Replace the dog illustration with the new one and also replace the logo from the header which is slightly improved. Edit the text as in the picture and change the font color of the “Claim a Gift Pack) to be like “Send Kindness” + the text below. Please try to play a little bit more with the gradient for this section to look more like the gradient from below, because right now it is more like a single solid color.

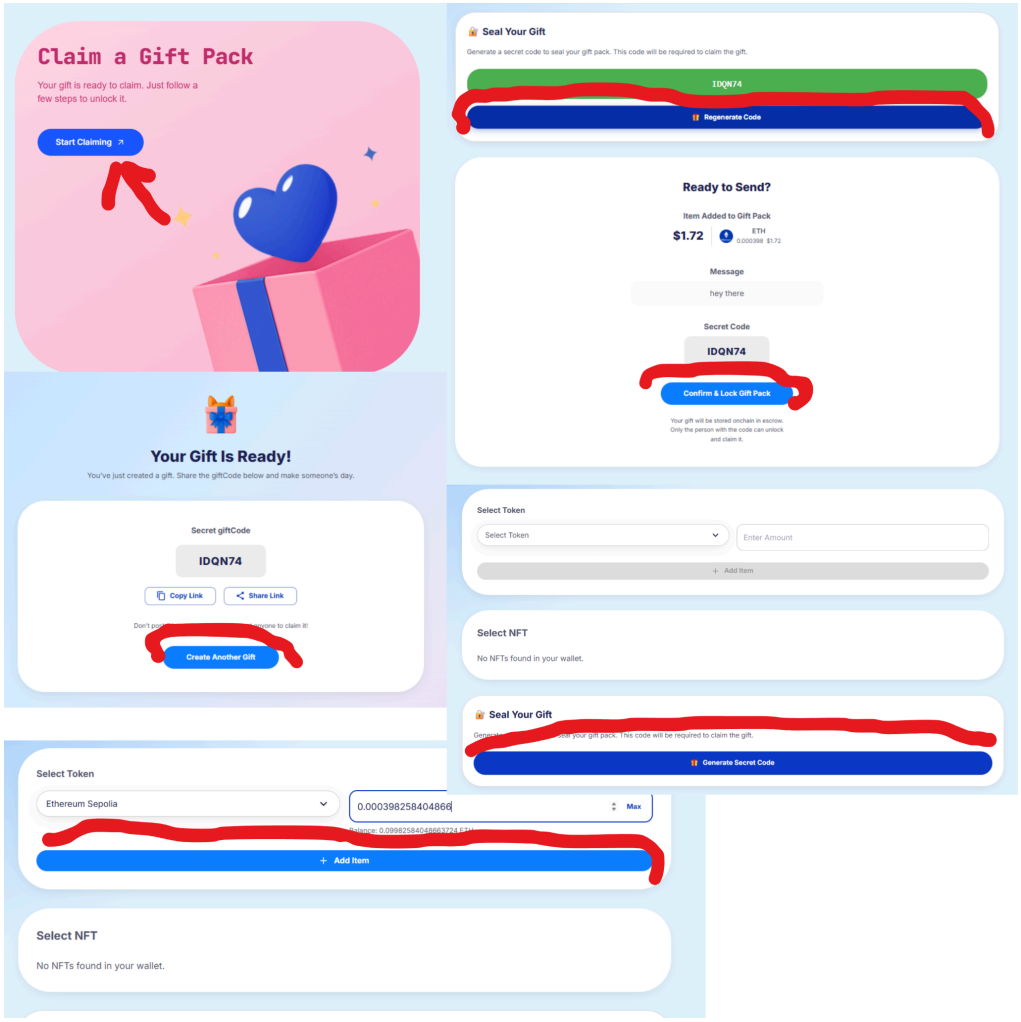

I’ve also attached other pictures for this section. Please replace them.

For this section change the icons with the ones attached.

