UTKARSH MUKUL

📍 Pune, India | 📞 +91 7277550747 | 📧 utkarshmukul@gmail.com

Career Objective

A results-driven Software Engineer with around 7 years of experience in backend development using Golang, Python, MySQL, NoSQL, and Linux. Seeking a challenging role to contribute to a fast-paced, technology-driven organization where I can leverage my analytical skills and software engineering expertise to build scalable systems.

Skills

- Languages: Golang, Python, C, Shell/Bash
- Frameworks/Protocols: gRPC, HTTP/HTTPS, Protobuf
- Databases: MySQL, Redis (NoSQL)
- Tools & Technologies: Git (GitHub/GitLab), Jenkins, Jira, JSON, YAML, Docker, Flask, Nginx
- Networking: TCP/IP, OSI Model, UDP, DHCP
- OS: Linux
- Others: Data Structure

Professional Experience

Josh Software, Pune

Senior Software Engineer | Jun 2022 – Present

- Migrated monolithic systems to microservice architecture using GoLang, Docker, and Python.
- Worked on a SaaS-based data protection and management product for the migration of monolithic to microservice architecture for the improvement of performance.
- Re-engineered services from Python to GoLang to improve HTTP performance and service scalability.
- Developed a file-sharing web app using Flask and Nginx, enabling directory/file transfer across Docker containers.
- Designed and implemented a global search engine for the business portal to enable fast and unified retrieval of information.
- Collaborated with QA in writing automation test scripts for end to end testing.
- Engaged with Support teams to debug and resolve escalation tickets.

Neurealm (Formerly GS Lab | GAVS)

Software Engineer | Jun 2019 – Jun 2022

- Built gRPC server for SD-WAN devices enabling CRUD operations through Redis-based architecture.
- Developed and configured a DHCP server using GoLang, following ISC DHCP RFC standards.
- Designed and implemented DHCP Option 60 (Vendor Class Identifier) logic using GoLang & Redis.
- Implemented Stats Collector Management in Python to monitor system stats like CPU, VPN, and link metrics.
- Engineered a Gorilla WebSocket wrapper library in GoLang and built a Stats Sender Service.
- Developed Stats Sender service using golang websocket wrapper library to send stats coming from Stats Collector Management service to the Data-Center using websocket connection.
- Built Link Quality Metrics feature using Python and C, calculating latency, jitter, and packet loss.

Neurealm (Formerly GS Lab | GAVS)

Intern | Sep 2018 – Jun 2019

- Explored and worked on JSON/YAML parsing using GoLang, Python, and C.
- Contributed to SD-WAN & SNMP solutions and ZeroMQ-based asynchronous messaging systems.
- Engaged in issue fixing and automation via Git, Jenkins, and Jira.

Education

- B.Tech in Information Technology, KIIT University, Bhubaneswar (2019), CGPA: 8.32
- Intermediate (12th), International School, Patna (2015), 75.8%
- Secondary (10th, ICSE), Don Bosco Academy, Patna (2013), 80.7%

Awards & Recognition

- Client Appreciation (2023): For timely delivery with minimal defects.
- Highflyer Award (2021): For valuable project inputs and contributions.
- Rockstar Rookie Award (2019): For exceptional performance during internship.

Personal Details

- Date of Birth: 08 Dec 1996
- Current Location: Pune
- Languages Known: English, Hindi
