Punam Patekar – Resume

Phone: +91 9538677993
Email: punam.patekar@gmail.com

To work in a challenging and stimulating environment with opportunity to use my current experience to architect, develop, structure of a complex project where the independent variables of time, cost & resource come together. Thus, contributing towards the achievement of organizational objectives and growing my knowledge base.

Synopsis:

- 17+ years of full stack experience in MERN Stack, MEAN Stack, Typescripts, TDD, BDD, Web technologies and Mobile Applications, jQuery, AJAX, Angular JS, Node JS, React JS and Amazon Web Services, GraphQL, Axios, Fetch Wrapper, JSON Web Token, Express.js
- Knowledge of OOP Concepts and patterns
- Design, Development, architect and Configuration of projects and Front-end web development
- Use of microservices in projects, Knowledge of building CI/CD pipelines, Jenkins, Docker, Kubernetes
- Strong experience in MERN Stack and MEAN Stack, Next.js, Vue.js and other JS frameworks
- Expertise in System Design and Modeling based on Business requirement.
- Extensive experience in MongoDB, MySQL, PostgreSQL and SQL query
- Experienced working in Agile and Scrum methodology.
- Have done couple of PoC's on Microsoft Products like SharePoint / Power Automate - Streamline repetitive tasks or to automate everyday tasks with Robotic Process Automation (RPA).
- As an Associate Manager, I have efficiently taken up transition of project from USA to India and managed with less team members without any escalations to reduce the operational cost.

Technical Skills:

Primary Skills	HTML5, CSS3, Bootstrap CSS, JavaScript, jQuery, MERN Stack, MEAN Stack, Angular JS, React JS, Typescripts, SOAP & REST Web Services,PHP, cURL, Perl
Secondary Skills	C#, ASP.net, Python
Scripting Languages / CMS	CMS like Typo3, Joomla, Drupal, Moodle, Word Press, Node JS, Adobe Experience Manager (AEM)
Databases	SQL, MySQL, MongoDB, DynamoDB, PostgreSQL
OS	Linux and Windows
Products like Microsoft, Facebook, Amazon	• Microsoft Products like SharePoint and Power Automate • Facebook Apps and Services • Amazon Web Services

Management Skills	Working on Sprint platforms, Following Agile & Scrum, Using Jira to manage tasks, time and tracking issues. Using SVN, GIT, TFS (bit bucket & others) for version controlling, Team handling

Roles and Responsibilities:

Sr. Software Engineer: May 2012 – Dec. 2016, Team Lead: Jan. 2016 – Feb. 2022 Associate Manager : March 2022 – August 2024	
Tech Stack - MEAN Stack, MERN Stack, MongoDB, Express JS, Angular JS, React JS, Node JS, Amazon Web Services, GraphQL, Axios, Fetch Wrapper, JSON Web Token, REST Web Services, PHP, cURL, HTML5, CSS3, Bootstrap CSS, JavaScript, jQuery, MySQL, Microsoft Power Automate, Python,	
Role	Define the overall architecture of React applications, including component structure, data flow management, state management strategies (like Redux or Context API), and API integration patterns. Taking transition of project from US to India team Lead the design, development, and deployment of the application Architect and implement scalable and maintainable solutions Guide the team in best practices for software development, including code reviews, testing, and performance optimization. Collaborate with **cross-functional teams**, including product managers, QA engineers, and DevOps, to align technical solutions with business objectives. Ensure the security, performance, and reliability of the application. Mentor and upskill team members to foster technical growth. Stay updated with the latest trends and advancements in **Technology development**. Manage project timelines, task allocations, and ensure **on-time delivery** of high-quality software.

Responsibilities	***Target Account - US*** ***2012-2015*** • Deeply involved and I took efforts to complete the functionality for all of the modules. • Alone taking end to end responsibility for all front-end work including analysis, implementation, and unit testing. • Worked on increase the site/app performance. • Worked on High priority and complex functionality requirements. • Gave my best towards stability of the product. ***CTO Team / DXC LABS*** ***2015 – July 2020*** • Knowledge of front state management Redux, ContextAPI, ReactHooks. • Experience on Reusable ReactJS component Development • Experience of development tools like NPM, Babel, Webpack , • Providing solutions to issues and helping team members to achieve deadline. • Worked on increase the site/app performance. • Worked on High priority and complex functionality requirements. • Gave my best towards stability of the product. • Experienced working in Agile and Scrum methodology. • Deployed and managed applications using EC2, S3. Implemented CI/CD pipelines using AWS CodePipeline and CodeDeploy. ***Security Tools Team*** ***July 2020 – August 2024*** • Guide the team on best practices for development, code standards, and technology selection, making key decisions regarding the overall front-end technology stack. • Hands on experience on ReactJS • Experienced working in Agile and Scrum methodology. • Completed Power Automate project to create common framework for password expiry notification automation across security and developed a prototype. • Mentoring, Providing KT and directions to the Engineering / Development team. • Lead project transition from US to India and handled efficiently with less member of team and without any escalations. • Collaborate cross-functionality with Dev-Ops team to streamline continuous integration and delivery pipelines to enhance deployment efficiency. • Managed AWS environments likeEC2, S3 to ensure system reliability and scalability. • Designed and built serverless architectures using Lambda and API Gateway.

