ROHINI BAWALE

8806683751 | rbawale0@gmail.com | Pune

SUMMARY

4+ years of IT experience in all phases of SDLC,like Requirement Analysis,Development,Testing and Implementation.
● Good at coding and problem-solving skills with ability to work as Developer.
● Good working knowledge in developing telecom product and microservices using golang.
● Hands on experience with docker and kubernetes.
● Extensive knowledge in using Git, Bitbucket.
● Hands on experience in creating user stories and reports like JIRA.
● Experience in using Agile ,SCRUM methodology to deliver the projects.
● Skilled in using version control tools like Git and Bitbucket for collaborative development.
● Experience in creating and managing user stories, sprint planning, and reporting using JIRA.

EDUCATION

PG

Sunbeam Pune

06/2019 - 01/2020

BE (Computer Science)

Dr. Babasaheb Ambedkar Marathwada University

06/2016 - 05/2019

SKILLS

Golang | Java | Python | Docker | Kubernetes | GRPC API | REST API | MySql | Agile | BitBucket | Git | AWS

EXPERIENCE

Lead Software Engineer(Golang Developer)

Telemerge IT Services

09/2024 - Present | Pune

Network Data Analytics Function(NWAF-5G)

- NWAF is new network function that collects data from 5G core network functions, performs network analytics andprovides insights with closed loop automation to authorized data consumers.
- Using GO developed a microservice for reading large volume of data from MySQL database.
  Integrated Jenkins to git where the build triggers automatically when we push a pull request for CI/CD.
- Experienced in using Go technologies on UNIX and Linux platforms.
- Good understanding Multithreading and Go containers.Well versed in using Channels and goroutines.
- Worked on resolving the bugs to increase the accuracy of the product. have good debugging skill.
- Containerized applications using Docker, Created docker files, built docker images for microservices to run on kubernetes platform.
- Experience in using database like MySql,good at writing the queries.
- Good knowledge about end to end testing of the product.
- Worked on Robot suite(tool) for automation testing of the product.
- Experience of using Agile board for creating jiras,userstories,bugs.

Senior Software Engineer (Golang Developer)

Persistent Systems

07/2023 - 09/2024 | Pune

Open Source Ecosystem for Power

- The solution intends to add IBM Power support to various security features of RedHat OpenShift Cluster, investigating different compliance operator profiles and remediate them on OpenShift Power platform.
- It includes fetching raw results and applying remediations in order to make profiles complaint.
- Part of Project also focuses on writing blogs for the security features added in OpenShift cluster.
- Responsibilities:
  Requirement analysis in investigating new security feature.
- Debugging and resolving errors observed during validation and adding support.
- Installation of Operators on cluster.

Member Of Technical Staff

Mavenir

03/2021 - 06/2023 | Banglore

Uno

- Developed and maintained Golang-based microservices for backend web applications in the Telecom Domain. (REST-APIs, GRPC)
- Developed KPI metrics for microservices and integrated them into Grafana dashboards. Enhanced the existing logging framework to improve performance and functionality.
- Designed and optimized backend processes to enhance performance and efficiency.
- Modified code to optimize performance during high load conditions.
- Utilized Docker, Kubernetes, Couchbase-DB, Jenkins, and Scrum methodology for project development.
