WORK EXPERIENCE

Xoriant Solutions Private Limited , Pune (Senior Golang Developer)
Apr-2022 Present

FrontDoor Inc.

FrontDoor is a one stop solution for home repair and maintenance of user's most valuable assets.

- Optimized critical APIs, resulting in ~60% reduction in response time for improved user experience.
- Designed and Implemented a high-performance media microservice with the help of Golang to centralize all the media at a single point.
- Implemented a robust audit history storage in MongoDB , enabling efficient tracking , retrieval and management of historical data for improved traceability and compliance.
- Participated in APIs design discussion, request/response formats and error handling strategies.
- Engaged with cross-functional teams to discuss API contracts, versioning strategies and performance optimizations, ensuring seamless integration across services.
- Collaborated on incident resolution through on-call support , utilizing Splunk logs to pinpoint and address issues promptly.
- Deprecated lambda functions and implemented go functions throughout the microservice.

Tata Consultancy Services ,Thane Aug 2019- Apr2022
