TECHNICAL SKILLS

NodeJS, ExpressJS, Javascript,Ethereum, Solidity, Web3, Hyperledger Fabric, Hyperledger Besu, Polygon, Avalanche Fuji, DAML, Shell Scripting, Docker, EKS, Git, AWS, SQL, MongoDB, PostgreSQL, Jmeter, Typescript

PROFESSIONAL EXPERIENCE

XALTS **Bengaluru, Karnataka**

EVM Engineer | Ethereum | Solidity | Polygon | Fuji | Besu | Javascript | NodeJS| RestAPI | **2024 - Present**

- Implementing financial solutions based on tokenization.
- Creating pluggable distributed infrastructure for banks to integrate.
- **Extensively working on EVM technology** (**Ethereum, Solidity, Ethers, Web3, Skandha Bundler**).
- Optimising product running on existing blockchain networks (Polygon, Hyperledger Besu, Avalanche Fuji).

Selected Project Experience

- **RWA Cloud**
  - Developed **Solidity smart contracts** to create and manage real-world digital assets, enabling secure transfers between various enrolled entities on the platform.
  - Developed a backend service to integrate with EVM-based blockchains and the Skandha bundler, facilitating efficient transaction management and smart contract interactions.

INFOSYS **Bengaluru, Karnataka**

Senior Associate Consultant | Javascript | NodeJS| RestAPI | Ethereum | Solidity | EKS | Polygon **2021 - 2024**

- Research, architecture design, and implementation of blockchain solutions.
- Development experience in blockchain technologies like **Ethereum** (**Solidity**), **Hyperledger Fabric**/**Besu** and **DAML**.
- **RestAPI** implementation using **NodeJS** and **ExpressJS** to integrate blockchain and microservices.
- Implemented agile methodologies and led a team of 10 developers in the development of 2 blockchain applications.
- Engineered a blockchain-based "**Digital Loan Agent**" system for **Goldman Sachs**, which increased transaction processing speed by 20% and reduced transaction fees by up to 100%.

Selected Project Experience

- **Neom**
  - Implemented **Hyperledger Besu** private Ethereum network for client NEOM, which increased transaction speed by 30% for the **Ethereum** network.
  - Configured and deployed a Kubernetes cluster on Amazon **Elastic Kubernetes Services** (**EKS**) to handle 2x the normal traffic with 40% fewer resources.
- **NFT Marketplace**
  - Developed and executed a generic Ethereum blockchain-based "**Marketplace**" solution, integrating with digital wallets and smart contracts, resulting in the onboarding of 2 clients.
  - Deployed solution on Ethereum public network, polygon, and hyperledger besu to draw a comparison between transaction speed, and block finality time. Improved transaction speed by 30% after using hyperledger besu.
- **Digital Loan Agent**
  - Designed DAML templates for loan-related activities and automated payout system for interest and accruals.
  - Improved the CI/CD pipeline to streamline the development and deployment process reducing the time of end-to-end development and testing by 30%.

AKEO **Jaipur, Rajasthan**

Software Engineer | NodeJS | Ethereum | Solidity | Hyperledger Fabric| MongoDB | Docker | GoLang **2018 - 2021**

- Authored smart contracts on solidity(**Ethereum**) with customised gas fees as zero, resulting in gas cost reduction
- Created private blockchain using **hyperledger fabric** and hyperledger composer.
- Implemented several backend microservices leveraging **NodeJS to** integrate the entire solution.

Selected Project Experience

- **Wakandi**
  - The application allows users to transfer funds in the form of tokens that they can redeem in their native currency reducing the transaction fee imposed by private players by 20%.

- Research and development of chain code and business logic and development of **API services** and integration with blockchain service.

- **Switchr**
  - The application allowed users to acquire ownership of solar panels in the form of NFTs.
  - Research and development of **Ethereum** smart contract and business logic and development of API services and integration with blockchain service.

CERTIFICATES :

Google Associate Cloud Engineer - https://google.accredible.com/93bbb43f-ffb5-4775-a71f-2feb04a3204b
Hyperledger Fabric Certified Practitioner-https://www.credly.com/badges/6b7c25dd-24d2-4170-86f3-41943a841841/public_url
DAML Associate - Learned about Functional programming, Canton ledger programming, and testing in DAML
https://daml.talentlms.com/user/certification/sig:txgNus50sWgKH45E4zb0yg.RElzUWtic1h0R0VEV00xNXRXY0dHdz09

EDUCATION

Bachelor of Technology (**Computer Science Engineering**) **Rajasthan Technical University** (**2014-2018**)
