Professional Summary

- Backend Developer with over 5 years of experience in software development and Object-Oriented Design.
- Proficient in C, C++, Go (Golang), MySQL, MongoDB, and RESTful API development. Proficient in C, GoLang, MySql, MongoDB, REST APIs etc.
- Skilled in designing scalable, maintainable backend architectures and system integration. Excellent writing and oral communication skills.
- Ability to translate business requirements into technical solutions.
- Passionate about implementing and launching new projects.
- Always enthusiastic about taking on new projects and collaborating with clients to deliver impactful solutions.

Skills Profile

Technical

Operating System	Windows, Linux
Environment	Client, Server
Database	MySQL, MongoDB
Internet Tools	HTML, CSS, JavaScript
Primary Skills	Golang, C, Shell Scripting, REST APIs
Secondary Skills	Microservices, Cloud Technology(AWS,IBM), Kafka, Docker, Kubernetes, Azure Cloud, C++

Functional

Management and Leadership Skills	Ability to produce realistic software schedules, Project Management, Strategic/ Tactical Planning, Business Analysis and Development, and New Product Development
Training & Development	Technical ability to Train and Troubleshoot

Professional Experience (In Reverse Chronological Sequence)

Organization Name	**Capgemini**
Client Name	**IBM**
Project Name	**IBM-DRAutomation**
Project Duration	**July/2024 To till date**
Role/Title	**Professional – II (Golang Developer)**
Work Location	**Gurgaon, Haryana**

Project Description	Designed and deployed an end-to-end disaster recovery (DR) automation solution for IBM Power Virtual Servers, enhancing resilience across IBM data centers. Implemented secure, high-performance DR environments using dedicated networks and direct-attached storage. Integrated key IBM Cloud Service Framework components—Service Broker, RMC, and KSYS Orchestrator—to automate DR workflows, enabling seamless failover and failback operations. Optimized high availability (HA) architecture for maximum uptime and minimal disruption during disaster scenarios. Customized VM recovery configurations for flexible orchestration and ensured compliance, security, and robust network connectivity via IBM Cloud infrastructure. Streamlined provisioning, monitoring, and billing processes to improve operational efficiency and reduce manual intervention.
Responsibilities	• Analyzing and Designing swagger documentation for client requirement • Involved in API implementation (GoLang) • Involved in deployment and delivery in a production environment • Worked on IBM Cloud. • Defect fixing.
Operating Systems	**Windows and Linux**
Hardware	**NA**
Software / Special Tools	**REST API, Swagger, Azure Cloud, MongoDB, Docker, Kubernetes, Git, IBM Power VMs , IBM Cloud Services etc.**
Languages	**GoLang**

Organization Name	**Capgemini**
Client Name	**IBM**
Project Name	**IBM-Kendo**
Project Duration	**Sept/2023 To July/2024**
Role/Title	**Professional – II (GoLang Developer)**
Work Location	**Gurgaon, Haryana**
Project Description	IBM Power in Azure is an VM as a Service (Compute, Storage, and Network) offering (IAAS). Customers will be able to provision Virtual machines (VMs) on demand using the offering. With this enablement, user will be able to deploy

	Power Virtual Machine (PowerVM based VM) through Microsoft Azure cloud and thus host workloads such as SAP HANA. The Power Hardware is hosted as POD in Azure Data Centres. Power offering will be available through Marketplace in Azure Cloud environment

Responsibilities	• Analyzing and Designing swagger documentation for client requirement • Involved in API implementation (Golang) • Involved in deployment and delivery in a production environment • Worked on Azure Cloud. • Review code and ensure the coding standards. • R&D on Networking and analyzing the requirements. • Had the sync up meetings with Client time-to-time to review and discuss about the product implementation progress.
Operating Systems	**Windows and Linux**
Hardware	**NA**
Software / Special Tools	**REST API, Swagger, Azure Cloud, MongoDB, Docker, Kubernetes, Git, IBM Power VMs etc**
Languages	**GoLang**

Organization Name	**Capgemini**
Client Name	**Verizon**
Project Name	**Verizon-MEC**
Project Duration	**Oct/2021 To Aug/2023**
Role/Title	**Professional – II (GoLang Developer)**
Work Location	**Gurgaon, Haryana**
Project Description	This project deals with developing a product to provide services for cloud orchestration.

