HARSH MAURYA

H.N.56, Dashrajpatti, Maharajganj,
Azamgarh, Uttar Pradesh, 276137.

(+91) 6388674104
harshmauryahmps@gmail.com

OBJECTIVE:-

To utilize my technical, database, and management skills to achieve targets and enhance performance within the company. I would like to implement my innovative ideas, technical knowledge, and creativity for the growth of the organization, while also expanding my understanding of new and emerging trends in the IT sector.

SYNOPSIS:-

- **4+ years of experience in the development of web applications and APIs using Go language technology.**
- **Hands-on experience with Go language, RESTful APIs using Go and Gin web framework, PostgreSQL, MySQL, GORM, Amazon S3, AWS, Kubernetes, Docker, and Redis cache.**
- Experience in creating RESTful APIs with Go and the Gin web framework, database interactions, writing test cases, ensuring code coverage, and API integration
- Experience in writing test cases using the testing and testify packages, as well as using the goMock package.
- Experience with Performance testing frameworks (K6), API integration and API documentation and the development process in the Jenkins.
- Good experience with Agile methodology (SCRUM), story grooming, test case reviews and knowledge of version control (Git, GitHub).
- Exposed to build tools like Visual Studio Code, Eclipse, Another Redis Desktop Manager, FileZilla, Postman and the bug tracking tool JIRA in the workplace.
- An active participant in requirement analysis, coordinating with clients, development teams, and testing teams to acquire a complete understanding of the project.
- Ability to quickly understand the application and convert requirements into code by implementing best practices and recommended technical solutions.
- Worked on an existing project for several years, gaining a strong understanding of the framework and effectively fixing defects within the estimated time.
- Highly enthusiastic and determined to establish a successful and fulfilling career in Information Technology while contributing to the growth of the organization.
- Optimized application performance by profiling and resolving bottlenecks, reducing response times and resource consumption in Go-based applications.

TECHNICAL EXPERTISE:-

- **Programming Languages:** Go Language
- **Frameworks:** Golang Gin framework, Microservices
- **Web Technologies:** RESTful Web Services (JSON), Form Data
- **Tools:** Git, Jira, VS Code, Eclipse, FileZilla, Postman, Jenkins, TablePlus, DBeaver
- **Database:** PostgreSQL, MySQL, Oracle SQL, GORM and Redis Cache.
- **Operating System:** Windows 11, Windows 10, Windows 8 and Windows 7
- **Methodologies:** Agile

EXPERIENCE:-

Cloudqix Software (April,2024-Present) - Sr. Software Engineer

❖ Product :

Project Name	Product Based (AML and Connect Software Product)
Role	Senior Golang Developer
Organization	Cloudqix Software Pvt. Ltd.
Project Size	Team: 6
Duration	April,2024 to Present
Technologies:	Go Full Stack, RESTful APIs with Go and the Gin Web Framework, Amazon S3, Docker, Kubernetes, AWS Database: MySQL, GORM, Redis Cache

Product Description: -

CloudQix helps you maximize the potential of your tools through intelligent API connections. Streamline your business-critical processes with easily customizable connections that enhance efficiency and accuracy. The Connect Application handles customer JSON requests/responses based on the client's needs and supports various functions such as sum, average, string manipulation, split, etc.

In the AML Application, users can register and subscribe to products, create users, and assign specific permissions. In the Connect Application, users can create connectors, configure authentications and environments, and design workflows using start nodes like API, File as source, Database, Webhook or Url hook. These workflows can send start node's data to a database, API, webhook or used to write data to a file. Additionally, multiple data nodes can be used, such as branching, iterator, conditional (if-else), and repeat nodes. Transformation nodes like Map, Filter, Find, Remove, and Reduce can also be applied. Users can publish their workflow versions, and others can subscribe to them.

