SUMMARY

Seasoned software engineer with 7 years of experience building scalable backend systems using Go, microservices, SQL and NOSQL databases. Proficient in containerized technologies like Docker and Kubernetes, with hands-on expertise in cloud platforms (AWS, GCP) and infrastructure as code tools like Terraform.

SKILLS

Languages: Go, Java
APIs: Rest, GraphQL, gRPC
Databases: PostgreSQL, MongoDB, Redis, ElasticSearch
Cloud & DevOps: AWS, GCP, Docker, Kubernetes, GitHub Actions, Terraform
Monitoring & Security: DataDog, Prometheus, Kibana, SonarQube

WORK EXPERIENCE

Zinnia Digital Service LLP [Project: Correspondence] Feb 2024 – Present

- Developed REST APIs with Go, Java Spring Boot, utilizing Camunda for rule-based automation and optimized workflows.
- Migrated microservice written using Java and Camunda to native Java application. Used EasyFlow as a lightweight alternative to Camunda.
- Experienced working with IaC tools like **Terraform**, **CloudFormation Templates**.
- Reduced debugging time by 80% by configuring Datadog logging, alerting, and monitoring dashboards. **With Slack alerts**.
- Designed and maintained CI/CD pipelines using GitHub Actions.
- Led a team of 3 to implement Functional/Non-Functional enhancements while promoting best practices.
- Automated **EC2** deployment using Terraform.

  Tech: Go, GitHub, OpenAPI, Docker, AWS, Datadog, Java, Terraform, Maven

Thales DIS Technology India Pvt Limited [Project: Data Discovery & Classification] March 2023 - Feb 2024

- Built a sensitive data scanning and reporting engine using Go, enabling encryption and classification across enterprise systems.
- Optimized API performance by **88%** using goroutines and profiled bottlenecks with Go profiling tools(pprof)
- Built **CI/CD pipelines** in **GitLab**, enabling **50% faster** deployments.
- Utilized Apache Spark for data pipeline and generating report.
- Implemented centralized logging with **Prometheus** and **Kibana**, improving incident response time by **60%**.

  Tech: Go, Gitlab, Microservices, Redis, Cobra CLI, Docker, Prometheus

Capgemini Technology Services. Project: HPE Nimble (DSCC) Sep 2021 - March 2023

- Designed **REST**, **gRPC**, and **GraphQL** APIs for HPE's Data Services Cloud Console, supporting multiple storage devices like Nimble, Primera, Alletra 6k.
- Reduced API latency by 20% by integrating Elasticsearch and Kafka for real-time data processing.
- Authored Kubernetes deployment manifests and tested locally with Minikube, ensuring 99.9% uptime for services.
- Delivered end-to-end features, from writing unit tests and automation test cases to deployment.
- Resolved critical defects within SLA, leveraging **Humio logs** to cut debugging time by **50%**.

  Tech: Go, Gitlab, Microservices, OpenAPI, GoMock, Testify, Redis, Cobra CLI, Docker, Prometheus

Orange Business Services. [Project: OPTISAM-NG] **Sep 2020 – Sep 2021**

- Built a license computation engine using Go and ODRL policies, achieving 85%+ unit test coverage with SQLC-generated models.
- Accelerated scope deletion by 70% using Go concurrency patterns.
- Designed microservices with **clean architecture**, enabling seamless front-end integration for 10K+ users.
- Created UML diagrams to streamline feature planning, reducing design phase by **15%**.

Tech: Go, AWS, Docker, GitHub, PostgreSQL, OpenAPI

Altran [Project: MEC] **March 2018 – Sept 2020**

- Developed Go APIs for **Azure Blob storage**, enhancing upload/download speeds by 60% with goroutines.
- Implemented malware detection for file uploads, improving security compliance for **50K+** files monthly.
- Containerized **Java Spring Boot microservices** with Docker and Kubernetes, reducing provisioning time by 30%.
- Wrote APIs for OpenStack VM management, supporting CRUD operations for 100+ VMs.

Tech: Go, Docker, Go-Swagger, NOSQL, GoMock, Blob storage

ACADEMIC QUALIFICATION

Master of Computer Applications (MCA): JECRC University, 2017 **8.4 CGPA**

Bachelor of Computer Applications (BCA): CMS, 2015 **88%**
