EDUCATIONAL CREDENTIALS:

APJ Abdul Kalam Technical University, Lucknow
B.Tech , Computer Science and Engineering **(Aug 2018 – Aug 2022)**

OBJECTIVE:

Innovative Software Engineer with approx. 3 years of experience in developing scalable tools, APIs, and automation solutions using Python, JavaScript, and generative AI. Seeking to leverage my expertise in a dynamic environment to drive efficiency and support organizational goals.

TECHNICAL SKILLS / Skills:

- **Programming Languages** Python, JavaScript (ES6+), TypeScript, Bash, SQL, HTML5, CSS3
- **Frontend technologies:** Html, JavaScript, React.js, Less, Adapt, Bootstrap, Tailwind, CSS, XML, jQuery
- **Backend technologies:** Fast API, Flask, Django, Node.js, RESTful APIs, ORM, MVT template
- **Executable files:** Tkinter, Wx, pysimplegui
- **DevOps technologies:** Docker, GitHub Actions, GitLab**,** Redis**,** Kubernetes (basic), SVN
- **Data Processing Analysis:** NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, Playwright. SciPy
- **Web Security:** OWAS Principles, Basic penetration testing.
- **Database:** PostgreSQL, MySQL, MongoDB, Sqlite3
- **Accessibility & Globalization:** WCAG guidelines, i18n/l10n practices.
- **Cloud Providers:** Scrom Cloud, Aws (learning)
- **AI:** LangChain, Hugging Face, Open Ai, Azure Ai, Claude Ai

WORK EXPERIENCE:

Software Engineer, **NIIT Limited,** Gurgaon **March'2022 – Nov'2024)**

- Established and designed automation tools for internal and client applications, optimizing workflows through Python-based data scraping systems, reducing manual workload by 40%, and increasing operational efficiency by 25%.
- Created data visualization dashboards to streamline reporting processes, improving data-driven decision-making and achieving a 30% increase in report accuracy.
- Developed microservice-based backend APIs for seamless integration of third-party applications, reducing data processing time by 25% and enabling scalable end-to-end development.
- Designed and implemented CI/CD pipelines using GitHub workflows, ensuring reliable and efficient deployment processes while enhancing overall performance optimization.
- Implemented threshold functionalities for e-learning modules, ensuring client compliance, which contributed to a 15% increase in user satisfaction scores.
- Collaborated with clients and cross-functional teams to plan and execute the technological roadmap for six major projects, achieving 100% on-time delivery and meeting business objectives.
- Designed and structured scalable web applications using Python, Redis achieving a 50% improvement in page load speed and enhancing the user experience across devices.
- Conducted over 10 training sessions on SCORM standards, DevOps practices, and CI/CD pipelines, leading to a 20% increase in team efficiency and fostering cross-functional knowledge sharing.
- Authored detailed documentation, including HOD and QC guides, reducing testing time by 25% and improving quality control processes.

KEY PROJECTS:

- **SCB (Standard Chartered Bank)** **(Jan'2023 – Oct'2023)**
  - Webpage designing:
    Creation of the whole intractable webpage with interactions.
  - Threshold Functionality Development:
    Designed and implemented a custom threshold functionality using JavaScript and other custom languages to meet SCB's specific requirements.
- **Qatar Airways Course Application** (Oct'2023 – April'2024)

- Course Design:
  Designed an interactive e-learning course using React and Node.js, ensuring an intuitive and user-friendly interface.
- Accessibility Testing:
  Integrated accessibility testing functionality to align with learning objectives and enhance inclusivity for all users.
- Technology Integration:
  Utilized modern frameworks to create a responsive and scalable platform tailored for e-learning needs.

- **Shell Course Application** (April'2022 – Dec'2022)
  Built a gamified learning app within a gaming software environment using **Cocos** and **TypeScript**.
- **Comparing Tool**
  - Tool Development:
    Initiated the creation of a comparison tool using Flask to automate content quality assurance (QA), reducing dependency on manual checks.
  - Data Parsing and Analysis:
    Designed and implemented algorithms to compare raw data against predefined storyboards, ensuring consistency and adherence to project guidelines.
  - Impact:
    The tool enhanced delivery accuracy and ensured that the final product met client quality standards consistently.
- **Automation Bot** (May'2024 – Aug'2024)
  - Bot Development:
    Engineered a 24/7 autonomous e-learning course creation bot using Python and RPA tools (such as TagUI), ensuring a seamless, continuous operation without manual intervention.
  - Error-Free Quality Control:
    Achieved a zero-error QC rate, guaranteeing high-quality, accurate course generation by automating the process and eliminating human errors.
  - Client Account Integration:
    Created and integrated client accounts into the system, allowing the bot to build logic and adapt course creation to client-specific requirements seamlessly.
  - Automation Logic Design:
    Developed robust automation logic to ensure that courses were created with a perfect 0-error rate, optimizing workflows and maintaining consistency across multiple course deliveries.
- **Open Ai projects** - Created official portal of Open Ai, Guardnail, Lang chain by own.

Roles and Responsibilities:

- **UI/UX Development:** Planned and implemented user interfaces for applications, ensuring responsive, user-friendly layouts and optimal cross-device compatibility.
- **End-to-End Development:** Designed and deployed complete software solutions from requirement gathering to delivery, reducing overall project turnaround time by 50%.
- **AI-Powered Automation:** Devised AI-driven automation tools, streamlining manual processes by 30% and enhancing operational efficiency.
- **Client Collaboration:** Worked closely with clients to understand business requirements, ensuring tailored solutions that met and exceeded expectations.
- **Team Coordination:** Led the creation of RPA courses and coordinated with cross-functional teams, ensuring seamless project delivery and on-time completion of milestones.
- **Process Efficiency:** Integrated automation into testing workflows, reducing manual testing efforts by 30% while improving accuracy and consistency.
- **Backend Integration**: Designed and developed robust backend systems using APIs and microservices, enabling seamless data exchange and reducing processing times.
- **CI/CD Implementation:** Built and maintained CI/CD pipelines, optimizing deployment workflows and ensuring smooth, error-free releases.

DECLARATION: I hereby declare that the above-mentioned information is correct to the best of my knowledge and belief.

Place: Bihar, India **(REET CHOUDHARY)**
