Shifa

Professional Summary

Frontend-focused Software Engineer with strong proficiency in **React.js** and modern JavaScript (ES6+), experienced in building responsive, dynamic, and user-centric web applications. Skilled in developing scalable UI components, optimizing frontend performance, and integrating RESTful APIs. Solid foundation in full-stack development using the **MERN stack**, with additional backend experience in Node.js and Python. Passionate about crafting clean, maintainable code and delivering seamless user experiences. Actively exploring advancements in frontend tooling and web performance optimization.

Technical Skills

Languages & Web: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend: React.js, Redux, Next.js, Tailwind CSS, REST APIs
Tools: Git, VS Code, Webpack, Babel, Chrome DevTools
Testing: Jest, React Testing Library
Deployment: Vercel, Netlify, AWS (S3, EC2)
Basic Backend & DB: Node.js, Express.js, MongoDB, PostgreSQL
Concepts: SPA, State Management, Responsive Design, Component Architecture

---

Project

InjazRent – *Full-Stack Developer* | [injaz.ae]

- Launched a UAE-focused car rental platform enabling real-time search, booking, and payments.
- Developed **React.js frontend** and **Node.js/Express.js APIs** with secure MongoDB integration.
- Implemented secure user authentication and optimized schema designs.
- Result: Improved booking efficiency and increased online transactions by **10%+**.

Job Application Tracker Web App

Tech Stack: React.js, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, Vercel.

- Designed and implemented dynamic UI using React and Tailwind CSS, with smooth navigation using React Router.
- Managed global state with Redux Toolkit to handle user authentication, application status, and dashboard data.
- Integrated a RESTful API for CRUD operations with a Node.js + MongoDB backend.
- Deployed the frontend on Vercel and backend on Render, enabling full-stack functionality with live updates.
- Features include job filtering, status tracking (applied, interview, offer), and analytics

dashboard.

LogicRent – ***Full-Stack Developer*** **|** **[logicrent.ae]**

- Delivered a full rental platform with **Stripe payment** and **JWT-based authentication**.
- Deployed via **AWS EC2, S3** with **PM2** and **CloudWatch** for zero-downtime updates.
- Built admin dashboard for vehicle tracking, pricing controls, and analytics.

Personal Finance Dashboard

Tech Stack**:** React.js, Recharts, Context API, Tailwind CSS, Chart.js, Firebase

- Designed a responsive and interactive dashboard to help users manage budgets, expenses, and savings goals.
- Built dynamic data visualizations (bar, pie, and line charts) using Chart.js and Recharts.
- Used Firebase for real-time authentication and database storage of financial data.
- Implemented category-based filtering, recurring expenses, and monthly analytics breakdowns.
- Helped users gain insights into their spending habits, with a clean and intuitive UI optimized for both mobile and desktop

---

Real-Time Chat App

Tech Stack**:** React.js, Socket.IO, Node.js, Express.js, Tailwind CSS, MongoDB

- Built a real-time messaging platform with React frontend and WebSocket communication via Socket.IO.
- Implemented features like online presence indicators, typing notifications, and message delivery receipts.
- Used JWT for secure authentication and stored chat histories in MongoDB.
- Included group chat support, custom avatars, and message timestamps.
  Result: Provided a seamless messaging experience similar to Slack, supporting 100+ concurrent users with minimal latency.

Decentralized Certification Network – ***Blockchain Engineer***

- Built a **Hyperledger Fabric** network for issuing/verifying tamper-proof certificates.
- Designed **Node.js APIs** and **React.js** portals for issuers, verifiers, and students.
- Applied **role-based permissions** and scalability for multi-institution usage.

Extra-Curricular Activities

Active participant and volunteer in **college technical fests** and **hackathons**, contributing to event organization and coding challenges.
