EXPERIENCE

Senior Software Engineer

Tenable INC.

Feb 2022 – Ongoing Pune, India

I was hired as the **second engineering employee** to serve as the **Full Stack Specialist** for the **Tenable India Security Center Team**. I was responsible for driving key **technical initiatives** and leading development efforts within the team. My contributions included **migrating legacy components to GoLang**, enhancing **system scalability** through **microservices**, and ensuring robust **security** through regular updates and **VRB management**. I also played a key role in major **product improvements**, including **data migration**, **real-time notifications**, and **permission-based user linking**.

- Key member in the migration from C to GoLang, helping build **microservices** for improved scalability.
- **Led a team for API Gateway** and **microservice integration**, ensuring **system scalability** with a team of **6 engineers**.
- **Spearheaded data migration from SQLite to PostgreSQL** for improved performance.
- **Developed the bell notification system** under the **innovation sprint** at Tenable, utilizing **WebSockets** for real-time alerts.
- **Led the user-linking feature** with a focus on **permission management**.
- Managed **third-party libraries** and **VRB updates** for **security** and **vulnerability management**.

Senior Software Engineer / Module Lead

Xiaomi India Pvt Ltd

Oct 2019 – Feb 2022 Bangalore, India

Xiaomi India is a subsidiary of the Chinese electronics company Xiaomi, focusing on smartphones and consumer electronics. Contributed to **local.mi.com** project to get the **nearest stores based on the user's current location (Highly revenue generated product in 2020 Pandemic)** and write an **automated script to handle the sales lead pull to move it to the global pool.**

- Enhanced Distributor Management System: Implemented key features like PO cloning and real-time stock sync.
- **Led a team of 4** in the Order Management System and HiPos projects.
- Developed **local.mi.com** for store location services, **generating significant revenue during the 2020 pandemic**.
- Automated notifications, including purchase invoices and surveys.
- Created a loyalty points program for retailers.

Senior Software Engineer
