Kathan P

Software Developer

Professional Summary

Detail-oriented and results-driven .NET Software Developer with 4+ years of experience in developing secure, maintainable, and high-performance web and desktop applications. Proficient in C#, ASP.NET Core, and ADO.NET, with a strong focus on backend development and RESTful API design. Experienced in working with SQL Server for data modeling, query optimization, and stored procedures. Skilled in applying object-oriented design principles, following Agile methodologies, and implementing CI/CD pipelines. Committed to writing clean, scalable code and delivering solutions that meet both technical requirements and business objectives.

Role

The .NET Software Developer enhances the performance, scalability, and accessibility of web-based applications for diverse global users, including those in low-bandwidth regions. This role focuses on developing and maintaining secure, high-performing backend systems using C# and ASP.NET, designing RESTful APIs, and supporting seamless integration with external services. It involves optimizing virtual learning environments, streamlining user workflows, and strengthening application infrastructure to ensure reliability and responsiveness. The developer also contributes to system architecture improvements, implements data access strategies, and supports platform-wide updates to enable inclusive and efficient digital experiences.

Professional Experience

Software Developer
August 2024 - Present

- Developed a full-stack CRM web application with an admin panel, enhancing business efficiency.
- Designed and implemented a responsive frontend using HTML5, CSS3, Bootstrap, and JavaScript.
- Built backend logic in Dotnet for managing leads, customers, sales, and reports.
- Integrated user authentication and role-based access control for secure data management.
- Optimized SQL server queries for better performance and structured data storage.

D-365 Retail & Commerce Technical Consultant – Intern
January 2024 - July 2024

- Configured and customized Dynamics 365 Retail modules to align with business needs.
- Integrated third-party applications and services with Dynamics 365 for enhanced functionality.
- Developed and deployed extensions and plugins using C#, adding new features.

Junior Web Developer
January 2021 - March 2023

- Created dynamic websites using Dotnet for server-side scripting and database interactions.
- Developed structured web pages with HTML for proper content organization.
- Styled websites using CSS to create visually appealing designs.
- Integrated front-end HTML/CSS with Dotnet for seamless user interactions.
