# Somashankar Doddi

Backend Developer - Golang

sb.doddi7@gmail.com | +91 9110427620 | https://www.linkedin.com/in/somashankar-doddi-4a92b11ba/ | Bangalore, India

## SUMMARY

Results-driven Golang Developer with a proven track record of optimizing backend integrations and enhancing system efficiency. Proficient in building scalable and high-performance applications using Golang, Gin, gRPC, and Docker. Skilled in advanced database management with MySQL and DynamoDB to improve data analytics and streamline workflows.

## WORK EXPERIENCE

### Golang Developer | Well Pharmacy, ITC Infotech Ltd

**Nov 2022 - Jul 2025, Bangalore, India**

- Designed and implemented scalable, event-driven architectures using Golang to efficiently process high-volume data streams, reducing processing time by 30%
- Developed and optimized backend services using Golang, Gin, and RESTful APIs, ensuring high performance and scalability.
- Built and maintained serverless applications with AWS services like Lambda, API Gateway, DynamoDB, and SQS, achieving 99.9% uptime and improving system reliability.
- Integrated third-party services such as SendGrid, Klaviyo, and OnSched to enhance automation, communication, and workflow efficiency.
- Implemented robust unit testing using Testify and GoMock, ensuring maintainable, high-quality code with First Time Right (FTR) compliance.
- Created and enhanced a Golang-based migration tool, streamlining backend data migrations with improved efficiency and accuracy.
- Integrated Amplitude analytics to track and analyze user interactions across web, mobile, and SaaS platforms, improving data-driven decision-making.
- Developed ETL pipelines using AWS Glue and optimized Redshift data storage, improving data analytics capabilities by 20%.
- Containerized applications using Docker, improving deployment consistency and development efficiency.
- Collaborated in cross-functional teams to design, implement, and optimize scalable backend architectures.

### Junior Golang Developer | Lowes India, ITC Infotech Ltd

**Jan 2022 - Oct 2022, Bangalore, India**

- Developed and maintained RESTful APIs using Golang, ensuring performance, scalability, and adherence to REST principles
- Wrote and optimized complex MySQL queries for data retrieval, manipulation, and reporting.
- Followed best practices in code versioning with Git and participated in code reviews to ensure maintainable and high-quality code.
- Implemented logging and basic error-handling mechanisms to improve observability and debugging processes.

## EDUCATION

### Bachelor's in Electronics and Communication Engineering | Basaveshwar Engineering College

**Aug 2017 - Jul 2021 • Bagalkot, India**

## SKILLS

- **Programming :** Golang, Python, SQL
- **Frameworks & Tools :** Gin, Gorilla, gRPC, RESTful APIs, Docker, Postman, Swagger
- **Big Data Tools :** AWS Glue, Redshift
- **Database Management :** MySQL, DynamoDB

## CERTIFICATIONS

**Golang(Basic) | HackerRank | Mar 2025**

**Serverless Developer Badge | AWS | Mar 2024**

## AWARDS

### PAT ON THE BACK - INDIVIDUAL | ITC Infotech Ltd | Dec 2024

- Recognized for outstanding contributions, dedication, and excellence in teamwork.
- Consistently demonstrated skills, commitment, and a positive attitude.
- Made a significant impact on project success.
