PROFESSIONAL SUMMARY:

Experienced Golang Backend Developer with 3+ years of expertise in building, scalable micro services and REST APIs using Go, MySQL, PostgreSQL, and MongoDB. Adept at developing secure, high-performance backend systems in domains such as healthcare, insurance, and enterprise identity. Proven success in collaborative agile environments, delivering features end-to-end and mentoring team members. Seeking to leverage my backend expertise in a dynamic engineering team to drive scalable solutions and product innovation.

EDUCATION:

B.Tech in Computer Science Engineering
J.C. Bose University, Faridabad, Haryana — 8.4 CGPA (2018–2022)
AISSCE (12th CBSE), AISSE (10th CBSE) — 2016 & 2018

TECHNICAL SKILLS:

- **Languages:** Go, Python, C, C++
- **Frameworks/Libraries:** Gin, Echo, Gorilla Mux, GORM, Beego, Twilio, Westfax
- **Databases:** MySQL, PostgreSQL, MongoDB, Dynamo DB, Document DB
- **DevOps/AWS Tools**: GitHub, Bit bucket, Docker, AWS (Lambda, S3, SQS), Terraform, CI/CD, Postman, Linux, OKTA, Duo, Confluence, Jira
- **Others:** REST APIs, OOP, DSA, DBMS, Compiler Design, Unit Testing, Integration Testing, E2E Testing, Dev Testing
- **Domains:** Cyber Security, Healthcare, Insurance and Banking, AI Automation

EXPERIENCE:

Golang Consultant **Capgemini (Client: Cisco) — Jan 2025 – Present**
- Contributed to key features in Cisco's Product Identity and Access Management (IAM) system within the SCC team in a 30+ member agile environment.
- Supported secure access for over 3.6 million users by implementing and testing features using end-to-end, unit, and integration testing.
- Stack: Go (Gin), OKTA, Duo, AWS (Lambda, S3, DynamoDB), Terraform, CI/CD, Confluence, Jira.
- Mentored and guided 3 interns through onboarding and technical training.

Golang Developer **BluePi (Client: RXBenefits) — Apr 2023 – Dec 2024**
- Developed and maintained backend services for a healthcare platform, improving features like appointment booking and real-time communication.
- Affected millions of patients and thousands of doctors by improving system performance and API reliability.
- Stack: Go, REST APIs, PostgreSQL, GORM, Twilio, Westfax

Associate Golang Developer **Sword Software (Client: ICICI Lombard) — Sep 2022 – Mar 2023**
- Built and maintained systems for policy booking and CRM operations for 20,000+ vendors.
- Stack: Go, REST APIs, MySQL, Beego, Echo, Redis, ElasticCache

Golang Trainee **PrefEasy — Jan 2022 – Jul 2022**
- Gained hands-on experience in backend development, REST APIs, and MySQL.
- Developed GUI tools using Python's Tkinter and applied OOP principles.

PROJECTS:

- **Data Migration Using Go**: Migrated over 10 million records to MongoDB using Go programs with error handling.
- **Attendance Automator Using Go**: Built APIs for attendance, leave tracking, and biometric data integration using Go
- **Password Manager Using Go**: Created secure CRUD APIs for password storage, authentication, and encryption.

ACHIVEMENTS:

- 2x College Topper
- 2nd Place in DSA Quiz; NPTEL Python – Silver Elite Rank
- Conducted cybersecurity seminars and awareness camps
- Acted as Team Leader in academic and extracurricular projects
