PROFESSIONAL SUMMARY

Experienced IT professional with 11+ years of expertise in product development, technology leadership, and solution delivery. Strong background in AI/ML, with hands-on experience building data-driven products and scalable machine learning pipelines. Passionate about exploring emerging technologies and delivering business value through innovation in AI and analytics.

PROFESSIONAL EXPERIENCE

AI/ML Engineer- Dhira.io. Hyderabad, India

4/2024 – 6/2025

Project: **Akashic**

Akashic is a comprehensive data management solution offered by Dhira. It's designed to help organizations transform their raw data into integrated digital assets for informed decision-making. Akashic is designed to cater to various roles, including business users, data analysts, data scientists and data engineers. It aims to simplify data management and provide meaningful business insights in real-time or by deriving historical trends

Skills: **Azure cloud services, LLMs, FAST API, Docker, Open Source Softwares**

- Explored, evaluated, and integrated open-source tools such as MLflow, Feast, JupyterHub to identify optimal solutions for diverse machine learning use cases, accelerating development and deployment workflows.
- Partnered with product teams to design and launch new modules that seamlessly integrated ML capabilities into the existing product, enabling robust MLOps(ML Operation) pipelines.
- Implemented backend services to integrate and orchestrate open-source ML tools, streamlining development workflows and improving reproducibility.
- Implemented SSO based authentication using keycloak.
- Led infrastructure setup from the ground up, including environment provisioning, tooling integration, and CI/CD pipelines for ML components.
- Built and deployed machine learning models for prediction and forecasting tasks, supporting key business initiatives with actionable insights.
- Conducted comprehensive end-to-end testing of ML modules to ensure functionality, scalability, and reliability in production environments.
- Provided technical guidance and mentorship to junior engineers.

Senior Consultant, Trigyn Technologies Bangalore, India
2/2025 - 6/2025
Project: YouthHub.org
YouthHub.org is an online platform focused on empowering and supporting young people by providing resources, tools, and opportunities for personal and professional development. The project aims to engage young people through various activities, including education and skills development, networking opportunities, volunteering social activities and career guidance.

Skills: Flask API, Python Scripts, AWS services, Jenkins CI/CD pipelines, Docker.

- Enabled deep linking in the job portal for direct access to campaigns and job postings, enhancing user navigation and engagement.
- Optimized migration script to load data from the master database to Elasticsearch, reducing processing time by 70% (from 4 hrs to 1.2 hrs) for 15k records, improving data pipeline efficiency.
- Integrated new APIs for partner services and customized the recommendation engine to meet partner-specific needs.
- Resolved legacy issues to ensure smooth, reliable platform performance.

Full Stack Developer - Lead, Intellect Faces, Inc Chennai, India
9/2023 - 2/2024
Project: Rytfit.ai
Rytfit.ai empowers you with a comprehensive, end-to-end workforce management system that aligns with your business objectives to help you spot and hire the right talent, develop and retain employees, and OKR measurement aligning to your business goals.

Skills: Angular 14, Node js, AWS services, Jenkins CI/CD pipelines, Docker, MERN stack.

- Streamlined existing candidate on-boarding process by identifying the functional gaps.
- Fixed key security issues identified by penetration testing.
- Worked in Modularization of application to maintain specific roles within. Integration of todo list in one's Google or outlook calendar.
- Improved performance of the application by reducing the load time one third.
- Internationalization of the application.
- Worked on the continuous development of the product by analyzing users feedback and prioritizing the same.
- Converted user stories to tasks using Jira and bucket them for sprint. Done peer code reviews to ensure quality.

Senior Software Engineer, IHorse Technologies Puducherry, India
9/2020 - 8/2023
Project: ARii
Cross platform mobile app developed using MERN stack and web portal for authorized users developed using Angular and Node.js.
Full stack Developer

Skills: React.js, Redux, Node.js, Angular, AWS cloud services.

- Successfully integrated a new software system single handedly and organized the roll out of competency training for all staff.
- Expertise in deployment activities using AWS cloud services.
- Provided Out-of-Box solutions by analyzing and integrating Third-Party libraries.
- Implemented best practices for performance optimization and maintainability.
- Experience in handling complex data structure.
- E2E responsibilities include gathering customer intakes, coming up with milestones, development, testing and deployment of applications along with support.
- Design and implement low-latency, high-availability, and performant application

Python Developer

- Responsible for design and development of RESTful APIs using Flask
- Strong understanding of data manipulation and analysis using Pandas
- Set up a deployment environment using WSGI server and NGINX web server from square one.
- Had exposure in video analytics and face recognition to analyze students' attention in online classes, using OpenCV & Google cloud vision API

Software Programmer, Chakrasoft Private Limited Tamil Nadu, India
8/2019 - 8/2020

Project: MealMee

Cross-platform, customer centric, scalable application using MEAN stack.

Skills: Angular, Node.js, Mongo Db, Redis, Express, mongoose, RxJs

- Developed intuitive user interface using Ionic framework.
- Implemented optimized business logic and secured routing using authguard.
- Integrated with backend apis and validated workflow. • Developed app from the ground up.

Senior Engineer, Honeywell Technology Solutions Bangalore, India
12/2010 - 6/2017

Skills: Javascript, Java, J2EE, Spring MVC

- Implemented SSO with Apache proxy integration.
- Key player in deploying the vendor application in Enterprise cloud Infrastructure.
- E2E support for user queries, incorporating their candid feedback and prioritizing the same.
- Represented as technical focal in Global Customer center calls.
- Handled change requirement for internal application using "Java/J2EE" technologies.
- Adopted agile methodology

Developer, Kasbha System Software Coimbatore, India
12/2009 - 12/2010

- Involved in development activities for different requirements. • Created new modules to adhere to new features.
- Interacted with business analyst in understanding the existing behavior of the application.

E D U C AT I O N

Master's Of Technology In Computer Science And Engineering, Vellore Institute Of Technology Vellore

6/2017 - 2020

Specialized in Big Data analytics with CGPA 8.6
Advanced coursework in artificial intelligence, machine learning, and data mining. Thesis project focused on developing an intelligent recommendation system. Gained expertise in software development, data analysis, and algorithm design. Collaborated with faculty on research projects and attempted to publish papers in reputed journals.

Bachelor's Degree In Computer Engineering, K.L.N. College of Information Technology Pottapalayam, Sivagangai Dist.

6/2005 - 6/2009

80%

C O U R S E

Machine Learning, Coursera - Standford University (Online)

1/2018 - 2/2018

Prompt Engineering for ChatGPT, DeepLearing.ai (Online)

6/2024 - 6/2024
