HIMANSHU JOSHI

SOFTWARE ENGINEER

+91 8146015656 | github.com/himanshu07070 | himanshu07joshi@gmail.com | Lucknow, India

SUMMARY

Software Engineer with 4+ years of experience in backend development, specializing in Golang, Python, Kubernetes, and AWS. Proven track record in designing scalable microservices and APIs, optimizing performance, and reducing costs. Strong leadership and problem-solving skills, adept in Agile methodologies. Proficient in data structures, algorithms, and software design patterns.

WORK EXPERIENCE

AMERICAN EXPRESS
(Contractor) **(Sept 2024 - June 2024)**

Software Engineer - II

- **Integrated and deployed an enterprise-wide ECM** (feature flag and configuration management platform) across all major Golang repositories, utilizing interfaces, structs, and concurrent design patterns to streamline config handling.
- Delivered upgraded versions of core AMEX card features, including enrollment and "Pay with Points," with comprehensive **unit testing**, robust **error handling**, and **versioning** support to ensure smooth rollouts using GoLang.
- Designed and developed a high-performance redemption service from scratch for point reservations and order handling, using Golang **WaitGroups** to manage heavy workloads efficiently

PROXIMA
(March 2024 - Sept 2024)

Software Engineer

- **Led design and development of a forensics solution** to detect and report inappropriate content on user devices, ensuring high accuracy with near-zero false positives.
- **Built anomaly archival pipelines and integrated secure**, structured GCP storage using **concurrent Goroutines** and **mutexes** using GoLang to handle file I/O safely and at scale.

KALIDO
(Aug 2023 - March 2024)

Software Engineer

- **Built and deployed a Chat Receipts Generator** service using **Gin framework of golang** to automate documentation of network request flows and invitation events.
- **Reduced microservice memory usage by 35%** through internal library profiling, cutting operational costs.
- Identified and fixed legacy bugs which improved the overall stability and reliability of our microservice.

SKIDOS
Software Engineer **(July 2021 - July 2023)**

- Built backend for **on-demand video streaming platform**, ensuring smooth video delivery and user experience.
- Developed **Customer Support Dashboard** for 24/7 resolution of subscription issues via user data access.
- Automated multi-language app store uploads and team scaling operations through a **dynamic Admin Dashboard** using **structured Golang components**..
- Migrated infrastructure from self-hosted MongoDB to MongoDB Atlas, improving **reliability**, scalability, and reducing operational overhead.
- Developed A/**B testing framework** used across 80+ SKIDOS games on Android and iOS for content and pricing experiments.

SKILLS

Programming Language:	Golang, Python, Rust, JavaScript
Database:	MySQL, MongoDB, Redis
Tools:	AWS, Kubernetes, Docker, gRPC, WebSockets, Swagger, GitHub

EDUCATION

Lovely Professional University

BACHELOR OF TECHNOLOGY

Computer Science Engineering
(2017 - 2021)
