Built and maintained backend services using PHP, Mysql, node js and golang.

Amiga Informatics Pvt. Ltd

26 Oct 2015 to 30 Aug 2016

Sr. PHP DEVELOPER

Built and maintained websites and web applications using PHP, mysql, and Javascript.

Supra India Tech Pvt. Ltd.

9 Jan 2012 to 23 Oct 2015

PHP Programmer

Built and maintained websites and web applications using PHP, mysql, and Javascript.

PROJECTS

Campaign & Messaging [Backend Services]

21 Sep 2020 to Till Date

1. MySQL to MongoDB Near Real-Time Sync (POC – Kafka + Golang)

- Developed a Proof of Concept (PoC) for near real-time data synchronization from MySQL to MongoDB.
- Utilized Debezium MySQL Kafka Connector (in standalone mode) to capture binlog (CDC) events and stream them to Kafka topics.
- Built a Golang Kafka consumer (using Segmentio client) to consume events and apply corresponding inserts/updates/deletes to MongoDB.

Created using Resumonk - Online Resume Builder

2. Automated Job Boost System

- Designed and implemented a multi-stage, high-throughput system to automate job promotion campaigns.
- Developed a batch service to send job requests to AWS SQS every 2 minutes, and a consumer to generate promotion campaigns.
- Built batch processors and consumers to handle campaign workflows at scale, including filtering and queuing eligible candidates.
- Implemented a candidate enqueue consumer to process queued candidates and trigger the campaign delivery API.

3. Capturing Email & Message Callback Events

- Engineered a system to capture email and messaging callback events from SparkPost, Iterable, and Twilio.
- Subscribed an SQS queue to an AWS SNS topic (where email events were pushed by external teams).
- Configured AWS Lambda to trigger on new SQS messages and forward events to an internal Event Capture API for processing.

Responsibilities

Designed, developed, and maintained scalable backend services using Go.
Collaborated with cross-functional teams to deliver end-to-end product features.
Integrated with cloud services (AWS) and message queues (Kafka, SQS) to build event-driven systems.
Ensured code quality through testing, documentation, and code reviews.

Technologies: Golang, Mysql, AWS SQS, AWS SNS, AWS Lambda, MongoDB, KAFKA, Debezium MySQL Kafka Connector, Sparkpost, Iterable, twillio, data dog, newRelic

Enrollment (Religare Health Insurance)

01 Sep 2016 to 30 Jun 2020