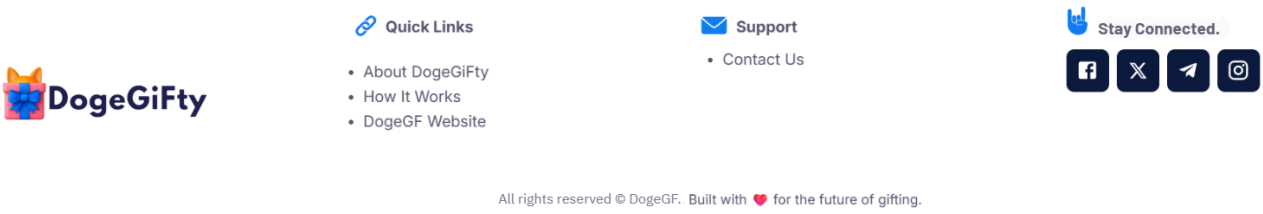

All these buttons should have the same color as the “Start Claiming” and “Connect Wallet” buttons for consistency.

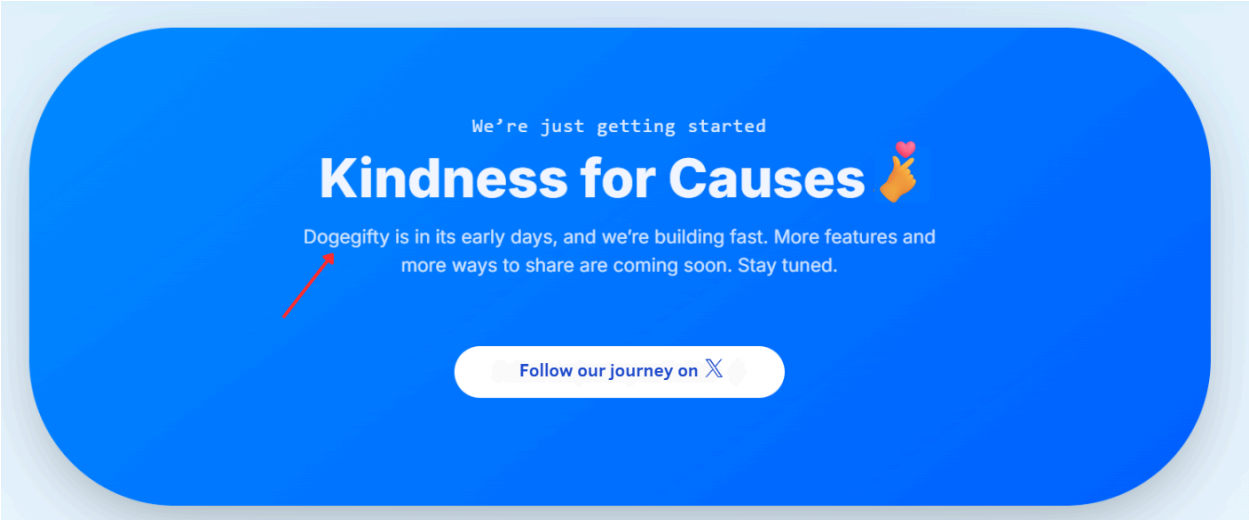

Footer:
Quick Links:
About DogeGiFty will link to a future Medium article that we'll prepare.
How It Works is ok.
DogeGF website should go to www.dogegf.com

For the social links we want only X, Telegram and Discord for now:
X: https://x.com/dogegftoken
Telegram: https://t.me/DogeGF_Official
Discord: https://discord.com/invite/EwKuFDCA5V

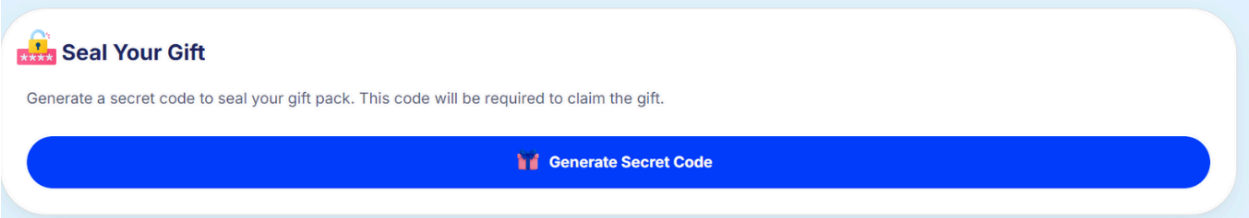

The logo should be slightly bigger than it is now. (Icons in attachments)