Contribution: -

As a Developer, I am responsible for,

- ✦ Writing code for connectors, authentication, and environments
- ✦ Writing code for dashboards, workflows, and node functionalities
- ✦ Using Go routines and channels to pass data
- ✦ Using FTP and SFTP servers for file uploads and downloads
- ✦ Reading from and uploading files to Amazon S3
- ✦ Designing databases for applications and using GORM queries
- ✦ Writing code to save and display logs for all nodes
- ✦ Using Shopify, SalesWarp, Slack, Mailchimp and BigCommerce developer APIs
- ✦ Implementing email functionality and URL hooks
- ✦ Publishing workflow versions and allowing clients to subscribe
- ✦ Using Docker technology to run the application
- ✦ Implementing features using Go and writing test cases
- ✦ Developing RESTful APIs for various functionalities
- ✦ Testing AML and Connect applications and fixing bugs
- ✦ Interacting with Redis Cache and databases through APIs
- ✦ Coding, designing, and conducting code reviews
- ✦ Implemented automated CI/CD pipelines to streamline deployment processes, ensuring faster and more reliable delivery of microservices to production environments.

HCL Technologies(April,2021-April,2024) – Software Engineer

❖ Project :

Project Name	Office Depot(Veyer Optimize Order Capture)
Role	Golang Developer
Organization	HCL
Project Size	Team: 6
Duration	April,2021 to April,2024
Technologies:	GO Full Stack, RESTful API with Go and Gin Web Framework (Gin) Database: PostgreSQL

Project Description: -

The ODP Corporation (ODP) is a leading provider of products and services through an integrated business-to-business (B2B) distribution platform and omni channel presence, which includes world-class supply chain and distribution operations, dedicated sales professionals, a B2B digital procurement solution, online presence, and a network of Office Depot and OfficeMax retail stores. The project was focused on to develop each and every functionality in RESTful APIs as micro services using GO Full Stack.

Contribution: -

As a Developer, I was responsible for,

- ✦ Built a new pipeline from the ground up, developed a microservice architecture
- ✦ To fetch data from tables with multiple records, process it based on input filters
- ✦ Display it in a list format with the ability to navigate forward and backward.
- ✦ I had worked on setting up nearly 35 Microservices of similar kind.
- ✦ For all services, I had ensured that the code coverage was at least 90%.
- ✦ Made RESTful API on different functionalities.
- ✦ To maintain(insert,update,delete) records in the database with API
- ✦ To calculate Order dispatched and delivery date-time based on order create date-time.
- ✦ Optimize database queries to improve performance and reduce processing time for large datasets.
- ✦ Implemented error handling and logging mechanisms to ensure robust microservice communication and traceability.
- ✦ Collaborated closely with cross-functional teams to align on business requirements and deliver high-quality solutions within deadlines.
- ✦ Implemented automated CI/CD pipelines to streamline deployment processes, ensuring faster and more reliable delivery of microservices to production environments.
- ✦ Interact with onsite coordinator and the client
- ✦ Coding, Designing & Code Review

TECHNICAL QUALIFICATIONS:-

- ❖ Bachelor of Technology(**B.Tech.**) in Computer Science & Engineering(**CSE**) of batch **2016-2020** from J.K. Institute Of Applied Physics& Technology, University of Allahabad, Prayagraj with **76.57%** (**First Division with Distinction**).
- ❖ Course on Computer Concepts (**CCC**) in July,2015 from Raj Global Technical Institute with grade '**C**'.

ACADEMIC QUALIFICATIONS:-

- Intermediate (**12th**) Examination by Board of High School and Intermediate Education, Uttar Pradesh (State Board) from Sarvodaya Inter College, Hamirpur Maharajganj Azamgarh in **2015** with **92.20%.**
- High School(**10th**) Examination by Board of High School and Intermediate Education, Uttar Pradesh (State Board) from Saini Montesory U M V D K P Maharajganj Azamgarh in year **2013** with **89.83%.**

PERSONAL SKILLS AND STRENGTHS:-

- Strong willingness to learn and adapt, with a proven ability to collaborate effectively within a team.
- Demonstrates leadership qualities, combined with confidence in decision-making and execution.
- Skilled at building strong relationships quickly and establishing trust with others.
- Highly determined and results-driven, with a strong focus on delivering quality work.
- Excellent time management skills, with the ability to prioritize tasks efficiently and adapt to changing environments.

INTEREST & HOBBIES:-

- Exploring technology and staying updated with the latest news through internet browsing.
- Engaging in sports such as cricket, volleyball, badminton, carrom, and chess.
- Enjoying science, technology, and thriller-based web series and movies.

PERSONAL DETAILS:-

Name : Harsh Maurya
