

Sneha Chavan
Software Test Engineer|Selenium Webdriver |Python |CICD|C# |API

Professional Summary

To associate with an Organization which dynamically gives me chance to improve my Knowledge, upgrade my skills and could take part in the growth of the Organization.

Detail-oriented QA Automation Engineer with **4+ years of experience** in designing, developing, and maintaining automation frameworks. Skilled in **C# (.NET Framework 4.8), Selenium WebDriver, Python scripting, and JavaScript-based testing**. Adept at creating scalable automation solutions, regression test suites, and CI/CD pipeline integrations. Strong collaborator with cross-functional teams, excellent communicator, and proven ability to deliver high-quality testing in remote, distributed environments aligned to PST time zones. Proficiency in **Python** for scripting and test development, along with working knowledge of **JavaScript** for web-based testing scenarios,with solid understanding of **automation testing methodologies, regression testing, test case design, and defect management**. Preferred skills include exposure to **Playwright**, familiarity with **.NET 9**, experience in **CI/CD pipeline integration**, and **API testing** for RESTful services.

Core Skills

Programming: C# (strong), Python (automation scripting), JavaScript (test scenarios)
Automation Tools & Frameworks: Selenium WebDriver, Playwright, NUnit, PyTest
Testing Expertise: Regression testing, automation testing, test case design, defect management
CI/CD & DevOps: Jenkins, Azure DevOps, GitHub Actions
API Testing: RESTful API testing with Postman & Python scripts
Platforms: .NET Framework 4.8, .NET 9 (familiarity), Windows/Linux environments
Collaboration Tools: Jira, Confluence, Git, Slack, Teams

Project Implemented-1

- **Project name : Scotia Strategic ETF Portfolio**
- **Testing Methodology :** Automation,API Testing and Functional Testing .

Roles and Responsibilities

1. Designed, implemented, and maintained scalable automation frameworks using C# and Selenium WebDriver for large-scale enterprise web applications.
2. Enhanced reporting by integrating Extent Reports/Allure Reports into automation frameworks, improving visibility for stakeholders,Documented test strategies, bug reports.
3. Actively participated in Agile ceremonies (sprint planning, daily standups, retrospectives) and contributed to defining acceptance criteria,automation guidelines.
4. Reduced manual regression testing effort by 50% through automation adoption across core modules.
5. Supported release readiness validation by executing automation suites in staging/pre-production environments.

Project Implemented-2

- **Project name : Client Connectivity (CC)**
- **Testing Methodology :** Automation,API Testing and Database Testing .

Roles and Responsibilities

1. Built and maintained end-to-end test automation scripts for complex web applications using Selenium (C#) and JavaScript.
2. Designed and executed smoke, sanity, and regression test suites, ensuring faster validation of sprint deliverables.
3. Implemented Playwright-based cross-browser automation to validate modern browser compatibility and responsive UI.
4. Created data-driven and keyword-driven test cases, enhancing coverage across multiple business workflows.
5. Conducted API testing and automation using Python scripts and Postman collections, validating REST endpoints for performance and reliability.
6. Collaborated closely with developers to debug, analyze logs, and reproduce issues, improving turnaround time on defect fixes.

Project Implemented-3

- **Project name : Titlegeneous (TG)**
- **Testing Methodology :** Automation,API Testing and Database Testing .

Roles and Responsibilities

1. Designed a data-driven automation framework from scratch for a large e-commerce platform.
2. Automated critical user flows including login, product search, cart, checkout, and payment.
3. Integrated framework with Jenkins CI/CD for nightly regression execution and reporting.
4. Achieved a 40% reduction in manual regression cycle time.
5. API Testing & Automation Suite (Python + REST Assured + Postman)
6. Built an API automation suite for validating RESTful services used in a financial services application.
7. Implemented request/response validation, schema validation, and performance assertions.
8. Automated test execution as part of CI/CD pipeline, improving defect detection in integration environments.
9. Ensured secure and reliable APIs by testing authentication, authorization, and error handling.

Work Experience

1. **Entrata India -** Software Test Engineer [Mar 2020 to July 2022]
2. **Vassutech PVT Ltd -** Software Test Engineer [Aug 2022 to June 2025]

Education

1 **Master of Engineering**
Sant Gadge Baba Amaravati university, Amaravati, Maharashtra

2 **Bachelor of Engineering**
PRMIT&R, Amaravati, Maharashtra.