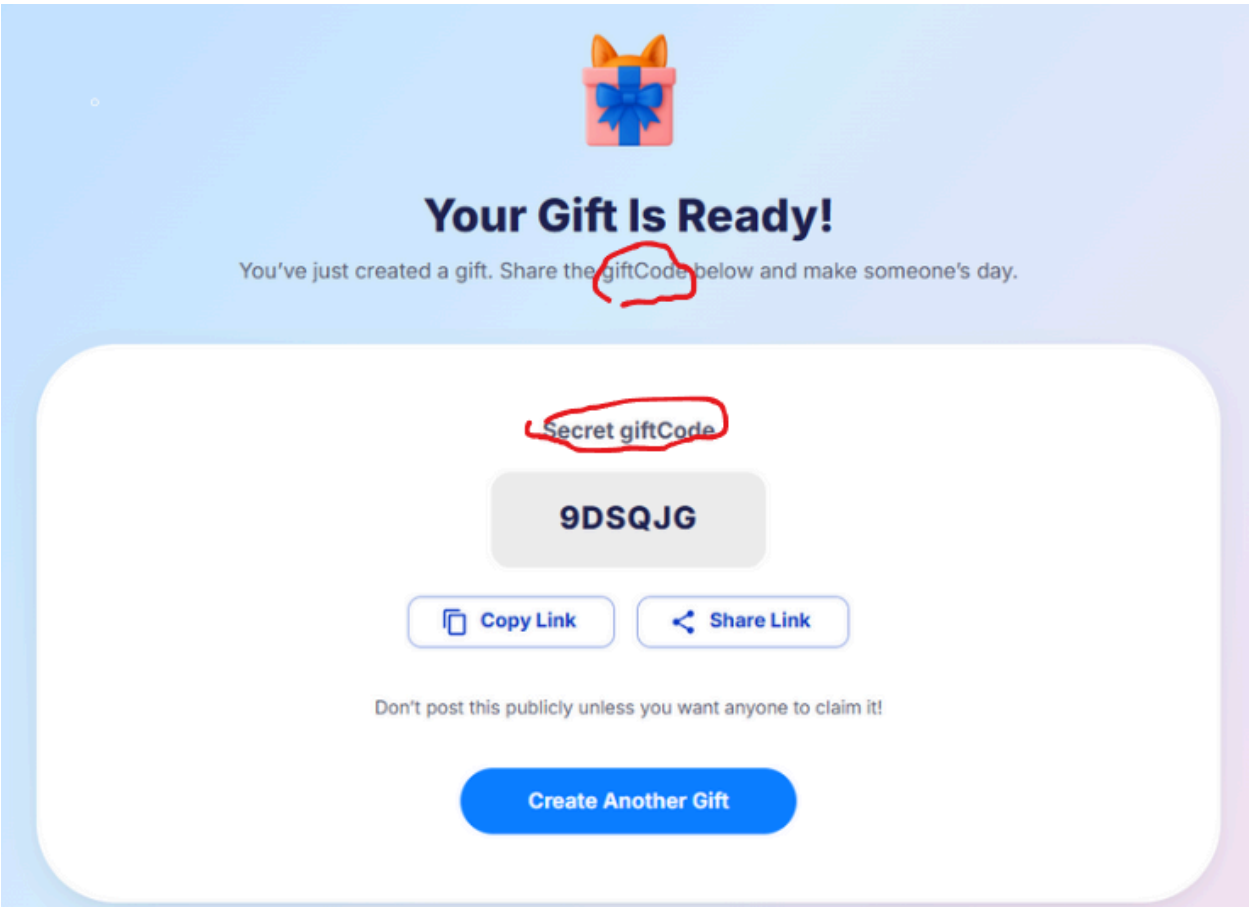

For the below section edit "Dogegifty" ->"DogeGifty and edit the button. (Icon in the attachment).

