SKILLS

Programming Language : Java,Javascript, Python, Go, Typescript, Rust

ML Tools : LLM, Crew AI, Langchain, AI Agent, Gen AI, Machine Learning

Cloud : AWS, S3, SQS, SNS, Lambda, EC2, DynamoDB,

Web Framework : React, Next.js, HTML, CSS, Spring, Hibernate, GRPC, React

Messaging Service : Kafka, ActiveMQ, RabbitMQ, Redis

JOB EXPERIENCES

Software Engineer 2 @OLX
June 2022 - April 2023

Senior Software Engineer @ Klearnow
April 2020 – June 2022

Software Engineer @Glaucus
December 2018 - April 2020

Project Engineer @Wipro
June 2018 - Dec 2018

EDUCATION

B.Tech Computer Science & Engineering
July 2014 - May 2018

Senior Secondary School
July 2011 - May 2013

PROJECTS

OLX Auto Protean @OLX (June 2022 - April 2023)

(Java, Typescript, N8N, Kafka,GraphQl) (OLX Auto Customer Onboarding Automation)

- Implemented Workflow proxy to dispatch the client request to respective services
- Implemented custom workflow in n8n service based for multiple business use cases
- Led a team for 4 people for implementing the end to end requirement

Kn - Custom broker panel @Klearnow (April 2020-June 2022)

(Java, React, Go, GRPC, Protobuf,Kafka)(Shipment Tracking Dashboard for Brokers)

- Worked with API Implementation of various requirement using GRPC API protocol
- Designed end to end microservice workflow for different use cases
- Implemented custom EDI data model for interacting with different countries API services
- Worked with Kafka to implement event based microservice communication
- Monitored the Kubernetes cluster for the deployed microservices
- Developed with required Broker Form UI using React framework

Kn-Jarvis @Klearnow (July 2021 - June 2022)

(GoLang, Redis, Java, Jersey) (Background service for Shipment data Analytics)

- Worked with broker for collecting all Shipment metrics for Shipment Analytics dashboard
- Developed microservice for aggregating the shipment data in Go language
- Integrated the kn-jarvis microservice with Redis cluster and provided support for all required apis

FMS @Glaucus (Nov 2018 - April 2020)

(Java, Spring, Hibernate, MySQL,Tomcat) (Freight Management System)

- Freight management System was responsible for managing the address to address pricing of shipment transportation
- Worked with vendor and team for gathering the requirement for different use cases
- Designed and implemented microservice based architecture using ActiveMQ, Spring and Hibernate for all use cases for end to end delivery of product
- Added api support using Spring framework and integrated the microservices with Order management system and Warehouse management System

Shipcoord @Glaucus (April 2019 - March 2020)

(Java, JMS, Apache Camel, Spring Boot, Rest, Hibernate) (Shipment Coordinator Service)

- Developed a loosely coupled coordinator service for exchanging the shipment data with different microservices based on event driven communication protocol
- Deployed and managed ELK(Elasticsearch, Logstash, Kibana) server for performing analytics on server logs
- Continuously monitored the Web servers for smooth processing of businesses
