Objective

To secure a challenging position as a Backend Engineer that allows me to utilize my technical skills and experience to contribute to the growth of the organization.

Summary

Experienced Backend Engineer with expertise in Golang and Python. Proficient in designing scalable microservices, RESTful APIs, and robust backend architectures. Skilled in cloud deployment (AWS), DevOps practices, and cross-functional collaboration. Passionate about delivering efficient, reliable, and impactful software solutions.

Technical Skills

- **Programming Languages**: Golang, Python
- **Frameworks & Libraries**:
  - **Golang**: go-gin, echo, Gorm, Kubernetes-client, GRPC,Opentelemetry
  - **Python**: Django, Django Rest Framework, Django Channels, Celery, numpy, pandas, matplotlib, sklearn, BeautifulSoup, sshtunnel,Paramiko,Opentelemetry
- **Database Management**: MySQL, PostgreSQL
- **Frontend Technologies**: HTML, CSS, JavaScript, jQuery, Bootstrap
- **Deployment & DevOps**: Docker,docker compose, Docker Swarm, GitLab-runner, CI/CD, Nginx, Linux, AWS
- **Cloud Platforms**: AWS (EC2, S3, Lambda, Elastic IP), Linode
- **Tools & Version Control**: Git, GitHub, Gitlab-runner, Swagger, Postman, Confluence, Jira
- **Queue Massage** : Kafka , celery,

Work Experience

Senior Software Engineer

Ksolve (December 2023 – Present)

- Developed web applications and microservices using Golang and Python for banking and fintech clients.
- Designed and optimized RESTful APIs to enhance system performance and user experience.

- Collaborated with product managers and engineers to implement new features and resolve performance issues.
- Ensured compliance with strict industry standards and regulations in banking.

Technical Support Engineer

Digitral Innovation Drive (IMI Mobile) (June 2022 – December 2023)

- Built scalable web applications and microservices using Golang and Python.
- Implemented distributed microservices architecture to handle high user volumes.
- Utilized message queues like Kafka and Redis for asynchronous communication.
- Set up CI/CD pipelines using GitLab-runner for efficient deployments.
- Designed and implemented monitoring systems with Jaeger and Prometheus.

Technical Support Intern

Digitral Innovation Drive (IMI Mobile) (September 2021 – May 2022)

- Automated repetitive tasks with Python and Golang scripts.
- Developed data processing pipelines and optimized database queries.
- Supported internal teams by resolving technical issues with developed tools.

Education

- **Bachelor's in Computer Science Engineering** – RD Engineering College, AKTU University (2018-2022)
- **12th Grade** – J.K.G International School (2016-2017)
- **10th Grade** – RSKV School (2015-2016)
