Professional Summary

I'm a dedicated developer with 4.5+ years of experience working on full-stack applications using React.js, React Native, Next.js, Node.js, and Python. I've built scalable web Apps , mobile Apps and digital products across domains like crypto, IoT, and SaaS. With active participation in hackathons and hands-on exposure to blockchain, dApps, and Web3.js, I bring a mix of innovation and practical skill to every project. I'm a strong team player who values clean code, performance, and user experience.

Technical Skills

Languages	* TypeScript, ⋆ JavaScript, ⋆ Haskell, ⋆ SQL, ⋆ Scala, ⋆ Go, ⋆ Python, ⋆ C/C++, ⋆ Bash
Frameworks	* React, ⋆ Redux Tailwind CSS, ⋆ Next.js,⋆ Shadcn , ⋆ Express.js, ⋆ React Native, ⋆ Svelte
Databases	* MongoDB, ⋆ PostgreSQL, ⋆ MySQL, ⋆ SQLite IndexedDB, ⋆ Amazon S3, ⋆ DynamoDB, ⋆ Redis
Front-End Tools	* Storybook, ⋆ Jest, ⋆ fast-check, ⋆ Webpack, ⋆ ESLint Prettier, ⋆ npm, ⋆ Yarn, ⋆ pnpm, ⋆ Bun
Back-End Tools	* GraphQL, ⋆ OpenAPI, ⋆ Docker, ⋆ Kubernetes, ⋆ Terraform, Amazon Web Services, ⋆ RabbitMQ
Developer Tools	* Git, ⋆ Sentry, ⋆ PostHog, ⋆ Amplitude, ⋆ Slack, ⋆ Jira, ⋆ Confluence, ⋆ Postman Charles

Work Experience

KOINBX - Bengaluru, India — April2024—Present
Software Engineer

- Led the development of a full-featured crypto exchange platform from scratch using Next.js, python and implementing authentication, 2FA, and manual KYC workflows.
- Engineered the trading module with advanced spot trading options (market, limit, stop-loss, and target orders), delivering high performance and UX clarity.
- Integrated real-time data using Firebase, custom WebSockets, and PubSub, while embedding TradingView for live charting and market insights.
- Used Redux for scalable state management and developed modular, reusable UI components using TypeScript and Tailwind CSS and Shadcn library.
- Wrote unit and integration tests using Jest and React Testing Library to ensure frontend reliability, improve code quality, and catch regressions early.

Cell Propulsion - Bengaluru, India — September2023 - April2024
Software Engineer

- Designed and developed an intuitive UI for an IoT-based kiosk tablet using React and Next.js, enhancing user experience through smooth, touch-friendly interactions.
- Implemented backend services for authentication, authorization, and real-time notifications using Node.js, ensuring secure and responsive system behavior.
- Led the tablet provisioning and setup, including Android rooting, system configuration, and hardware-software integration.
- Integrated MQTT protocol to establish efficient real-time communication between the kiosk tablet and backend services.
- Ensured end-to-end functionality by coordinating frontend, backend, and device-level components, delivering a reliable and scalable kiosk solution.

Hyperhire - Contract — May2023 - August2023
Frontend Developer

- Led the development of a shopping mall web application for Royal Canin, one of the leading dog food brands, building the entire frontend from scratch.
- Used React, Redux, and HTML/CSS and Python to create a responsive, user-friendly interface tailored for seamless e-commerce experiences.
- Owned the full UI architecture, component structure, and state management, ensuring performance, scalability, and maintainability.
- Collaborated with backend and design teams to integrate APIs and deliver a visually consistent, high-performing product.

Netzero Sustainablity Economics - Bengaluru, India October2022 - April2023
Frontend Developer

- Led the end-to-end development of a SaaS platform for carbon emissions tracking, contributing to product architecture, user flow design, and R&D
- Built interactive dashboards and core modules to deliver actionable sustainability insights, leveraging real-time data visualization and intuitive UI design.
- Collaborated cross-functionally with designers, developers, and domain experts to launch Sustainability Economics, a web platform for analyzing and reducing carbon footprints.
- Focused on data accuracy, performance, and UX, ensuring the product met environmental compliance standards and user expectations.

Examroom.AI - Bengaluru, India *Feb2022* - October2022
Fullstack Developer

- Developed the company website using the MERN stack (MongoDB, Express.js, React, Node.js), delivering a responsive and scalable frontend-backend integration.
- Contributed to Blockport, a global blockchain-enabled job portal, by building core features focused on decentralized job listings and user profiles.
- Implemented Redux Toolkit for efficient and maintainable state management across complex user interactions.
- Integrated MongoDB for structured data storage and optimized backend queries to support a smooth user experience.

Career Highlights

MOONLY - Personal July2024—Present

- Developed a decentralized exchange (DEX) for trading newly listed tokens on Moonly Trading, leveraging Next.js and Python to ensure a seamless and secure trading experience
- Integrated multiple third-party Solana wallets, enhancing user convenience and security with a smooth connection process.
- Prioritized user security with advanced authentication protocols and encryption to safeguard funds and transactions.

Education History

CGC COE Landran, Btech in Computer Science August2018-May2022

***Sanathan Dharam Vidya Mandir*,** 10-12 Graduation March2016-March2018
