EDUCATION

Bachelor of Technology – Computer Science & Engineering (2017-2021)
Maulana Azad National Institute Of Technology (NIT- Bhopal)

WORK EXPERIENCE

INDIAMART INTERMESH LIMITED **NOIDA**
Software Engineer (2022 - Present)

BuyerMY Desktop (Link)

- Spearheaded full-stack development and backend optimization, leveraging **Golang goroutines** to enhance REST API concurrency and reduce request failures by **30%**.
- Revamped UI/UX architecture, resulting in a **20%** increase in user engagement and sustained growth in web traffic.

Smart Communication

- Integrated **WhatsApp** into the feedback workflow, increasing user response rate by **40%** via real-time communication**.**
- Implemented **Kafka** for distributed data streaming, processing over **1 million messages per second** reliably**.**
- Utilized Kubernetes for scalable deployments, reducing infrastructure resource usage by **60%** and improving stability.

User Feedback

- Migrated legacy feedback module to microservices architecture, enhancing system maintainability and deployment flexibility**.**
- Streamlined feedback flow by reducing redundant steps, resulting in an **8%** improvement in user engagement metrics**.**
- Engineered AMP email pages to improve mobile delivery speed, achieving a **90%** reduction in load time.
- Developed real-time alerting microservice for monitoring failures and improving issue resolution time and uptime.

Tools Integration

- Integrated **SonarQube** into CI/CD pipeline for static code analysis, resolving **150+ security** and code quality issues.
- Automated build, test, and deployment processes, increasing deployment efficiency by **80%** across development environments.
- Implemented Microsoft Clarity for behavioral analytics, enhancing conversion rates by **16%** and reducing rage clicks.

JIO PLATFORMS LIMITED **NAVI MUMBAI**
Graduate Engineer Trainee (2021-2022)

Jio Money

- Designed a Golang microservice with Aerospike DB to optimize onboarding and recharges, reducing transaction time from **10s to 3s**.
- Boosted user engagement and personalization by 50% by implementing a recommendation microservice showcasing popular products on the dashboard..
- Analyzed **user behavior** via **CDRs**, optimizing network performance, and detecting fraud, which enhanced customer experience and reliability.

OTHER PROJECTS

- Devised an image annotation system employing Generative AI (GenAI), accomplishing **86%** labeling accuracy.
- Formulated a Campus Security Management System leveraging OpenCV and OCR technologies to monitor and analyze outsider vehicle activity, achieving a **70% increase in identification** accuracy and a **40% decrease in unauthorized vehicle** entries.

TECHNICAL SKILLS

Programming Languages: Java, Golang, C++, JavaScript, PHP, TypeScript, Python

Backend Frameworks: Spring, Flask, Express.js, Laravel, React

Cloud Platforms: AWS, GCP, Azure.

Databases: MySQL, MongoDB, Redis, PostgreSQL, Aerospike, DynamoDB

DevOps & CI/CD: Kafka, Redis, Docker, Kubernetes, Jenkins, GitLab CI

Web Technologies: REST, SOAP, gRPC, JSON, XML, HTTP, WSDL

Tools & Methodologies: Agile (Scrum), Git, Jenkins, Postman, SonarQube

System Design & Data Structures: Experience in system design and architecture, optimizing data flow and performance at scale.

CERTIFICATIONS & ACHIEVEMENTS

- **Pillars of Success Award** (Twice) for outstanding contributions at IndiaMART.
- Ranked **14,249** out of **1.18 million** students in JEE MAIN 2017.

❖ **GeeksForGeeks** ❖**Leetcode** ❖**Github**
