Profile

I have 10+ Years' of experience in software development using given technologies **Backend: JavaScript ES6**, **Node**, **Express, Typescript, PHP, Laravel.**
Frontend: I have experience to implement **React Redux NPM,** Bootstrap 4. **Database: MySQL, MariaDB, MongoDB, React, DocumentDB, DynamoDB** (Experience to work on **NoSQL** and **SQL** Both).
API: Rest/Soap API both, I have implemented.
IDE: vocode/Notepad++/eclipse.
Rest Client: Postman/insomnia.
Agile, Jira, DevOps, Ajax, JSON, XML and **OOPs** Concepts.
Currently associated as an **(Sr. Software Eng.)** with "**Kare Partner**.

TECHNICAL SKILLS

- Programming Languages: NodeJS, TypeScript, React, vanilla JavaScript, Data Structures & Algorithms.
- Client-Side Web Technologies: React, Redux tool, vanilla JavaScript, Typescript, jQuery, Bootstrap, JSON, XML,XSL, Electron.
- Web Services: Restful Micro services using express framework
- HTTP Client: Postman, insomnia, Advance REST Client.
- Build and Performance Monitoring Tools: SVN, GitHub, Jenkins.
- Databases: MySQL, MariaDB, MongoDB, Document DB, ArangoDB, DynamoDB.
- IDE Platforms: VS-code, IntelliJ IDEA, Eclipse, Sublime text.
- SDLC Methodologies: Agile.
- Operating System: MAC, Ubuntu, Windows

Work Experience

03/2024 – PRESENT NOIDA, INDIA
Sr. software engineer
Kare-Partner
I have 10**+ Years** of experience in software development.

- Currently I am Working in **Kare Partner** at last **1.8+ Years** as a Sr. Software Eng.
- Approx. **2 Year** working in **3I-Infotech** (as Sr. Software Eng.)
- Approx. **1.2 Year** working in **Veative Lab** (as Sr. Software Eng.)
- Approx. **5 Year** working in **MPS Limited Noida** (as Sr. Software Eng.)
- Developed software for a new product line
- Led a team of developers in creating a new software system
- Will develop software for a new product line
- Will lead a team of developers in creating a new software system

Work Experience

LANGUAGES (EXAMPLE)

English (example)	
Hindi	

SKILLS

NodeJS	
MYSQL	
MongoDB	
Express	
Core JavaScript	
React	
React Redux	
Rest/Soap API	
React	
AWS	
Micro-services	
Kubernetes	**Limited**
Docker	**Limited**
AWS Cognito, DynamoDB, API Getaway, S3 with Kubernetes	
DocumentDB, Arangodb other aws services like TextExtract)	
API Clients	

Education

07/2011 – 04/2014 PRAYAGRAJ, INDIA

Computer Science | UPRTOU

BCA

Challenging Projects

- **SMS Portal:** there have multiple SMPP and Other Getaway (SIM), there have hues run time data traffic in a second there have thousands of data has been through in our system. We have fully developed the system that can manage data traffic and send it in multiple getaways and take each of the SMS DLR.

Role: As a PHP Programmer, I have responsibility to add programming logic with data base query as well as manage run time data traffic and collect each SMS DLR. I am single person which is going to take care of all the programming implementation with my manager. Technologies Used: Core PHP, MySQL Database, Rest API with Basic Auth and Auth1

- **MPS Track: Team size-6 (with a UI Developer)**

Language: NodeJS, Rest API micro services, Database: MySQL, angular4

Role: Understanding Business logic and implemented that as a full stack developer.

Description: For e-book/Journals publication MSP have a product where we have added these functionalities.

- Creating Dynamic workflow and that configuration
- Content management system (**AcessEdit**)
- **Content Delivery system (Published Online as well as offline content)**

- **TGL Online and Offline(http://tgl.org.au/) Project Team Size: 13 (with a UI Developer)Language**: NodeJS,micro services, Database: MySQL, angular4

Role: Understanding Business logic and implemented that as a full stack developer.

- **TGL Dynamic workflow creation** (NodeJS/MySQL Micro services)
- **Content management** (NodeJS/MySQL GraphQL Micro services, Bits Standard XML, XHTML)
- **Content delivery** (NodeJS/MySQL GraphQL Micro services, Bits Standard XML, XHTML)
- **Native Mobile app** (IOS, Android,Windows) (Angular IONIC, NodeJS/MySQL GraphQL Micro services
)

Challenging Projects

JavaScript, NodeJs, MySQL, ArangoDB, DocumentDB, Micro services)

- **MPS Scholar Store (http://exeley.com): Team: 6(with a UI Developer)**

Language: NodeJS, Rest API micro services, Database: MySQL, Arrango DB

Role: Understanding Business logic and implemented that as a full stack developer.

- MPS Book Content Reader **Team: 9(with a UI Developer)**

Language: NodeJS, Rest API micro services, Database: MySQL, React

Role: Understanding Business logic and implemented that as a full stack developer.

- **DAM System Team: 9 (with a UI Developer)**

Language: NodeJS, Rest API micro services, Database: MySQL, MongoDB, React, Redux

Role: Understanding Business logic and implemented that as a full stack developer.

Description: in this we have two node app which is deployed with same machine with using multiple databases there that Nginx as a load balancer who can care about traffic of the load, and we have added a event to synced data between MySQL and MongoDB. All the asset store from AWS S3 Bit buckets. We can use these assets any of the books and journal contents using intercept the request with auth1 authentication.

- **Launchmycareer Team Size**: 15 (4 API +6 React +3 Top Management Team)

Language: NodeJS, Rest API micro services, Database: MySQL, DynamoDB, Reacts

Role: Understanding Business logic and implemented that as a Backend developer.

Description: in this we are using aws Cognito services for login, this app basically we have created for live student counseling have two sections once is counselor and another once is student.