Responsibilities	• Analyzing and Designing swagger documentation for client requirement • Involved in API implementation (GoLang) • Involved in implementation of workflows models using temporal framework • Application containerization and orchestration using Docker and Kubernetes • Involved in writing GoUnits for code quality • Fixing SonarQube,42Crunch, Fortify Quality Inspection Issues • Involved in Integration/Regression Testing • Involved in deployment and delivery in a production environment
Operating Systems	**Windows and Linux**
Hardware	**NA**
Software / Special Tools	**REST API, Swagger, AWS, Temporal, Rafay etc**
Languages	**GoLang**

Organization Name	**Cavisson Systems**
Client Name	**Kohls**
Project Name	**Network Monitoring**
Project Duration (From & To in Month/Year Format)	**Jan/2020 To March/2020**
Role/Title	**Software Engineer (C Developer)**
Work Location	**Gurgaon, Haryana**
Project Description	TcpStatesCountV3 monitor which monitoring the connections states between server and client. Its read the connection states from /proc filesystem periodically which is updated by kernel.
Responsibilities	• Analysis of the requirement provided by the client. • Involved in design and functionality Implementation. • Involved in Integration/Regression Testing. • Involved in deployment and delivery in a production environment.
Operating Systems	**Linux**
Hardware	**NA**
Software / Special Tools	**NA**
Languages	**C**

Organization Name	**Cavisson System**
Client Name	**Macy's**
Project Name	**Synthetic Monitoring**
Project Duration (From & To in Month/Year Format)	**Sept/2020 To Dec/2020**
Role/Title	**Software Engineer (C Developer)**
Work Location	**Noida, (U.P)**
Project Description	Synthetic monitoring (also known as active monitoring) is website monitoring that is done using a Web browser emulation or scripted recordings of Web transactions. Behavioral scripts (or paths) are created to simulate an action or path that a customer or end-user would take on a site.
Responsibilities	• Analysis of the requirement provided by the client. • Involved in Functionality Development • Involved in Integration/Regression Testing • Involved in deployment and delivery in a production environment
Operating Systems	**Linux and Windows**
Hardware	**NA**
Software / Special Tools	**Shell Scripting, HashMap, Bit Magic, Memory Pool**
Languages	**C**

Organization Name	Cavisson Systems
Client Name	**Kohls, Macy's**
ProductName	**Netstorm, Netchannel, Cmon etc**
Project Duration (From & To in Month/Year Format)	**Oct/2019 To Sept/2021**
Role/Title	**Software Engineer (C Developer)**
Work Location	**Gurgaon, Haryana**
Project Description	Monitors are the module of Netstorm to check the actual health of the server on which the application is running.
Responsibilities	• Analysis of the requirement provided by the client. • Involved in Integration/Regression Testing • Involved in deployment and delivery in a production environment • Done lots of enhancements like add functionality to enhance the Netstorm product.

	• Conducted root cause analysis and resolved critical production issues, reducing bug backlog and improving release quality.
	• Feature code development using C, Shell Scripting (Linux). • Bug Fixes
Operating Systems	**Linux,**
Hardware	**NA**
Software / Special Tools	**NA**
Languages	**C, Shell Scripting, HashMap, Memory Pools, Bit Magic etc**

Certifications

- Participant Machine Learning Workshop Machine learning Workshop conducted by Software Incubator at AKGEC.
- Completed Certification Course for Deep and Dive in C++ from Udemy.
- Kubernetes for the Absolute Beginners, Udemy – 2024
- C++ Programming Course, Udemy – 2024
- Go (Golang) Certification, Hacker Rank – Mar 2025

Education

Educational Record (In Reverse Chronological Order Starting Highest Degree)				
Course of Study	***Specialization***	***Name of University***	***Address of University***	***Year of Completion***
Bachelor of Technology	Information Technology	Dr. A.P.J Abdul Kalam Technical University(Lucknow)	Vistar Yojna, AKTU CDRI Rd, Naya Khera, Jankipuram, Lucknow, Uttar Pradesh 226031	2019
12th	Science	Central board of secondary education(CBSE)	Vidya Bal Bhawan Sr. Sec. School(Delhi)	2015
10th	General	Central board of secondary education(CBSE)	Vidya Bal Bhawan Sr. Sec. School(Delhi)	2013
