Petchiappan.P

PROFESSIONAL SUMMARY:

Results-driven Software Developer specializing in Angular, .NET Core, and Azure. Successfully delivered 9+ projects, showcasing expertise in building scalable, high-performance applications. Strong problem-solving skills with a focus on optimizing performance, improving maintainability, and implementing best practices. Passionate about modern web development, API integrations, and cloud-based solutions.

TECHNICAL SKILLS

Frontend Technologies: Angular 15+, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Angular Animations, NGRX, RxJS, ASP.NET MVC

Backend Technologies: .NET Core Web API, C#

Databases: MS-SQL,

Cloud & DevOps: Microsoft Azure , Git/GitHub

PROJECTS

Migrating Enterprise Application from AngularJS to Angular

Refactored a complex online application, ensuring seamless migration with zero downtime. Improved page load speed by 30% using RxJS and lazy loading techniques. Ensured scalability and maintainability by following Angular best practices.

Angular-Based Ticketing System

Developed a multi-role ticketing system (Admin, HR, Employee) with role-based access control. Integrated a .NET Core REST API for secure data handling and authentication. Enhanced UI responsiveness and user experience using Angular 16 and Bootstrap.

REST API for Excel Data Processing (NestJS + TypeORM)

Built a scalable REST API to process large Excel sheets, ensuring data consistency. Improved efficiency using TypeORM for optimized database interactions. Implemented robust error handling and logging mechanisms for reliability.

Power BI-Integrated ASP.NET Core MVC Application

Embedded real-time Power BI dashboards using REST API calls. Configured Azure AD authentication for enterprise-grade security. Enabled SSO and role-based access for secure report viewing.

Automated SQL Data Import & Nightly Email Notifications

Developed an automated system to import Excel data and update SQL database. Implemented a nightly report system to notify users of new data additions. Enhanced operational efficiency by reducing manual work by 50%.

Migration of WCF Services to ASP.NET Core Web API

Migrated 50+ controllers and 350+ methods to modern RESTful APIs. Applied Clean Architecture principles for better scalability and maintenance. Integrated dependency injection and asynchronous programming for efficiency.

Designed a Rowing Website

Developed a responsive website using Angular 16 and Bootstrap 5, showcasing rowing boats with their club information, features, and contact details. The website features a modern design, easy navigation, and a seamless user experience across various devices. Implemented a robust search functionality, allowing users to quickly find specific clubs or boats. Utilized Bootstrap's grid system and Angular's component-based architecture to ensure a responsive and maintainable design.

Qatar Living - Monorepo (Next.js 15 + ASP.NET Core Web API)

Qatar Living is a modern, scalable, multi-vertical platform built as a monorepo with a Next.js 15 frontend and ASP.NET Core Web API (.NET 8/9-ready) backend. The application is split into autonomous verticals (eCommerce, Marketing, CMS/News, Jobs) with shared libraries for design, analytics, auth, and domain models. We use TanStack Query for data fetching/caching, a feature-based folder structure for maintainability, and a clean service-oriented backend with well-defined contracts**.**

Tara Green Yoga

The Tara Green Yoga Mat project is an eco-friendly e-commerce web application built with Angular 17 and enhanced with smooth, modern GSAP animations. The primary objective is to promote and sell handmade yoga mats crafted from 100% organic cotton, offering an environmentally sustainable alternative to synthetic mats.

The website is designed to provide an elegant and interactive user experience, reflecting the brand’s values of sustainability, wellness, and mindful living. The GSAP-powered animations are integrated into various sections of the site, such as product showcases, transitions, and call-to-action banners, to create a visually engaging journey for the customer without compromising performance.

Trippin

Developed the official website for *Trippin*, a creative brand group with two sub-brands — **TTees** (customized apparel for men and women) and **TCutz** (customized 3D products for branding, décor, and gifting). The site showcases Trippin's innovative identity through modern design, smooth GSAP animations, and a responsive Material UI layout. The platform highlights precision-crafted designs for corporate displays, name boards, wall art, and merchandise, reflecting the brand's blend of creativity and craftsmanship.
Tech Stack: React.js, GSAP, Material UI

EDUCATION

B.E. Mechanical Engineering
SNS College of Engineering | 90%
