Blockchain Developer || Developer Relations Engineer
Hyperledger Fabric Certified Practitioner || AI Automation Engineer

SUMMARY

Passionate blockchain developer with hands-on experience in public and permissioned blockchains, including Hyperledger Fabric, EVM chains and Stellar.

Skilled in designing and implementing automated workflows and processes to improve efficiency and reduce manual effort.

Proven ability to host workshops, hackathons, webinars, and in-person events to educate and empower the developer community.

Active member of the CFT team, responsible for evaluating project proposals from partners, providing grants, assessing completed projects, ensuring milestone follow-ups, and offering support to the partner developer community.

As a Certified Cryptocurrency Auditor, ensuring compliance, security, and best practices in blockchain projects and audits.

SKILLS

- Golang
- API
- Hyperledger Fabric
- Cryptocurrency Auditor
- n8n
- Automation
- Partner Technical Support
- Community Engagement

WORK EXPERIENCE

Developer Relations & AI Automation Engineer , 2024 - Present , Block Stack , Bengaluru

- Spearheaded developer engagement by hosting 15+ online and offline workshops and webinars, reaching over 1,000 developers.
- Represented the organization as a speaker at industry-leading blockchain events, including the India Blockchain Tour, to share insights and foster collaborations.
- Successfully evaluated 100+ project proposals, awarded grants worth $500,000, and facilitated the launch of 60+ innovative decentralized applications.
- Designed and implemented automated workflows using n8n to streamline tech queries, reducing resolution time by 50%.
- Provided technical guidance and support to the partner developer community, assisting with troubleshooting and integration.
- Ensured compliance and security of blockchain projects by leveraging expertise as a Certified Cryptocurrency Auditor.

Blockchain Developer, 2021- Present , Block Stack , Bengaluru , India

- Developed smart contracts and implemented tokenization solutions for various blockchain- based projects. Experienced in NFT (Non-Fungible Token) minting and asset creation using blockchain.
- Developed and deployed a decentralized non-custodial wallet and browser extension, supporting 3 major blockchains (Stellar, EVM, and TRON), used by 1M+ active users.
- Proficient in API development using Golang, JavaScript, utilizing frameworks like Go-Fiber, Express.js
- Collaborated with UI/UX designers and front-end developers to create user-friendly interfaces .

Hyperledger Fabric Developer , Freelance

- Completed an internship program at Mulder Tech, UK and was involved in the Proof of Concept (POC) for Hyperledger Fabric network.
- Led the setup and configuration of Hyperledger Fabric consortiums and networks, including establishing peer nodes, orderers, and certificate authorities.

CERTIFICATIONS

- Certified Cryptocurrency Auditor (CCA) - Blockchain Council
- Hyperledger Fabric Certified Practitioner (HFCP) - Linux Foundation
- OWASP API Security Top 10 - APIsec University
- Deep Learning with Tensorflow - IBM
- n8n Automation Certification L1 & L2 - n8n.io
- Equity Research Analyst - NISM series XV, SEBI
