NAYAN KUMAR BHAKAT

CONTACT

Jamshedpur, India

+91-9875027178

krnayan59@gmail.com

SKILLS

- **Languages:** Golang (primary), Java (secondary)
- **Frameworks & Tools:** Echo (Go), Spring Boot (Java), Kafka
- **Architecture:** Microservices, System Design, Design Patterns
- **APIs:** REST, GraphQL, gRPC, Webhooks, WebSockets
- **Databases:** PostgreSQL, MongoDB, Redis
- **Cloud & DevOps:** AWS, Docker, Kubernetes
- **Monitoring:** Prometheus, Grafana
- **Logging & Profiling:** Elasticsearch, Kibana, Zap, Logrus, pprof, Go tool trace
- **Version Control:** Git (GitHub, Bitbucket)

CERTIFICATIONS

- **CodeChef**: Foundation Certificate in Data Structures & Algorithms
- **Udemy**: The Complete MongoDB Course, Git Guide

LinkedIn: https://www.linkedin.com/in/nayanbhakat
Golang Backend Developer II with 3.5 years of experience, exclusively in **product-based startups** and **unicorns**.

EDUCATION

May 2021
Bachelor of Technology (Computer Science & Engineering) | CGPA - 8.58/10
Lovely Professional University, Jalandhar, India

March 2016
Higher Secondary (PCM) | Percentage - 91.80%
Vivek Vidyalaya (CBSE), Jamshedpur, India

March 2014
Secondary | CGPA - 9.6/10
Vivek Vidyalaya (CBSE), Jamshedpur, India

WORK EXPERIENCE

December 2023 - November 2024
Backend Developer II ***EProcurement Technologies Ltd***, Ahmedabad, India

- **Website:** https://www.procuretiger.com
- Developed and optimized **Go** and **Spring Boot** microservices for mission-critical **Admin**, **e-Tender**, and **e-Auction** modules in ProcureTiger — a leading **SaaS-based procurement platform**
- Resolved high-priority production incidents for major clients including **SBI**, **ICICI**, and **JK Bank**, safeguarding **₹19.5 Cr+** (≈ $2.3 million USD) worth of real-time auction and tender data
- Refactored **TATA** dashboard microservice with async loading & indexing, reducing latency by ~50%
- Guided teams in building SQL Server **stored procedures**, custom reporting queries and fixing complex SQL logic

- **Coding Ninjas**: Competitive Programming
- **Coursera**: Excel Skills for Business Essentials

LANGUAGES

English

Hindi

Bengali

INTERESTS

- Trading
- Data Analysis

- Provided **client support** via AnyDesk to ensure uninterrupted service during live auctions and tenders
- **Led a 2-member incident response team**, executing production hotfixes under pressure and conducting knowledge transfer (KT) sessions to upskill peers and enhance team readiness

August 2021 - January 2023

Backend Developer I *LeadSquared*, Bengaluru, India

- **Website:** https://www.leadsquared.com
- Designed and deployed **Go** microservices for a multi-tenant, **data-intensive** reporting platform supporting near real-time analytics and dashboards using **Redis**, **MongoDB**, and **ClickHouse — SaaS product**
- Built low-latency **ETL pipelines** using goroutines, channels, and **Kafka** — consumed **10M+** records from a MySQL replica every 15 minutes and ingested them into **ClickHouse** via **Kafka** for near real-time analytics
- Improved report performance by **60%** through **Redis caching** and ClickHouse **query optimization**
- Collaborated with **cross-functional** teams in Agile sprints, using **JIRA** for task tracking and continuous delivery
- **Mentored interns**, enforcing microservice standards, Git workflows, and API versioning best practices

August 2020 - August 2021

Backend Developer I (Internship) *MAQ Software*, Hyderabad, India

- **Website:** https://www.maqsoftware.com
- Developed scalable backend **REST APIs** and integrated them with enterprise reporting systems
- Built **Power BI** dashboards using Azure SQL and Excel and improved performance by ~9% through query optimization
- Ensured data accuracy with T-SQL, **SQL Server**, and Pivot Tables and collaborated with **Microsoft** stakeholders to enhance dashboard UX/UI
- Improved **code quality** via unit tests, peer reviews, and Git workflows
- Streamlined **delivery** through CI tools and version control for faster and more reliable releases

PERSONAL PROJECTS

E-commerce Microservices (Jan 2025 - Present):

- Built Go microservices for user, product, and order modules using **GraphQL**/**gRPC APIs**, secured with **JWT** authentication
- Used **PostgreSQL** and **MongoDB** based on module-specific access patterns and data modeling needs
- Deployed services via **separate Docker Compose files** with a shared external network for inter-service communication on **AWS EC2**
- Managed Git/GitHub workflows using **semantic versioning** and implemented rollback-ready CI/CD pipelines

Webhook + WebSocket Notification System (Aug 2025):

- Built a **webhook processing system** in Go using **Redis** for queuing and **DLQ** for failure handling
- Integrated **Redis Pub/Sub** with **WebSocket** to broadcast real-time updates to connected browser clients
- Followed clean Go architecture with **modular structure** (cmd, pkg, internal) and idiomatic best practices

Concurrent Word Counter (May 2025):

- Built a high-performance Go word counter using goroutines, unbuffered channels, worker pools, and mutexes for safe **parallelism**
- Integrated structured **JSON logging** with function-level **tracing** and **pprof** (CPU, memory, goroutine, mutex, block) for in-depth profiling
- Ensured resilience with **panic recovery** and ELK-stack-ready **observability** for production use

MOMENT OF APPRECIATION

- Recognized by **leadership** (2020–2024) for backend ownership, root cause analysis, and on-time delivery
- Received Letters of **Recommendation** and **Appreciation** for impactful social work in NGOs (Feb–May 2023)
- Ranked **1st** at **LPU** in a CodeChef Div 2 live coding contest and **2nd** in a group technical quiz (2017–2021)
- **Batch Topper** – Higher Secondary (Class 12, 2016)
