

Sakib Mulla

Senior Golang Developer

Experienced Full-Stack Developer with **7+ years** in software engineering, including 5+ years of strong specialization in Go (Golang), backend development, and cloud-native architectures. Skilled in designing and building scalable APIs and microservices using **Go**, **GraphQL**, **NextJS**, **AWS** (**Fargate**, **Lambda**, **SQS**, **RDS**), **MongoDB**, and **SQL**. Proficient in performance **tuning**, **Linux-based optimization**, **Shell Scripting**, and handling large-scale data with **HDFS**. Recognized for driving architectural improvements by recommending serverless approaches to enhance scalability and reduce operational overhead. Strong experience in integrating third-party systems, implementing field-level role-based access control (**RBAC**), and securing microservices with secrets management and **gRPC**-based audit logging. Known for a forward-thinking and automation-first mindset, leveraging AI tools such as **GitHub Copilot**, **Ask Edit, and prompt-driven agents** to streamline development, accelerate testing, and enhance code quality. A results-oriented team collaborator committed to delivering **secure**, **maintainable**, and production-ready solutions that align with business objectives.

WORK EXPERIENCE / PROJECT DEATILS

Tech Lead

Birlasoft inc (Client - HP Inc)

02/2025 - 05/2025 *Pune*

*I have designed and developed scalable backend systems using **Go, GraphQL, MongoDB, and AWS (Fargate, Lambda, SQS, RDS)**. In the LTOHub project, I significantly contributed to the architecture by proposing an efficient serverless solution using AWS **Lambda** for the Quote Processor instead of a traditional service, improving both **scalability and cost-efficiency.** I also worked extensively on the Cost Calculator service, where **I optimized a critical performance bottleneck by reducing 378 redundant database calls down to just 10—leading to a dramatic improvement in system response time and resource usage.** My responsibilities also included implementing field-level RBAC in **GraphQL**, integrating SAP CPQ, and securing microservices with secrets management. **I leveraged AI tools like GitHub Copilot, Ask Edit, and custom AI prompts to accelerate development, automate unit tests, and maintain clean code.** I collaborated closely with cross-functional teams and contributed to demos, audit logging (**gRPC**), and performance testing efforts.*

Sr. Software Engineer

Tek Systems (Client - HP Inc)

01/2024 - 01/2025 *Bengaluru*

*• I have designed and developed scalable backend systems using **Go, GraphQL, MongoDB, and AWS (Fargate, Lambda, SQS, RDS)** . In the LTOHub project, I significantly contributed to the architecture by proposing an efficient serverless solution using AWS **Lambda** for the Quote Processor instead of a traditional service, improving both **scalability and cost-efficiency.** I also worked extensively on the Cost Calculator service, where **I optimized a critical performance bottleneck by reducing 378 redundant database calls down to just 10—leading to a dramatic improvement in system response time and resource usage.** My responsibilities also included implementing field-level RBAC in **GraphQL** , integrating SAP CPQ, and securing microservices with secrets management. **I leveraged AI tools like GitHub Copilot, Ask Edit, and custom AI prompts to accelerate development, automate unit tests, and maintain clean code.** I collaborated closely with cross-functional teams and contributed to demos, audit logging (**gRPC**), and performance testing efforts.*

SKILLS

Copilot | Golang | ReactJS | Shell Script | ChatGPT | SQL | MongoDB | Microservices | AWS | GRPC & Rest API | Postgres | MySQL | NoSQL | S3, SQS, ECS | Docker | Xray

ACHIEVEMENTS

On The Fly Award (01/2023 - 03/2023)

DOMAIN EXPERIENCE

Thin Client / IOT / HP INC (09/2021 - 05/2025)

- HP Thin Client Remote Management refers to tools and software solutions designed to centrally manage, configure, and maintain HP thin clients across an organization. It enables IT administrators to perform tasks such as: **Device Setup**: Configure hardware, software, and network settings remotely.**Monitoring**: Track device health, usage, and performance.**Updates**: Deploy firmware, OS, and application updates across devices.**Security**: Enforce policies, manage user access, and secure data.**Troubleshooting**: Diagnose and resolve issues remotely.

HDFC Bank / PayZapp (06/2023 - 12/2023)

- The HDFC PayZapp registration flow starts by downloading the app from the Google Play Store or Apple App Store. After installation, users enter their mobile number linked to their HDFC Bank account and verify it using an OTP. Next, they link their HDFC debit or credit card by entering the required card details. Finally, users set a secure 4- or 6-digit PIN for transactions. Once registered, users can start using the app for payments, recharges, and other transactions.

Naarda Switch / Card Payment / SBI (02/2016 - 05/2017)

- 1.5 years of experience working in the card payment domain, developing secure and scalable payment processing systems. Gained expertise in payment gateways, transaction processing, and compliance with **PCI DSS** standards. Worked on real-time payment verification, fraud detection mechanisms, and settlement systems to ensure seamless customer experiences. Optimized backend services for high-transaction environments, improving performance and reducing latency.

WORK EXPERIENCE / PROJECT DEATILS

Sr. Software Engineer
HDFC Bank

06/2023 - 12/2023 *Bengaluru*

• Developed REST services using Gin framework, optimized SQL database schemas, and implemented efficient event handling strategies for cross-service communication. • Designed SQL database schemas, optimizing data storage and retrieval. • Implemented event-driven services, ensuring seamless inter-service communication. • Pioneered Go-based solutions on UNIX and Linux platforms, enhancing system performance and scalability while streamlining database manipulation processes. • Drove significant improvements in service reliability and response times through strategic database design and optimized event handling mechanisms. • Fostered cross-functional collaboration to align database schemas with business needs, ensuring seamless integration of REST services across the organization.

Software Engineer
Quest Global Engineering (Client - HP Inc)

09/2021 - 05/2023 *Pune*

•Working as a software engineer in a team of Developers. Experience in writing the HTTP RESTful Web services API's in Golang. • Designed configurable REST APIs on demand using Go. • Worked on numerous go frameworks like GIN. • Experienced in using Go technologies on UNIX and Linux platforms. Good understanding of Design Patterns, Multithreading and GO containers. • Well versed in using Channels and goroutines. • Writing unit test cases. • Worked on nets messaging framework with golang.

Technical Consultant
Simple Logic IT pvt. ltd

02/2020 - 09/2021 *Mumbai*

• I was working as a software engineer in a team of Developers. • Creating Rest Services and designing the workflow architecture. • Writing shell script on the requirement of reports. • Writing PLSQL, procedure, and function in the Oracle database. • Backend Job Scheduling in Linux. • Writing EOD jobs in Golang and managing Hadoop data and Monitoring Sqoop Jobs.

Operation Executive
24 server operations pvt ltd

02/2016 - 07/2017 *Mumbai*

• Rewriting PL/SQL Procedures, Functions as per Client requirements. • Creating Queries for updating, inserting and deletion of data from Oracle database. • Generating Daily Reports by using SQL Queries with Oracle Database and Uploading reports on FTP Server. • Data mining from the database by using SQL Queries with OracleDatabase. • Taking database backup and dump backup Database Purging, UAT Deployments and UAT Testing. • Moving patches to Production Servers(Web App) Handling DR activity Maintenance of Application and Database Servers. • Communicating to clients through a series of actions, through Emails, face-to-face and over the telephone.

EDUCATION

Master of Computer Application
Bharati Vidyapeeth Deemed University

06/2019 - 04/2021 *8.9 SGPA*

Bachelor of Computer Applications
Jaipur National University

06/2016 - 05/2019 *6.4 SGPA*
