PTW

SENIOR FULLSTACK WEB DEVELOPER

Location: Hyderabad

Mode of work: Work from Office

Type of employment: Permanent (full time)

Experience Range: 5-8 Years

Job Summary

We are seeking a Senior Fullstack Web Developer to help build a scalable, feature-rich social platform. In this role, you will build the apps admin and eventually lead development on the app's web client. You will help build user and deployment management tools and robust server-side logic. You will collaborate closely with product managers, and backend engineers to deliver new tools, dashboards and a scalable web client. If you enjoy working across the stack and experimenting with the latest web technologies and frameworks, this role is for you.

Responsibilities:

- Develop and maintain full stack web applications, ensuring a consistent and responsive user experience.
- Build intuitive front-end interfaces using modern frameworks (React, Angular, or Vue.js).
- Design and implement scalable backend services using Node.js, Python, or Golang.
- Collaborate with cross-functional teams to define, build, and ship new features.
- Integrate with external APIs and microservices using REST or gRPC.
- Ensure performance optimization for both front-end and back-end layers.
- Troubleshoot, debug, and resolve issues to ensure smooth operation across the stack.
- Participate actively in code reviews and contribute to a high-performance engineering culture.
- Stay current with industry trends in web development, cloud technologies, and AI-driven solutions.

Qualifications:

- Proven experience in full stack development with expertise in both front-end (JavaScript, HTML5, CSS3) and back-end technologies (Node.js, Python, or Golang).
- 5+ years of experience as software engineer
- Strong knowledge of front-end frameworks like React, Angular, or Vue.js.
- Experience with backend frameworks and databases (e.g., Express, PostgreSQL, MySQL, MongoDB).
- Familiarity with microservices architectures and distributed systems.
- Proficiency in API development and integration (REST, gRPC, OpenAPI).
- Solid understanding of UI/UX standards and responsive design.
- Experience with caching mechanisms (e.g., Redis, Memcached) for performance optimization.
- Strong familiarity with version control tools like Git and CI/CD pipelines.
- Excellent problem-solving skills and the ability to debug across the stack.
- BS/MS degree in Computer Science, Engineering, or a related field.

Additional Skills:

- Familiarity with cloud platforms (AWS, Azure, or GCP) and experience deploying web applications to the cloud.
- Experience working with AI technologies or integrating AI-driven features into web platforms.
- Comfortable in fast-moving, non-hierarchical environments with a startup mindset.
- Strong communication skills and ability to collaborate across functions (design, backend, and product).
- Passion for exploring new technologies and frameworks and solving complex problems.
- If you are an experienced full stack web developer who thrives on building innovative products and enjoys working across both the front-end and back-end, we'd love to hear from you! Join us to shape the future of interactive social entertainment.

Who we are:

Since 1994, Pole to Win has been providing outsourced Quality Assurance, Customer Experience and Localization Services to the Interactive Media, Internet of Things (IoT), Technology and e-Learning markets. Our service lines include Quality Assurance, Quality Engineering, Localization, Translation, Customer Experience, Talent Acquisition, Audio Production.

Our Values:

Pole To Win's core values are imbued across our global organization: Reinforced by our actions and our attitudes. Echoed throughout our approach to our operations and our clients. Exemplified by our culture, and most of all, our people. We build people and their careers. We actively turn to teammates for counsel, inspiration, and diverse perspectives. Relationships are built on mutual respect. Personal and professional integrity is our guiding principle. We are honest, authentic, transparent, and ethically sound. Our primary goal is to advance our clients' businesses and their customers' satisfaction. We set the bar for generating imaginative and effective solutions for the most challenging problems. We move with speed and agility. We love what we do. We have unwavering loyalty to our DNA, our culture, our values, and ourselves.
