Heena Motiyani

R&D Software Engineer 2 @ Broadcom | Problem Solving | Distributed Systems | Scalability | Golang | Java
Bengaluru, Karnataka, India

Summary

Currently working as a R&D SE-2, part of the Controller Core (Load Balancer) team. I specialize in building scalable, high-performance distributed systems.

Designed and implemented key scalability and performance enhancements for a distributed feature in load balancer, utilizing technologies like Protobufs, Golang Worker Pool, gRPC/RPC, and Redis—significantly boosting system efficiency and responsiveness.

Led the successful transition of the Traffic Capture project to a SaaS model, using Python, Golang, and gRPC technologies, enhancing service efficiency and customer experience.

Skilled at debugging and resolving critical customer and internal issues, ensuring seamless functionality and reliability of the Controller Core components.

I am passionate about system design, distributed systems, scalability, and continually improving product performance. Always eager to learn new technologies and contribute effectively to the team's success.

Experience

Broadcom
R&D Software Engineer 2
November 2023 - Present (1 year 8 months)
Bengaluru, Karnataka, India

• Enhanced scalability and performance of a distributed state cache feature in Avi load balancer by integrating Protobufs, Golang Worker Pool, RPC/gRPC, and Redis.
• Boosted operational state caching efficiency and overall system responsiveness, resulting in improved user experience.

• Collaborated with cross-functional teams to implement key enhancements, showcasing strong teamwork and communication skills.

VMware

2 years 3 months

Member of Technical Staff 2

February 2023 - November 2023 (10 months)
Bengaluru, Karnataka, India

Member Of Technical Staff

September 2021 - February 2023 (1 year 6 months)
Bengaluru, Karnataka, India

MetricStream

Intern

September 2020 - September 2021 (1 year 1 month)
Bengaluru, Karnataka, India

Part of Global Services, Europe region

Was part of two projects during the internship

1. Helped in developing the GRC application from scratch in my first project using technologies like Oracle, PL/SQL, Javascript and M7 Metricstream platform.
2. Second project was an upgrade project, resolved various internal bugs and support tickets raised by the customers, was responsible for providing optimal fix using technologies like Oracle, PL/SQL, M7 Metricstream Platform.

Education

GLA University

Bachelor of Technology - BTech, Computer Science

Milton public school

Intermediate and High school, Science
