Aditya Dangi

connect.adityadangi@gmail.com / +91 9199993227 / New Delhi, INDIA.

Summary

Summary:
Experienced Go backend developer with 3+ years of expertise in building scalable, high-performance applications. Currently working at Solh App, contributing to backend architecture, API development, and microservices. Proficient in Go Fiber, Gin, RabbitMQ, and real-time data processing. Passionate about designing efficient systems, optimizing performance, and implementing secure solutions. Seeking to leverage skills in backend engineering to drive impactful innovations.

Experience

Backend Engineer

OMLogic • New Delhi, INDIA
06/2022 - Present

- Built and optimized RESTful APIs using **Go Fiber,** serving **10M+** requests per month improving system throughput for seamless user interactions.
- Designed and maintained **microservices architecture**, scaling the system to handle **100K+ monthly active users** with **99.9% uptime**.
- Integrated **RabbitMQ,** enabling **asynchronous processing of 10k+ messages per day**, improving system efficiency and reliability.
- Built and optimized **RESTful APIs**, serving **10M+ API requests per month**, ensuring seamless user interactions.
- Improved database query performance, reducing execution time by **60%** using optimized indexing and caching strategies.
- Implemented a messenger feature using **WebSockets**, handling up to **30k** messages daily.
- Streamlined **CI/CD pipelines**, cutting deployment time by **50%** and increasing release frequency to **weekly deployments**.
- Implemented a **recommendation engine** as a microservice using **BERT** model, leading to a **20%** increase in sales and a **32%** improvement in app retention time.
- Led **performance monitoring and debugging**, identifying and resolving critical bottlenecks, leading to a **25% reduction in server costs**.

Backend Engineer

Dualite • Jaipur, Rajasthan
01/2022 - 04/2022

- Worked on maintaining and extending RESTful APIs for Dualite's video upload and editing workflows, leveraging **Go**, **PostgreSQL**, and **Docker.**
- Created a scalable video-serving solution using **AWS CloudFront** and **S3**, optimizing content delivery for Dualite's dual-perspective videos.

Open source project

Quick Cache Flutter | pub.dev/packages/quick_cache_flutter
Tech Stack: Dart, Hive

- Developed a high-performance, secure caching library for Flutter apps and web platform which is inspired by Redis.
- Designed an easy-to-use API for seamless cache management with **single-line read/write** operations.
- Implemented **Global Expiry Duration** for automatic cache cleanup.

- Added **Active Cleaning** to remove stale cache in the background, improving efficiency.
- Introduced **maxCacheSize** with LFU (Least Frequently Used) policy for optimized storage.
- Published and maintained the package on **pub.dev**, receiving **50 to 200 weekly downloads** and growing.

Skills

- **Programming Languages:** Golang, Dart, Python (basic)
- **Frameworks & Libraries:** Go Fiber, Gin,
- **Databases:** PostgreSQL, MySQL, Redis, Objectbox, Firestore
- **Messaging & Streaming:** RabbitMQ
- **Cloud & DevOps:** Docker,, AWS (EC2, S3, Lambda), CI/CD
- **Testing & Debugging:** Unit Testing, Integration Testing, Benchmarking
- **Version Control:** Git, GitHub, GitLab
- **Other Tools:** Prometheus, Grafana, OpenTelemetry

Education

Btech

Bakhtiyarpur College of Engineering • Patna,Bihar
01/2022
7.75 CGPA
