDB and MySQL
- Experience in UI designing and prototyping using tools like Figma
- Experience on Styled Components, Bootstrap, Tailwind CSS and other CSS-in-JS techniques
- Documenting the code inline using JSDoc or other conventions
- Experience with popular React workflows such as Flux / Redux
- Ability to write tests using frameworks like Jest, Mocha, Selenium, Enzyme, Jasmine or equivalent frameworks
- Ability to write code using web3.js to interact with Blockchain.

Additional Requirements

- Experience in web3.js, decentralized applications and smart contract development on any Blockchain
- Experience in AI application development

Technical Skills

- Full Stack Developer, MERN Stack, Blockchain Developer, AI developer
