Pintoo Kumar

Software Developer

Professional Summary

Adaptable and solution-focused Full Stack Developer with expertise in Golang and the MERN stack. Skilled in designing and deploying backend services, building dynamic user interfaces, and integrating systems with APIs. Experienced in using modern tools like Docker, Kubernetes, and GitHub Actions to ensure scalable and efficient application delivery. Strong understanding of software architecture, cloud deployments, and microservices.

Role

As a Full Stack Developer, I contribute to end-to-end product development by designing backend services in Go/Node.js and creating responsive interfaces using React.js. I focus on delivering secure, maintainable, and scalable applications. My role involves integrating APIs, optimizing deployments with Docker/Kubernetes, and ensuring system performance and reliability.

Professional Experience

Software Developer
Vissol Vassutech Pvt. Ltd. (Feb 2023 – Present)

- Developed scalable GraphQL APIs and microservices using Nodejs to support high-traffic product platforms.
- Led backend optimization efforts that improved API response times by 35%.
- Integrated PostgreSQL and Redis for transactional data and caching layers.
- Created deployment pipelines using Docker, Helm, and Kubernetes for Azure-based environments.
- Collaborated with DevOps teams to automate log monitoring with Terraform and Helm.

Full Stack Developer (MERN + Go)
TwinsSet Pvt. Ltd. (Apr 2022 – Jan 2023)

- Developed hybrid backend modules in Node.js and Golang for an internal analytics dashboard.
- Maintained and enhanced React.js frontends with routing, authentication, and role-based UI controls.
- Implemented unit and integration testing using Cypress ,Jest, and Go’s built-in test framework.
- Reduced deployment errors by setting up CI/CD pipelines via GitHub Actions.

MERN Stack Developer
QwertyCode Pvt. Ltd. (Jan 2021 – Apr 2022)

- Developed customer onboarding and reporting features using MERN stack in a SaaS-based CRM.

- Migrated legacy APIs to modern RESTful services and optimized MongoDB queries for better performance.
- Integrated external APIs (e.g., Stripe, SendGrid) and built automated job processing using Node.js queues.

Web Developer (MERN)
Techcospace Pvt. Ltd. (May 2019 – Jan 2021)

- Created and maintained internal tools for HR and inventory management.
- Delivered high-quality responsive UIs using React and Bootstrap with reusable components.
- Developed backend logic for audit logging and report generation using Express.js and MongoDB.

Projects

Title-Direct (2023 – Present)
A real estate and mortgage platform for title management and advisory services.

- Built secure backend services using **Nodejs and Nestjs**, **GraphQL**, and **PostgreSQL**.
- Developed RESTful APIs for customer onboarding, lead tracking, and title verification.
- Integrated deployment with **Docker**, **Kubernetes**, and **Azure DevOps** for CI/CD.

DocVenture (2023 – Present)
A digital document automation platform for secure contract generation and approvals.

- Created document generation modules using **Node.js**, **Redis**, and **MongoDB**.
- Designed frontend workflows in **React.js** and managed user roles and audit logs.
- Used **GitHub Actions** for observability and reliability.

Supply Chain Management System (2022)
A blockchain-integrated logistics platform to track shipments and warehouse activities.

- Developed **Hyperledger Fabric** chaincode using **Golang**.
- Built microservices for supplier APIs and integrated **React.js** frontend.
- Managed real-time IoT data storage using **PostgreSQL** and **Redis**.

Billing Microservices (2022)
A microservices billing system designed for real-time invoicing and audit logs.

- Created services in **Golang** using **gRPC**, **JWT**, and **Redis**.
- Integrated observability stack using **Prometheus**, **Grafana**, and **ELK stack**.
- Automated deployments via **Docker Compose** and **Kubernetes** orchestration.

Pharma Inventory & Traceability Suite (2021 – 2022)
A pharmaceutical platform to manage inventory, logistics, and counterfeit prevention.

- Developed **Golang** APIs with integrated **GraphQL** endpoints.
- Implemented inventory UI in **React.js** and backend in **Node.js**.
- Used **Docker**, **MongoDB**, and **Kafka** for processing drug traceability logs.

Admin Panel & Reporting Suite (2021)
A data analytics dashboard for business KPIs and operational controls.

- Built dashboards with **React.js**, **Chart.js**, and backend in **Node.js**.
- Managed secure authentication and access controls via **JWT** and **RBAC**.
- Enabled PDF reporting, **MongoDB** aggregation queries, and export features.

Education & Certifications

- B.Tech in Electrical Engineering – Krishna Institute of Engineering and Technology
- Go Programming Language (Udemy)
- Full Stack Web Development with Node.js and React (Udemy)
- Docker & Kubernetes: The Complete Guide (Udemy)

Tools & Technologies

Languages: Go, JavaScript, TypeScript, Python
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend: Golang, Node.js, Express.js, REST APIs, GraphQL, gRPC
DevOps & Deployment: Docker, Kubernetes, GitHub Actions, Jenkins, Nginx
Databases: MongoDB, PostgreSQL, MySQL, Redis
Cloud: AWS, Azure
Others: Git, GitHub, Postman, Swagger, Prometheus, Grafana

Soft Skills

System Design | Clean Code Practices | Collaboration | Agile Workflows
