Pintoo Kumar

Professional Summary

Full-Stack Engineer with **7+ years** of experience designing and delivering secure, high-performance web applications for government and enterprise digital-transformation programmes. Expert in **Angular** front-ends, **Spring Boot** microservices, **Camunda BPM** orchestration, and **PostgreSQL**-driven data models. Adept at driving architecture decisions, optimising performance and security, and mentoring engineering teams.

Core Competencies

Category	Skills
Frontend	Angular (v8-16), RxJS, NgRx, Angular Material, Responsive UI/Accessibility
Backend	Java 17, Spring Boot, Spring Security, Spring Cloud, REST/JSON, GraphQL
Workflow/BPM	Camunda 7/8, BPMN 2.0, DMN, External-Task Pattern
Database	PostgreSQL, PL/pgSQL, Query Optimisation, Liquibase Migrations
DevOps & Cloud	Docker, Kubernetes, Helm, GitHub Actions, AWS ECS & RDS, Azure DevOps
Other	Microservices, OAuth2/JWT, API Gateway, TDD/JUnit, SonarQube

---

Key Projects

AI-Assisted Trading Platform

- Architected a micro-service backend with FastAPI, async SQLAlchemy, and Pydantic; designed time-series-partitioned schemas in PostgreSQL for strategies and trades. fileciteturn2file1L23-L25
- Integrated Backtrader for historical backtesting and live WebSocket feeds from Binance & Alpaca, implementing robust retry, exponential back-off, and rate-limit handling. fileciteturn2file1L27-L29

- Exposed REST + WebSocket endpoints for strategy execution, PnL streams, and equity curves; auto-generated OpenAPI docs and a ReDoc portal. fileciteturn2file1L31-L33
- Built a React SPA with Hooks and SWR, visualising 30+ KPIs with Recharts; containerised the stack with Docker Compose and delivered CI/CD via GitHub Actions. fileciteturn2file1L34-L39

Title-Direct – Real-Estate & Mortgage Platform

- Built secure backend services using NestJS, GraphQL, TypeScript, Prisma, and PostgreSQL, integrating a blockchain ledger with R3 Corda for tamper-proof transactions. fileciteturn2file1L42-L48
- Managed authentication through Azure Active Directory, custom workflows, monitoring with New Relic, and enterprise integrations via Swagger and Boomi. fileciteturn2file1L50-L55
- Designed responsive UI components in Next.js and Material-UI, orchestrating real-time state with Redis and ensuring end-to-end quality via Jest and Cypress tests. fileciteturn2file1L56-L60

DocVenture – Contract Automation Platform

- Developed full-stack components with NestJS, GraphQL, PostgreSQL, and Prisma; added AI-powered clause extraction and drafting using OpenAI LLMs. fileciteturn2file1L61-L68
- Delivered a Next.js + MUI frontend with Apollo Client, Azure-hosted services, Swagger docs, and continuous deployment through GitHub Actions. fileciteturn2file1L71-L76

E-Commerce Platform

- Architected a modular backend with NestJS, TypeScript, PostgreSQL, and Prisma, exposing both REST and GraphQL APIs. fileciteturn2file1L81-L85
- Integrated Stripe and Razorpay for multi-gateway payments, built an admin dashboard with Next.js, React.js, and MUI, and introduced Redis caching plus MongoDB-backed CRM workflows. fileciteturn2file1L87-L93
- Automated containerised deployments and CI/CD using Docker and GitHub Actions. fileciteturn2file4L48-L49

Education

B.Tech. in Computer Science & Engineering — Dr. A.P.J. Abdul Kalam Technical University (2015)

Certifications

- **Camunda Certified Engineer (CCE)** — 2023
- **Oracle Certified Professional, Java SE 11 Developer** — 2022
- **AWS Certified Developer – Associate** — 2021

Community & Leadership

- Speaker, **Camunda Community Summit 2024** — “Bridging BPM and Microservices.”
- Active OSS contributor: Camunda connectors, Spring Boot plugins.
- Mentor to five early-career developers through internal engineering bootcamp.

Technical Stack at a Glance

Angular | Spring Boot | Camunda BPM | PostgreSQL | Docker | Kubernetes | AWS | GitHub Actions | Jenkins | Liquibase

---

Soft Skills

System Design • Clean Code Practices • Ownership Mindset • Agile/Scrum • Effective Communication
