Srujan Kachhwaha

Mob: +91 8982938400 | Email : srujank0903@gmail.com

Introduction

A dynamic software professional with **3.8 years of hands-on experience in Python, Golang** and **Devops With Cloud providers Azure, GCP and AWS and terraform**, complemented by 1.9 years of successful freelance development, Highly skilled in developing scalable cloud-based innovative software solutions

Professional Summary

- **1.8 years** of fulltime experience as Python Application Developer
- **1.9 years** of **freelancing** experience during the Mtech program in **Entrepreneurship** and **Software development**.
- Experienced in **Golang** for application development
- Experienced in **AWS cloud technologies** such as **AWS elasticbeanstalk**, **AWS ECS**, **AWS Lambda, AWS API Gateway and serverless approach**
- Experienced **cyber security professional** with experience in **Splunk, ServiceNow** and **XSOAR integrations**.
- Experienced **in Azure Cloud Services and GCP Services with Terraform**
- Extensive knowledge of **python programming language, python web frameworks, Django, flask and API development, Javascript and TypeScript, React and Next JS.**
- Experience in containerized application development using **docker, ECS cluster**.
- Good knowledge of **Machine learning** using python libraries such as **scikit, sklearn** and others.
- Published a conference paper in IEEE in the domain of **blockchain** during completion of Master's degree in computer science.

Key Skills

- **Python Programming -** Asynchronous / synchronous programing, Threading, Socket programming, Libraries - Django, numpy, scikit, sklearn, django
- **Cyber Security -** Splunk, Distributed Splunk Setups, ServiceNow integrations, XSOAR integration
- **AWS Cloud Development** - IAM roles, Serverless models, AWS Lambda, AWS elasticbeanstalk, AWS API Gateway, Cloud development kit, AWS ECS Clusters,
- **Azure Cloud** - Active Directories, Azure RDS, and other services
- **GCP** - Cloud Run, Cloud SQL, IAM roles and other
- **Terraform** - Automation and devops for Azure, GCP and AWS

- **Web Development -** Django (backend), API development, Javascript,TypeScript, Reactjs, Nest js

- **Machine Learning / Data Analysis -** Data visualization using python libraries, Statistics, Supervised machine learning, un-supervised machine learning.
- **Database / Sql** - PostgresSql, Mysql, AWS DynamoDb, MSSQL

Education

- **Master's In Technology** - Computer Science, OP Jindal University, Raigarh, Chhattisgarh, **2021 - 2024.**

- **Bachelor's In Technology** - Information Technology, Government Engineering College, Bilaspur, Chhattisgarh, **2017 - 2021**.

Certifications

- **Google IT Automation with Python Professional Certificate** - Google / Coursera
- **Machine Learning With Python** - IBM
- **Specialization In Blockchain** - University At Buffalo, State University At New York

---

Projects

1. **Data Security Posture Management Application Development**

   Role : Software Engineer

   Responsibilities:

   - Leading the team and driving the Sprints
   - Developing Data management libraries in Golang
   - Deploying Infrastructure in GCP, AWS and Azure for Security and monitoring of Identities and Cloud applications usage

Skilled used : AWS, Azure, GCP, terraform, Golang, MSSQL, MYSQL, Postgres

2. **Algo Trading web application— Cloud Based SaaS Application;**

   Role : Project Architect / Developer

   Responsibilities:

   - Involved in ideation phase of product development with stake-holders.
   - Developed end-to-end cloud architecture of the project.
   - Implemented AWS Cloud technologies for the project.
   - Developed backend of the product in python django framework.
   - Developed a backend database for the product using AWS RDS
   - Developed ADMIN panel for the application.
   - Developed a dynamic ECS cluster in aws for dynamic pods creation to execute real-time strategy execution in stock market.
   - Integrated payment gateways and customer onboard journey.
   - Developed websockets to broadcast real time stock prices.
   - Hired front-end developers to collaborate on projects.

   Skilled used: AWS RDS, AWS ELASTIC BEANSTALK, AWS ECS CONTAINER, AWS WEBSOCKET DEVELOPMENT, PYTHON WEB DEVELOPMENT,JavaScript

3. **Strike API development — APIs to provide real time trading functionalities**

   Role: Python Developer

   Responsibilities:

   - Involved in ideation phase of API development with in-house team
   - Developed end-to-end cloud architecture of the project.
   - Implemented AWS Cloud technologies for the project.
   - Developed backend of the product in python django framework.
   - Developed a backend database for the product using AWS RDS
   - Integrated top 10 broker's API to provide them a single API endpoint for order execution

   Skills used: AWS API Gateway and elasticbeanstalk for a seamless and efficient cloud architecture, Python Django API development,JavaScript,TypeScript

---

Experience

- **Software Engineer** - Metron Security, **5th Feb, 2025 - Current**
  - Lead software engineer working in cyber security domain to integrate SOC applications
  - Developing scalable cloud solutions using Golang, Python and deploying cloud infrastructure using terraform scrips
  - Developing Cloud CI-CD pipelines through terraform automations

    - Developing Scalable web application in cyber security domain using nest js, React and nest js frameworks

- **Python Software Developer** - Soullabs Echelon, **September 2023 - 5th Feb, 2025**
    - Founding member of Soullabs echelon, A blockchain application development firm, laying their foundation product and spearheaded the product development
    - Collaborated with Government of India to promote Startup schemes in DPPIT
    - Managing the initial team formation of the company and guiding them for the successful product development
    - Responsible for developing product architecture, rest apis and database models of the SaaS application.

- **Freelance Python Fullstack Developer -** Freelance.com, **January 2021 - September 2023**
    - Spearheaded the development of **blockchain** based web application that requires **API integration** for crypto payment gateways in **python framework**.
    - Developed a backed database model for the web application to support user profile management, Blockchain transaction management using **AWS RDS in Postgresql**
    - Developed frontend from the figma design using **HTML** and **Javascript** libraries. Developed event based DOM manipulation features for real time interaction with backend apis.
    - Designed AWS DevOps flow and version control features for project pipelines and deployments
    - Integrated TradingView Charting library for a stock market application in Javascript framework, that requires real time candle development and manipulations.
    - Developed smart contract for blockchain application in TypeScript language for a Hyperledger based blockchain network.
    - **Python, AWS cloud, Javascript, Django, TypeScript, HTML,MySql,NoSql,RabbitMQ**

- **Teaching Assistant**, Computer Science Department, OP Jindal University, August 2021 - January 2023

Publications

- Quantum Resistant University credentials verification system on blockchain, Published in IEEE NIGERIA CONFERENCE

I do hereby confirm that the information given in this form is true to the best of my knowledge and belief.