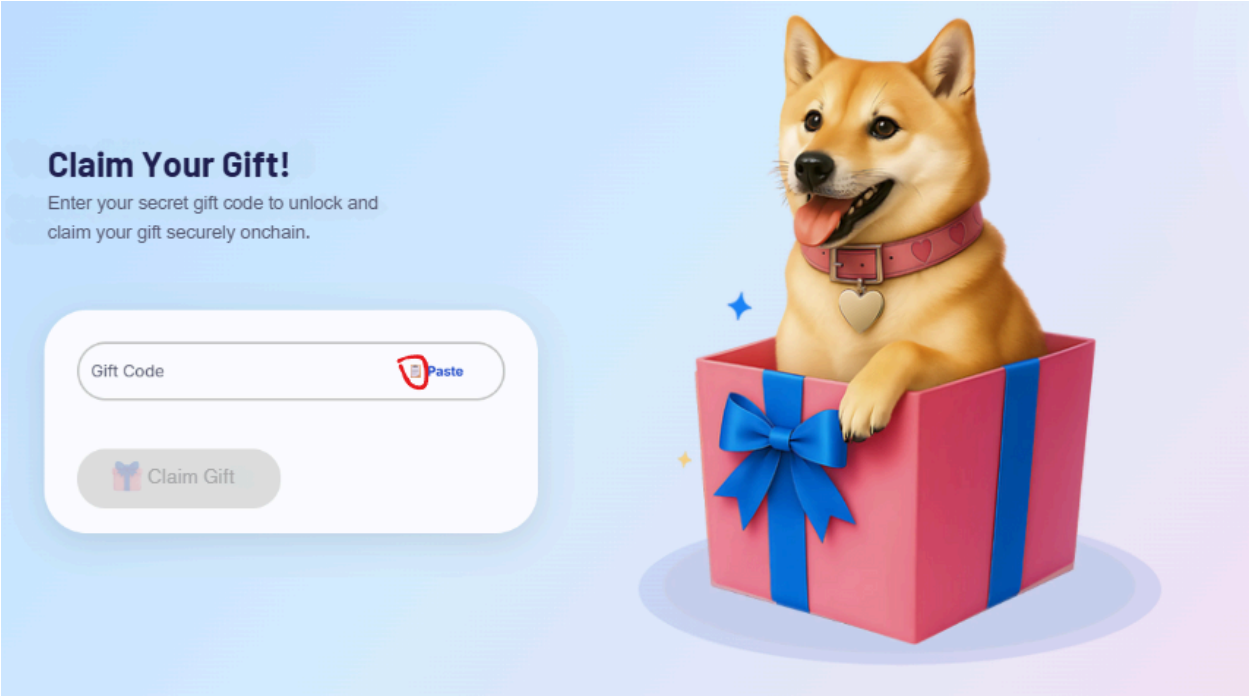

Change the existing subsection to look like below.

