CHANCHAL VERMA

FULL STACK DEVELOPER | DEVOPS | GO DEVELOPER | CLOUD ENGINEER | SRE

Indore, India | chanchal9.dev@gmail.com | +918770516540 | github.com/ChanchalS7 | linkedin.com/in/chanchals7

PROFESSSIONAL SUMMARY

- Versatile Software Engineer with 4+ years of experience in full stack development, DevOps/DevSecOps practices and cloud-native solutions, specializing in MERN stack, Golang AWS, GCP, K8s.
- Proven experience in building scalable systems, automating workflows and securing cloud infrastructure.
- Skilled in RESTful APIs, microservices and third-party integrations (Shopify, Stripe, Twilio).
- Hands-on experience with AI agent and Generative AI, leveraging machine learning models to enhance system intelligence.
- Passionate about delivering high-impact solutions through cutting-edge technologies, security-first practices and continuous learning.

EMPLOYMENT & EXPERIENCE

StackGuardian

Remote,

Founding software engineer

July2024 – Mar2025

- Working as a founding software engineer, focusing on the development of frontend features for the product, collaborating with UI engineers and cross-functional teams to enhance product functionality based on client feedback.
- Contributed to the SG-SDK platform using Fern with Golang and Node.js, enabling organizations to create custom SDKs for seamless integration.
- Additionally, contributing to backend development by writing APIs using Django, understanding product functionality and orchestration, and developing infrastructure APIs using cloud technologies such as Kubernetes
- Collaborated with the CTO and lead developer to align product development with business goals, ensuring cohesive implementation.

Thor solutions Pvt Ltd

Remote,

Full stack developer and DevOps engineer

Jun2023- June2024

- Developed and enhanced features for client project Haze app using MERN stack and integrated Shopify, Woo-commerce and Etsy for e-commerce solutions.
- Built RESTful APIs from scratch, handling backend development, authentication, and third-party integrations.
- Deployed application on AWS EC2 utilizing S3, DynamoDB, Docker and Kubernetes for scalable and efficient cloud infrastructure.
- Automated CI/CD pipelines using GitHub Actions, reducing deployment time by 30% and improving development workflows.
- Spearheaded a Golang project using Gin framework with SQL db. for a USA-based client, enhancing validation and authentication. Leveraged PostgreSQL for robust database management, ensuring data integrity and security.
- Worked on backend development for iWTNS, a Flutter based Android app, using Golang and the Gin framework.
- Integrated Stripe payment gateway and Twilio for OTP verification and calling features, Auth0 for secure authentication.
- Deployed the backend on AWS EC2 and RDS, ensuring high availability and reliability, implemented CI/CD pipeline using GitHub Actions, automated build, test and deployment processes. Managed containerized application using Docker and orchestrated them with Kubernetes for efficient scaling and resource utilization

Masai School

Remote,

Software Engineer

Oct 2021 – Jun 2023

- Trained and mentored over 200 students in web development using the MERN stack, structuring the curriculum into various units and conducting doubt classes and pair programming sessions to facilitate learning.
- Worked as a software engineer on various projects, leveraging React.js and Node.js under the guidance of senior developers to develop features and enhance learning experiences.
- Participated in code reviews and adopted best practices in software development to enhance team collaboration.
- Engaged in troubleshooting and debugging efforts to ensure smooth operation and functionality of the platforms, contributing to overall team success.
- Collaborated on the development of platforms aimed at improving the learning experience based on student feedback, including job suitability assessments and coding evaluation automation.
- Contributed to the development of learning management systems (LMS), such as Hukumu, and coding platforms (CP) at a junior level, collaborating closely with senior developers to implement features and functionalities.
- Assisted in designing and implementing user interfaces and backend systems using technologies like React.js, Next.js, Node.js, Express.js and SQL databases, gaining hands-on experience in software development.

Freelancer

Indore,

Full stack web developer

Jul 2020– Dec 2022

- Started hands on basic web technologies and built some static website for local vendors using HTML, CSS and UI library.
- Developed backend module from scratch with architecture design and use different network protocols HTTP/HTTPS, TCP, SMTP, UDP, FTP etc. for facilitating efficient communication between networks.
- Collaborated on a health domain project, designed backend microservices using Node.js, Express.js and MySQL.

- Implemented D-Bus architecture for inter-process communication. Used AWS for deployment and RDS service for db. Ensured Contributed to one other AI based project Worked with VectorDB, LangChain, Node.js and MongoDB, deployed on AWS using DynamoDB for data storage.
- Worked on Golang and React.js based application for ecommerce domain called qotodo write backend modules for it using Gin framework and MongoDB database in monolithic architecture.
- Scalability and reliability of the system by implementing AWS serverless architecture and integrating with RDS**.**

EDUCATION & CERTIFICATIONS

SGSITS, Indore July, 2016 – Jun, 2020
Bachelors of Engineering in Information Technology

SKILLS

Languages
HTML, CSS, JavaScript, NodeJS, TypeScript, Golang, Python.

Technologies and Platforms
React.js, Next.js, Redux, Express.js, Gin, Fiber, Django, GraphQL, Kafka, Message queues.
Linux, Ubuntu, Version control system Git, AWS, GCP, GitLab, Docker, Kubernetes, GitHub, GitHub actions, CI/CD pipelines, Jenkins, Terraform, Docker, CI/CD.

DB
MongoDB, MySQL, PostgreSQL, Redis.

Tools and Practices
Agile methodologies, DevOps methodologies, Microservices Architecture, REST API, gRPC, Event driven architecture, Jira, Slack.

AI Skills
Perplexity, ChatGPT, Claude AI, Lovable, Deepseek and Generative AI.

INTEREST

Hands-on learning, Content creation, Mentoring, Open source, technical blogs(https://dev.to/chanchals7)
