Back End Language
- Go
- C#
- Python
- Java

Front End Language
- HTML
- CSS
- JavaScript
- TypeSript

Database Language
- MySQL
- Redis
- MQL
- MS SQL

Framework
- Gin
- Flask
- ASP.NET Web API
- Java Spring Boot
- Junit
- Cucumber

Library
- MongoDB (Go)
- BigQuery (Go)
- Newtonsoft.Json (C#)
- Microsoft.Data.SqlClient (C#)
- Pandas (Python)

HARISH KUMAR S

Software Engineer | Golang Developer

Profile

- Accomplished Software Engineer with expertise in backend development, focusing on creating RESTful APIs, microservices architectures and managing large-scale data processing.
- Skilled in front-end development with hands-on experience in technologies like HTML, CSS, JavaScript and TypeScript for building responsive user interfaces.
- Experienced with a diverse tech stack, including MongoDB, MySQL, Docker, Kubernetes, Gin, Flask, NGINX, Redis, Azure, Jenkins, and Git for efficient application development and deployment.
- Honored with accolades such as the Rising Star Award (2021) and Consistent Star Performer (2022) for outstanding contributions and performance.
- Collaborates effectively with cross-functional teams to ensure projects are delivered on time, meeting quality standards and objectives.
- Aspiring for a dynamic Backend Developer role to drive innovative solutions, enhance backend efficiency, and contribute to the overall success of the organization.

Employment History

Anunta Technology (July 2021 – Present)

Azure Resource Monitoring Applications

- Built session and infrastructure monitoring apps for Azure AVD, using Gin (Go) for the Isolation Dashboard and Spring Boot (Java) for VHA, to track and analyze Azure resource usage effectively.
- Gathered raw VM device metrics with Go to monitor performance and ensure optimal efficiency.
- Architected a scalable Go-based microservice system to manage large volumes of Azure resource data concurrently with high performance.

MongoDB Filter Module

- Developed and released the MongoDBFilter module in Go, utilized by the Isolation Dashboard and Cloud Optimal to process and filter time-series data.

Azure Resource Cost Analysis

- Leveraged Python and Go to aggregate and analyze resource costs across subscriptions, resource types, and host pools on Cloud Optimal, enabling better cost management and efficient resource allocation.
- Designed and implemented proactive alert strategies to monitor resource costs, triggering notifications when thresholds are exceeded to maintain optimal resource utilization and prevent budget overruns.

Orchestration Tool
- Kubernetes
- Docker

Skill
- PowerShell Scripting
- RESTful API
- gRPC
- MongoDB Aggregation
- Query tuning
- Oauth 2.0
- Azue Integration

Cloud
- Azure
- Atlas

Tools
- Jenkins
- Kafka
- Git, GitLab, GitHub
- MongoDB Ops Manger
- Jmeter
- IIS
- NGINX
- JIRA
- PIP
- Nuget
- Maven
- SonarQube

OS
- Windows
- Linux

Soft Skills
- Fast Learner
- Mentorship
- Strong Problem-Solving Skills
- Project Management Expertise

Azure Automation

- Automated key Azure functionalities within the DesktopReady application using C#, including the creation of virtual machines, servers, users, applications, and images to streamline deployment processes.
- Implemented desktop deployment based on subscription regions on Feather PC (VMware Buy-Portal), improving user experience and operational efficiency

- Integrating Java with JIRA enables the automation of support ticket creation. This process streamlines issue tracking and enhances workflow efficiency.
- Enhancing the automation and reliability of the testing process by integrating Cucumber with Jenkins for VHA.
- Hands-on experience in setting up and configuring MongoDB clusters (Replica Set & Sharding) using MongoDB Shell scripts and Ops Manager for Production environment.
- Contributed to projects such as DesktopReady, Feather PC, VMware Horizon Accelerator (VHA), Isolation Dashboard, and Cloud Optimal.
- Proficient in writing Kubernetes configurations and Dockerfiles to containerize services.
- Experienced in working with agile methodologies.
- Successfully completed the Azure DP-300 course through the company's employee development program.

Awards

- **Rising Star (2021)**
  Demonstrated exceptional potential and talent within the first year.
- **Consistent Star Performer (2022)**
  Recognized for consistently demonstrate outstanding performance, dedication.

Certification

- MongoDB Data Modeling Path, M220N: MongoDB for .NET Developers held by MongoDB University.
- Introduction to Kubernetes, Getting Started with Docker held by Simplilearn.
- Azure DP-300 Administering Microsoft Azure SQL Solutions held by Microsoft.

Education

- **B.E CSE | Aggregate: 7.327**
  Sri Lakshmi Ammal Engineering College (2016 – 2020)
