SUSHIL S BHILE

SENIOR SOFTWARE ENGINEER

Pune, India 411045 ♦ 8378007899 ♦ sushilmaxbhile@gmail.com
♦ https://www.linkedin.com/in/sushilmaxbhile/ ♦ https://github.com/SushilSanjayBhile

PROFESSIONAL SUMMARY

6 years of experience with **Kubernetes** and **Golang**. **CKA** and **CKAD** certified. Built **multi-cluster platforms and microservices** for enterprise-scale systems. Developed **infrastructure and management workflows using Kubernetes Operators**, **CloudFormation**, and **Helm**. Strong focus on **system reliability**, **performance optimization**, and reducing operational overhead through **scalable architectures**. Collaborative **team player, mentoring peers** and aiming for engineering leadership through **technical ownership and team enablement**.

CERTIFICATIONS

- Certified Kubernetes Application Developer (CKAD):- Cert No: LF-qn238zkr24
- Certified Kubernetes Administrator (CKA): Cert no: LF-9wmq0buzq2
- Few other certifications (Credly verified): https://www.credly.com/users/sushil-bhile/

SKILLS

Programming Language: Golang, C, Python, Bash scripting, Python-DRF
System Design: Microservices, Distributed Systems, REST API
Cloud & Infrastructure: Kubernetes, Openshift, Kubernetes Operators, Helm, AWS (VPC, EKS, EC2, S3, IAM)
Monitoring & Observability: Prometheus, Thanos, cAdvisor, Node Exporter
Tools & Methodologies: Git, Gitlab, Linux, Agile Methodology, Postman, Jira, Jenkins
Databases: MongoDB, Postgres, Prometheus

WORK EXPERIENCE

DIAMANTI

Pune, India
Senior Software Engineer, 06/2019 - Current

1) Spektra (Multi-Cluster Management):

Tech Stack: Golang, Shell/Python scripting, Kubernetes, Kubernetes Operator SDK, Cluster API, Prometheus, Thanos, Collectd, cadvisor, node exporter

- **Reduced** upgrade time by **80%** by developing a **Kubernetes Operator** for lifecycle management and auto-recovery of multi cluster management control plane (Golang, Operator SDK).
- **Led upgrade support for Kubernetes** in Spektra v1.23–v1.32; updated Go code, replaced deprecated APIs, and modernized vendored packages.
- **Built a metrics pipeline** comprising 7+ components with Prometheus and Thanos. Introduced several RESTful APIs to process data of cluster-wide resources; **improved observability** by **30%**.
- **Redesigned** the metrics architecture using a **sidecar-based push model**, resulting in **50% improvement** in data collection performance.
- Contributed in design and development of features like **App Catalog, App Discovery and Metrics enhancement.**

2) Ultima Accelerator and Ultima Enterprise:

Tech Stack: Golang, Python, Kubernetes, Kubevirt, Openshift, Linux, Bash

- Delivered key features such as **SNMP support, VM live migration using KubeVirt, and metrics collection** enhancements for customer deployments and all kubernetes objects.
- Owned and executed **K8s upgrade cycles from v1.29 to v1.32.5+**, including module tidy, CRD refactoring, and dependency vendoring across services.
- **Reduced container image vulnerabilities** from 25,000+ to fewer than 2,000 by updating base images and patching critical packages, significantly improving the product's security posture in line with NERC CIP standards and reducing overall risk factors by 40%.

3) Release Management Portal:

Tech Stack: Django REST Framework (DRF), Docker, Kubernetes

Solely designed and implemented the backend of an internal portal **handling regression coverage data** across 25+ product releases, storing **millions of test case records** with daily updates of 1000s of records. Built for horizontal scalability via microservices.

4) Deployment of Hashicorp Vault on AWS cloud:

Tech Stack: AWS, Vault, VPC, Subnets, KMS, Auto scaling group, etc

Designed and deployed **high-availability HashiCorp Vault setup across AWS** with public-private VPCs, EC2 (auto-scaling), RDS, ALB, and KMS. Automated unsealing and networking via custom scripts and 500+ lines of CloudFormation templates for consistent and secure IaC-based provisioning.

CORIOLIS TECHNOLOGIES Pune, India
Intern, 06/2018 - 12/2018

Tech Stack: Python, Python-DRF, Mongodb, Machine Learning

- Developed a **license plate recognition system** using classical machine learning techniques for real-time number plate extraction and classification.
- Created SmartMed – a prototype platform for patient medical history storage, developed prior to India's ABHA initiative, and aligned with its core concepts to enable seamless data access across providers.
- Mentored 4 Chennai Mathematical Institute interns in development, deployment and maintenance of their project's of backend using flask framework.

EDUCATION

Master of Computer Application, 06/2016 - 06/2019
PUCSD, Savitribai Phule Pune University - Ganeshkhind, Pune

Bachelor of Science: Computer Science, 06/2013 - 06/2016
Vidya Pratishthan's ASC College - Baramati, Pune