Key Achievements	**Target CORP. (2012-2015)** I had a significant impact in building & developing the Cartwheel Project. It was a major revenue-generating addition to interactions with Target. DVM is a program at Target where vendors such as P&G, Nestle, Apple, L'Oréal and Unilever can promote products and seasonal offers on Target.com Target Gift Registry application to create, manage and share your baby or wedding registry. Project was handled into HTML, Bootstrap CSS, JavaScript, jQuery, Java, JSP, SQL server. **DXC LABS - (2015-2020)** Worked on various POC's and Prototypes across domains and technologies like Artificial Intelligence, Block Chain, Digital Onboarding, DXC Lab's Facade are some of the prominent ones. Also lead and mentored team during my DXC labs days for projects like Internal Task Bidding, return to work application with badges etc... Leading, mentoring & monitoring the performance of team members to ensure efficiency in process operations and meeting of individual & group targets. Providing direction to the Knowledge Engineering team. **Security Services Vertical – (2020 – August 2024)** • Automations like Power Automate - 3 strike rule, Birthday Remainder. • VirtualSM - VirtualSM is a datawarehouse tool and reporting solution. VirtualSM provides services to assist delivery teams and provides front-line support with day-to-day security compliance. • Managed VirtualSM application and handled INDIA team. Mentoring, Providing KT and directions to the Engineering / Development team. • Assigning tasks/stories to the team. • Making Sprint planning, mentoring team, helping team to estimate and achieve deadline.
Impactful Works	• www.target.com • www.cartwheel.com • You First application for Internal Task Bidding within the company. • Worked on building a Claims Insurance (Conversational Artificial Intelligence) • Block-chain technology - IXOM. • Developed POC for Digital Onboarding • Developed DXC Lab's Facade - Portal to all DXC Labs repositories. • Return to work application with badges During Covid-19 Pandemic for Company. • https://vsm.glb.security.dxc.com
Received various recognitions while working on **TARGET** Account like Marketing RockStar, Personal Leadership, Personal Leadership - Demonstrates Accountability, also received RockStar award in Town Hall Meeting from Minneapolis, US Office along with many appreciation emails from PM's, delivery head and clients. Recognition Reward Bonus from DXC India for excellent efforts on project. Received 2 promotions till present after joining DXC.	

Sr. Software Engineer – February 2011 – April 2012	
Tech Stack - PHP, MySQL, HTML, CSS, JavaScript, jQuery, AJAX, CMS like Typo3, Joomla, Drupal, Moodle, Word Press	
Role	Analyze, design, coordinate and supervise development.
Responsibilities	▪ Responsible for planning, analyzing, designing, processing and performing all jobs in an efficient manner with no / less assistance from the supervisor. ▪ Software development life cycle usage to its best. ▪ System design and modeling by referencing the Business requirement document. ▪ Analysis of current programs including performance, diagnosis and troubleshooting of problem programs, and designing solutions to problematic programming. ▪ Developing new programs and proofing the program to develop needed changes to assure production of a quality product. ▪ Analyzes of current / new programs and processes and making recommendations which yield a more cost-effective product. ▪ Maintaining positive client interactions with strong and effective inter-personal and communication skills and the ability to interact professionally with a diverse group of clients and staff.
Key Achievements	▪ Integrating Live Radio inside Facebook application and as a website. ▪ Google Map integration using Gmap3 version with Clustering and infowindow for Fastrack stores from database. ▪ Uploading video using webcam, store temporary on server and Video Conversion with **Zencoder API** from .flv to .mp4 format. Store on Amazon s3 server ▪ Integrating Google Plus and Facebook Recommendations, Publish on Facebook, Twitter Wall. Import and Invite Friends functionality. ▪ Integrating Flow-player, Image Gallery using Jcarousel, Web-services, Rating system.

Software Developer – From August 2006 to January 2011	
Tech Stack - PHP, MySQL, HTML, CSS, JavaScript, jQuery, AJAX, CMS like Typo3, Joomla, Drupal, Moodle, Word Press	
Role	Taking instructions from subordinates and meeting deadlines regularly
Responsibilities	▪ Implementation (coding) of websites. ▪ Analyzing the problem. ▪ Unit testing and deployment. ▪ Maintenance and bug fixing. ▪ Meeting deadlines on regular basis.

Key Achievements	▪ Worked on Typo3, Drupal, Joomla CMS with PHP, MySQL, jQuery, Ajax, XHTML to create and maintain websites. ▪ Customizing CMS modules to fit in as per the requirements provided to achieve goal. ▪ Key modules customizations ▪ Written many own modules, plug-ins in Typo3, Drupal, PHP. ▪ Used jQuery, AJAX extensively throughout. ▪ Worked on ecommerce sites and integrated Payment gate way like PayPal for shopping sites. ▪ Extensively worked on invoice management, Backend modules, Newsletter subscription, Contact forms, Sitemap, Event view with Calendar etc. ▪ Database design and integration considering DB Normalization for efficiency.

Work History:

Companies	Designation	Work Period	Place
DXC Technologies	Sr. Software Engineer, Team Lead, Associate Manager- Full Stack Development	April 2012 – August 2024	Bangalore, Karnataka
KRDS	Sr. Software Engineer	Nov.2011 – April 2012	Bangalore, Karnataka
Dalsons	Software Engineer	Jan. 2011- Nov.2011	Bangalore, Karnataka
Lelesys Infotech Pvt. Ltd.	Trainee Software Developer, Software Developer	Aug. 2006 - Jan.2011	Panjim, Goa

Taking up CSM certification to "**Effectively & Efficiently Deliver Projects**"
