Job Description: Senior Full Stack Developer

Location: Mumbai / Hybrid

Employment Type: Full-Time

Experience Level: 7+ years

Job Overview:

We seek an experienced **Senior Full Stack Developer** with a strong technical background in **Front-end and Back-end Development** to build and maintain scalable web applications. The ideal candidate should have expertise in **React, Redux, Node.js (Express or Koa), TypeScript, SQL & NoSQL databases**, and **RESTful APIs**. Experience with **cloud services (AWS/Azure), Microservices Architecture, and CI/CD Pipelines** is highly desirable. You will be key in driving the technical direction, mentoring junior developers, and ensuring the best development practices are followed.

Key Responsibilities:

- Architect, design, develop, and deploy high-performance web applications using **React, Redux, Node.js, and TypeScript**.
- Develop and optimize **RESTful APIs and Microservices** using **Express.js or Koa**.
- Work with **SQL (PostgreSQL) and NoSQL (MongoDB, DynamoDB, Neo4j) databases**, ensuring scalability and performance optimization.
- Ensure **high availability, security, and performance** of applications by following best practices.
- Collaborate with designers, product managers, and DevOps teams to deliver seamless and user-friendly applications.
- Write clean, maintainable, well-documented code following industry standards and best practices.
- Develop and implement **Test automation strategies** using tools like Jest, Mocha, or Cypress.
- Mentor and guided junior developers, conducting **code reviews and technical training sessions**.
- Implement and manage **CI/CD Pipelines** for automated testing, deployment, and monitoring.
- Stay current with the latest trends, tools, and best practices in full-stack development.

Required Skills and Qualifications:

- Bachelor’s or Master’s degree in **Computer Science, Software Engineering, or a related field**.
- 7+ years of experience in **Full-Stack Development** focusing on **React and Node.js**.
- Strong proficiency in **JavaScript, TypeScript, React.js, Redux, and modern front-end technologies**.
- Experience with backend development using **Node.js frameworks such as Express or Koa**.
- Deep understanding of **RESTful API design, Microservices Architecture, and Distributed Systems**.
- Strong knowledge of **SQL (PostgreSQL) and NoSQL (MongoDB, DynamoDB, Neo4j) databases**.
- Experience with **Cloud platforms like AWS, Azure, or Google Cloud**.
- Proficiency in **containerization (Docker, Kubernetes, Rancher)** and serverless computing.
- Hands-on experience with **CI/CD Pipelines, DevOps practices, and Cloud deployment**.
- Strong problem-solving skills, debugging, and troubleshooting expertise.
- Excellent communication and leadership skills with a passion for mentoring junior engineers.

Preferred Skills:

- Experience with **GraphQL** and API gateway technologies such as **Apigee or Kong**.
- Familiarity with **real-time applications, WebSockets, and event-driven architectures**.
- Knowledge of **serverless computing (AWS Lambda, Azure Functions, etc.)**.
- Exposure to **Agile methodologies and tools like JIRA and Confluence**.
- Experience with **performance monitoring tools and logging frameworks**.