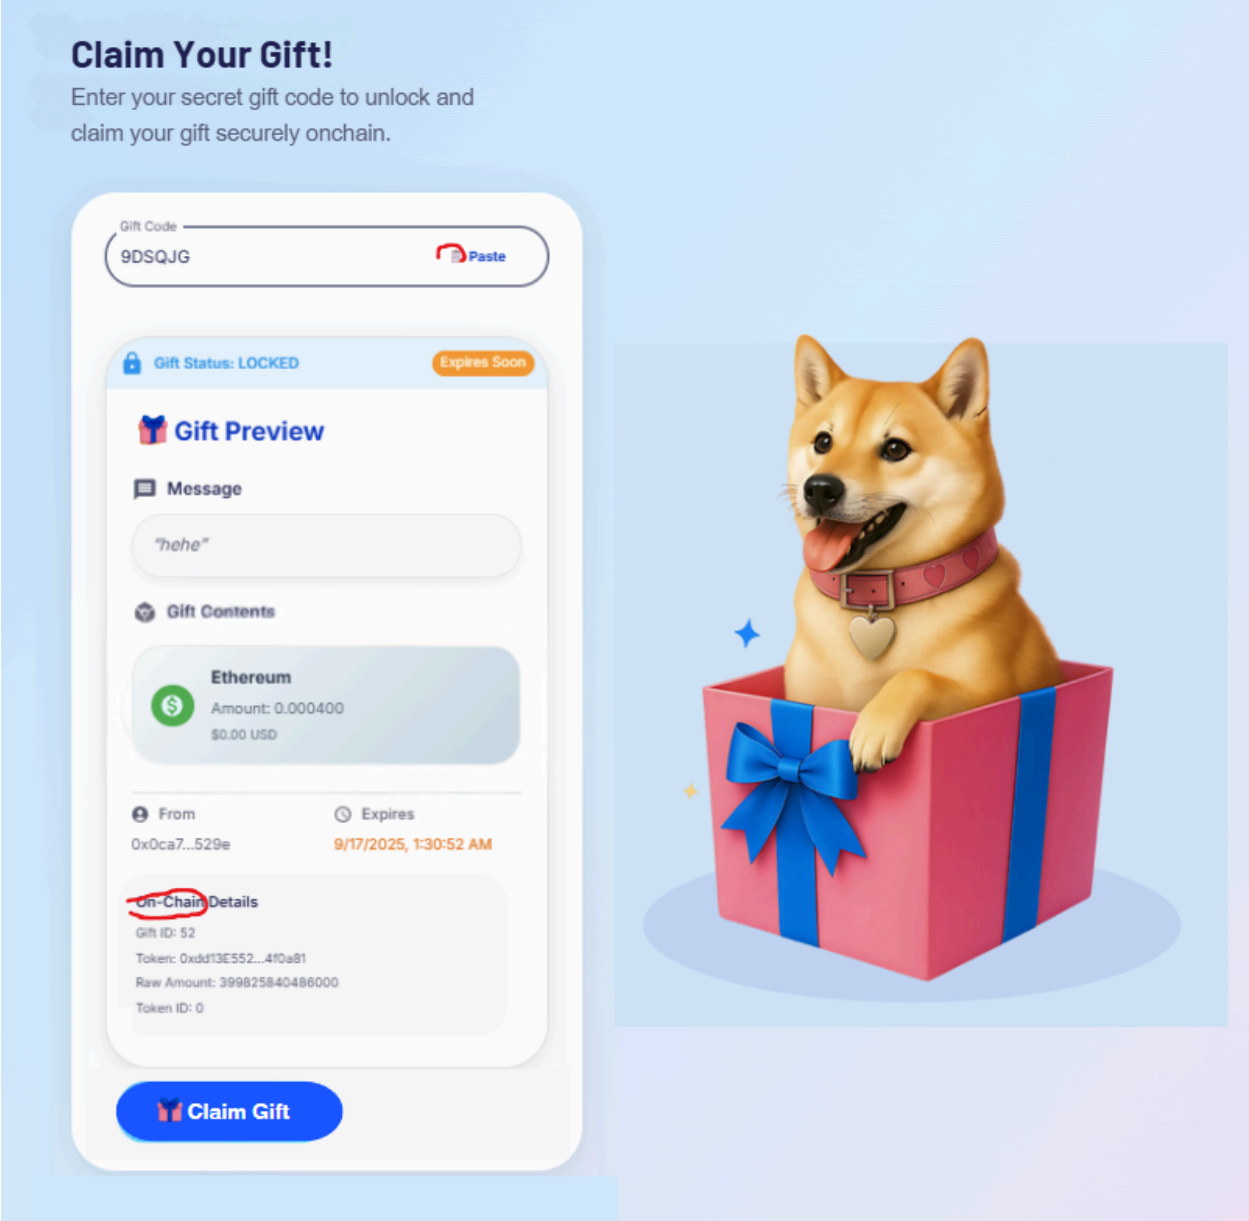

giftCode -> secret gift code
Secret giftCode -> Secret Gift Code

On the Claim page change the text to “Claim Your Gift! Enter your secret…”
Delete the paste icon.
Replace the gift icon from the “Claim Gift” button.
Replace the dog illustration on the right with the new one.

On the Claim page change the text to “Claim Your Gift! Enter your secret…”
Everywhere the word is onchain, not on-chain.
Delete the paste icon.
Change the Gift Preview icon. (Icon in the attachment)
Change the “Claim Gift” button as below.
The dog illustration on the right needs to be replaced with the new one on all pages where it is already.
Here I’ve deleted some of the Gift Preview fields. Some of the information was repeating such as Gift ID, token address etc.
In the gift contents the amount is not converting in USD and showing $0.00
Under Onchain Details you can leave for now Gift Code, Gift ID # and Token address.

What’s with this second block down below?
