Dear Pintoo Kumar,

What a great day! It is with joy and excitement that we welcome you to Nagarro.

Today, work is such a big part of our life, that it is important to choose wisely who you want to work with. The company you join should be:

- Friendly while being professional,
- Respectful while encouraging frank discussions,
- Rock-solid but fast-growing,
- Strong in your country but global in its mindset,
- Businesslike but making a huge impact in social and environmental causes.

Nagarro is such a company!

We are known for our CARING values and informal, friendly culture, while the work we do is stateof-the-art.

We are very tactful with each other but you can speak freely anywhere and anytime.

We are a public company listed on the Frankfurt stock exchange, in fact on the prestigious TecDAX stock index, and are, perhaps, the fastest growing digital software services firm on the planet (from 8,700 people at the end of 2020 to over 18,000 at the end of 2023).

We are very strong in India with offices sprouting in 15 cities, but we also have nearly a thousand people in China, and nearly that many in Romania, in the US, and in Germany, and smaller offices in 23 other countries.

We are a very successful business but in India are better known for saving lives via road safety campaigns, or for our support to the all-new Plaksha University being set up to international standards, or our fight against air pollution. When we were small some people would even say, “I thought Nagarro was an NGO”!

But what we live for is complex engineering - the more challenging, the better! Nagarro is a company run by engineers. In fact, engineers who are still in love with engineering. Like me.

And our software probably already touches your life at many places. When on a flight you hear "your estimated flight time is...", the odds are high that the software being used to create this flight plan is engineered by Nagarro. If you take a very long-haul flight, you can smile at the fact that Nagarro probably wrote the process informatics software and the digital twin for the engine manufacturing from delicate layers of composites. When you check into a hotel, the access to your room is probably managed by the world leader in locks with 60% of hotel room and office market share, for which Nagarro is the core partner for the digitalization of products and services. The lighting control leader that lights up the Empire State Building, the White House, the Statue of Liberty, Wimbledon, the Taj Mahal, Mukesh Ambani's home and so on, has Nagarro as its main R&D and IT partner. We are one of the few global preferred vendors for a leading German multinational, and similarly one of the few preferred vendors for the giant New York City. We are one of the three preferred

vendors for the Lufthansa Group (Lufthansa, Swiss and Austrian) – if you fly any of these airlines, you hit our software at many points in the experience. We are also a strategic partner for Star Alliance. A large US telecom uses us for their digital signage and 5G solutions and a large US media house for their program scheduling. We work with all the three premium German car companies, mostly in the new, innovative connected car and connected services space. A famous German motorcycle brand is another of our clients, as are a famous Indian motorcycle brand and a famous Asian car company. We enable e-commerce for some of the world's leading global retailers. And I could go on and on.

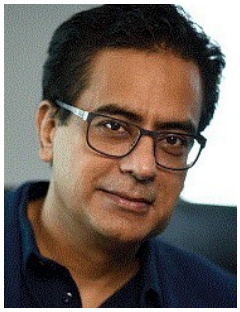

In short: at Nagarro, you get many chances to work with world leaders in various exciting industries, at the very cutting-edge. We THINK BREAKTHROUGHS. This is what makes me jump out of bed every morning - it is all so exciting.

But today we are very excited that you are joining Nagarro. My colleagues and I look forward to meeting you and working with you. Our new joiner programs will bring us together in a meeting in your very first month at Nagarro.

Warm regards,

Manas Human
