Pintoo Kumar

Professional Summary

Full-Stack Engineer with **7+ years** of experience designing and delivering secure, high-performance web applications for government and enterprise digital-transformation programmes. Expert in **Angular** front-ends, **Spring Boot** microservices, **Camunda BPM** orchestration, and **PostgreSQL**-driven data models. Adept at driving architecture decisions, optimising performance and security, and mentoring engineering teams.

Core Competencies

Category	Skills
Frontend	Angular (v8-16), RxJS, NgRx, Angular Material, Responsive UI/Accessibility
Backend	Java 17, Spring Boot, Spring Security, Spring Cloud, REST/JSON, GraphQL
Workflow/BPM	Camunda 7/8, BPMN 2.0, DMN, External-Task Pattern
Database	PostgreSQL, PL/pgSQL, Query Optimisation, Liquibase Migrations
DevOps & Cloud	Docker, Kubernetes, Helm, GitHub Actions, AWS ECS & RDS, Azure DevOps
Other	Microservices, OAuth2/JWT, API Gateway, TDD/JUnit, SonarQube

---

Key Projects

AI-Assisted Trading Platform

- **Tech Stack:** Angular 14, Spring Boot 3, Camunda 7, PostgreSQL (TimescaleDB), FastAPI (Python microservice), Docker Compose, GitHub Actions
  ● Architected micro-service backend with FastAPI, async SQLAlchemy, and Pydantic; designed time-series-partitioned schemas in PostgreSQL for strategies and trades.
  ● Integrated Backtrader for historical back-testing and live WebSocket feeds from Binance & Alpaca, implementing robust retry, exponential back-off, and rate-limit

handling.
● Exposed REST + WebSocket endpoints for strategy execution, PnL streams, and equity curves; auto-generated OpenAPI docs and ReDoc portal.
● Developed a responsive Angular dashboard that visualised 30+ KPIs with Recharts; containerised the stack with Docker Compose and shipped CI/CD via GitHub Actions.

Title-Direct – Real-Estate & Mortgage Platform

- **Tech Stack:** Angular 13, Spring Boot 3, Camunda 7, PostgreSQL, Azure AD, Redis, Jest, Cypress
  ● Built secure Spring Boot REST services orchestrated by Camunda BPMN workflows, with PostgreSQL as the system-of-record for title and escrow data.
  ● Implemented Angular component library with Material Design, state managed through NgRx; enabled SSO with Azure AD and fine-grained RBAC.
  ● Instrumented Redis caching and background workers to accelerate document generation by 60 %.
  ● Ensured production readiness with Jest unit tests, Cypress E2E suites, and Helm charts for AKS deployments.

DocVenture – Contract Automation Platform

- **Tech Stack:** Angular 13, Spring Boot 3, Camunda 8, PostgreSQL, OpenAI GPT-4, Azure, GitHub Actions
  ● Developed full-stack modules in Spring Boot with Camunda external-task pattern for approval flows; stored versioned contracts in PostgreSQL.
  ● Leveraged GPT-4 to extract clauses and recommend redlines, surfacing insights in a real-time Angular workstation.
  ● Published Swagger docs, enforced OpenAPI contract tests, and automated blue-green deployments via GitHub Actions + Azure Web Apps.

E-Commerce Platform

- **Tech Stack:** Angular 12, Spring Boot 2, Camunda 7, PostgreSQL, Stripe, Razorpay, Redis, Docker, GitHub Actions
  ● Designed modular Spring Boot microservices handling product, order, and payment domains; modelled order fulfilment in Camunda BPMN.
  ● Integrated Stripe and Razorpay for multi-gateway payments, with secure Angular checkout flows and optimistic UI updates.
  ● Implemented Redis for cart/session caching and containerised deployments via Docker and GitHub Actions-driven CI/CD pipeline.

Education

B.Tech. in Computer Science & Engineering — Dr. A.P.J. Abdul Kalam Technical University (2016)

Certifications

- **Camunda Certified Engineer (CCE)** — 2023

- **Oracle Certified Professional, Java SE 11 Developer** — 2022
- **AWS Certified Developer – Associate** — 2021

Community & Leadership

- Speaker, **Camunda Community Summit 2024** — “Bridging BPM and Microservices.”
- Active OSS contributor: Camunda connectors, Spring Boot plugins.
- Mentor to five early-career developers through internal engineering bootcamp.

Technical Stack at a Glance

Angular | Spring Boot | Camunda BPM | PostgreSQL | Docker | Kubernetes | AWS | GitHub Actions | Jenkins | Liquibase

---

Soft Skills

System Design • Clean Code Practices • Ownership Mindset • Agile/Scrum • Effective Communication
