Objective

To work in a challenging and responsible position where my professional skills contribute to organizational growth, while continuously upgrading myself with evolving technologies.

Summary

- 10+ years of experience in backend development, microservices architecture, Kubernetes controller development, and test automation.
- Expertise in REST API development, Golang microservices, Kafka, MongoDB, Redis, and Elasticsearch.

-
- Experience in TDD approach for backend services.
- Developed CLI tools using COBRA framework in Go.
- Designed and implemented custom Kubernetes controllers and OpenShift Operators.
- Infrastructure automation using Ansible.
- Hands-on with Docker, Kubernetes, OpenShift, and CI/CD pipelines.
- Involved in HTTP caching using Varnish and deployment using Helm charts.
- Proficient in Java,python, MySQL, Oracle, and automation tools like Selenium, Protractor, and JMeter.

Technical Skills

Category	Tools & Technologies
Backend Development	Golang,Python, Core Java, REST API, Microservices
DevOps & CI/CD	Kubernetes, Docker, OpenShift, Jenkins, Helm, Ansible, GoCD
Caching & Messaging	Varnish Cache, Kafka, Redis
Databases	MongoDB, MySQL, Oracle, Elasticsearch
Testing Tools	Selenium WebDriver, JMeter, TestNG, JUnit, Protractor

Monitoring	Grafana, Jaeger
Scripting/CLI	COBRA (Golang), Python
IDE	Eclipse, Visual Studio
OS	Windows, Linux, Mac

Professional Experience

Senior Developer – IDFC First Bank
May 2022 – Present

- Developed Master data hub to save the entire bank static data in the form of masters.

- Worked on data observability extending data lineage open source tool.

- Integrated and customized DataHub for metadata ingestion and data lineage visualization across Kafka, MongoDB, and Aerospike.

- Developed and maintained microservices for fraud detection and bulk payment processing.
- Integrated Elasticsearch for dynamic search functionality.
- Implemented asynchronous communication using Kafka.
- Developed HTTP caching with Varnish to optimize response times for heavy API traffic.
- Created and deployed Helm charts for seamless Kubernetes service deployment.
- Built and maintained REST APIs using Golang.
- Implemented circuit breaker patterns and robust testing strategies (unit + integration tests).

Technical Leader – Aricent
Dec 2016 – May 2022

Project: IBM HPO

- Developed REST APIs in Golang to interface IBM Spectrum Scale and S3-compatible storage.
- Built infrastructure as code using Ansible.
- Designed and deployed services on Kubernetes, Docker, and OpenShift.
- Developed CLI tools using COBRA Framework in Golang.
- Contributed to the development of an OpenShift Operator.

Project: IBM Control Center Director

- Developed CLI installer tools in Core Java.
- Automated installation using Python scripts.
- Implemented CI/CD pipelines and fixed bugs in legacy Java codebase.

Senior Software Engineer – Looksmart.com

2 years 5 months

- Performed manual and automated testing of complex web applications and APIs.
- Conducted performance testing for ad serving platforms.
- Created page object models using Selenium and integrated with Jenkins CI.
- Executed and maintained test cases for various scenarios including UI and regression.
