

Role Overview

We're seeking an experienced and driven **Senior Blockchain Developer** with deep expertise in **Hyperledger Fabric** to architect, design, and implement robust enterprise-grade blockchain solutions. You will work on projects at the intersection of digital identity, decentralized applications, and public sector innovation.

Key Responsibilities

- Lead the design, development, and deployment of blockchain applications using **Hyperledger Fabric**.
- Architect and implement **chaincode (smart contracts)** for various use cases involving identity, transactions, and verifiable records.
- Define network architecture, consensus protocols, access controls, and peer node configurations.
- Integrate blockchain modules with front-end interfaces, APIs, and off-chain services.
- Collaborate with solution architects, DevOps engineers, and project managers to align on development goals.
- Ensure performance optimization, data privacy, and security best practices within blockchain environments.
- Document system design, APIs, and smart contract workflows.
- Stay up to date with developments in enterprise blockchain and contribute to system upgrades and product innovations.

Required Skills & Experience

- 5–6 years of total experience in software development with at least **3+ years of hands-on experience in Hyperledger Fabric**.
- Expertise in writing **chaincode using Go or Node.js**.
- Proficient in **Fabric CA, MSPs, ordering service**, and channel configuration.
- Strong understanding of cryptographic principles, consensus algorithms, and data security.
- Experience with **Docker, Kubernetes, and container-based blockchain deployment**.
- Familiarity with **REST APIs**, integration with external databases (e.g., CouchDB, PostgreSQL).
- Exposure to enterprise use cases in identity, supply chain, or energy domains is a plus.

Preferred Qualifications

- Bachelor's or Master's degree in Computer Science, Information Technology, or related fields.
- Certifications in Hyperledger or enterprise blockchain platforms (preferred but not mandatory).
- Experience with **smart contract auditing** and **performance benchmarking tools**.

What We Offer

- Work on impactful national-scale blockchain infrastructure projects.
- Be part of a mission-driven, innovative, and collaborative engineering team.
- Opportunities for growth in architecture, leadership, or product development roles.
- Competitive compensation and flexible work culture.
