Professional Summary

Software Engineer with strong foundations in **Golang** for building high-performance systems and hands-on experience in **full-stack MERN development**. Passionate about building scalable, real-world applications and contributing clean, impactful code in distributed systems environments. Actively exploring **blockchain technologies** with exposure to smart contracts and decentralized applications.

Education

B.Tech – Computer Science
MGM College of Engineering & Technology, Noida, Uttar Pradesh
• Expected Graduation: **June 2025** • Aggregate: **75%**

Technical Skills

- **Languages**: Golang, Java, Python, C
- **Web / Frameworks**: HTML5, CSS3, JavaScript, React.js, Node.js, Express.js
- **Databases**: MongoDB, SQL, PostgreSQL
- **Dev Tools & Platforms**: Git, VS Code, AWS (EC2, S3, CloudWatch), PM2
- **Blockchain Infrastructure**: Ethereum, Polkadot, Solana, Hyperledger Fabric, PoS/PoW, Consensus Mechanisms
- **Smart Contracts & DApps**: Solidity, Rust, Web3.js, OpenZeppelin, Truffle, Decentralized Identity
- **Distributed Systems & Performance**: Scalable Systems, Low-latency Design, Fault Tolerance
- **Operating Systems**: Windows, Linux
- **Concepts**: Data Structures & Algorithms, OOP, DBMS, Operating Systems

---

Work Experience

Techcospace Technologies – *Full Stack Developer*

📍 *Jan 2025 – Present*

- Developed and maintained scalable **MERN-based** applications for internal tools and client-facing dashboards.
- Integrated third-party APIs and optimized backend performance using **Node.js, Express.js**, and **PostgreSQL**.
- Led deployment and monitoring using **AWS EC2, S3, CloudWatch**, ensuring **99.9% uptime**.

- Collaborated with UI/UX teams to enhance usability, reducing bounce rate by **20%**.
- Implemented **role-based access control** and **JWT authentication** for enhanced application security.

Trackers Solutions – *Web Developer*

📍 *Apr 2024 – Dec 2024*

- Designed and built responsive UIs using **HTML, CSS, JavaScript**.
- Created reusable **React.js components** and maintained a modular frontend codebase.
- Collaborated with backend teams to integrate **RESTful APIs** for real-time tracking features.
- Participated in **Agile** ceremonies and code reviews to ensure iterative development.
- Improved page load speed by **35%** through lazy loading and frontend optimization.

Project Experience

InjazRent – *Full-Stack Developer* | [injaz.ae]

- Launched a UAE-focused car rental platform enabling real-time search, booking, and payments.
- Developed **React.js frontend** and **Node.js/Express.js APIs** with secure MongoDB integration.
- Implemented secure user authentication and optimized schema designs.
- **Result**: Improved booking efficiency and increased online transactions by **10%+**.

LogicRent – *Full-Stack Developer* | [logicrent.ae]

- Delivered a full rental platform with **Stripe payment** and **JWT-based authentication**.
- Deployed via **AWS EC2, S3** with **PM2** and **CloudWatch** for zero-downtime updates.
- Built admin dashboard for vehicle tracking, pricing controls, and analytics.

Decentralized Certification Network – *Blockchain Engineer*

- Built a **Hyperledger Fabric** network for issuing/verifying tamper-proof certificates.
- Designed **Node.js APIs** and **React.js** portals for issuers, verifiers, and students.
- Applied **role-based permissions** and scalability for multi-institution usage.

Relevant Coursework

Data Structures & Algorithms | Object-Oriented Programming | Database Management Systems | Operating Systems

Achievements

- Received a **tablet** for securing the highest marks in the **2019 high school batch**.
- **First Prize**, Project Competition – College Technical Fest.

Extra-Curricular Activities

Active participant and volunteer in **college technical fests** and **hackathons**, contributing to event organization and coding challenges.
