Summary

Highly accomplished and results-driven Senior Software Engineer with over **6 years of experience**, specializing in scalable backend development with **Golang** and robust mobile application development with **Flutter**. Proven expertise in designing, developing, and deploying high-performance APIs, microservices, and user-centric mobile interfaces. Adept at architectural restructuring, implementing AI-driven development practices, and ensuring efficient, maintainable codebases. Passionate about building resilient systems and optimizing software delivery pipelines across both backend and mobile domains.

Technical Skills

Category	Skills
Languages & Frameworks	Golang, Gin, Gorilla Mux, Flutter, Android, GraphQL
Databases	MongoDB, SQL, PostgreSQL
Tools & Platforms	GitHub, Code Magic, Firebase, JIRA, Riverpod, Bloc, GetX, OpenTelemetry, MCP, Docker, Kubernetes
Methodologies	Agile, AI-driven Development, Microservices Architecture

Work Experience

Lead Software Engineer | GoEasyCare, Canada
July 2024 – Present
GoEasyCare is Canada's leading workforce management solution, specifically tailored for healthcare facilities.

- **Led backend development and architectural restructuring** for key modules using **GoLang**, focusing on shift scheduling, shift management, and employee credentialing.
- **Engineered and optimized backend systems** ensuring adherence to proper architectural standards and best practices for scalability and maintainability.
- Implemented **AI-driven development and tracing** methodologies within the Go backend, significantly reducing development time and accelerating issue resolution.
- Oversaw the **deployment of Go backend services in a containerized manner** (Docker/Kubernetes), ensuring efficient and reliable operation.

Senior Software Engineer | Bacancy Software LLP, India
March 2022 – July 2024
Bacancy Software is an IT consultancy firm.

- Contributed to delivering high-quality software solutions and exceeding project expectations for multiple clients.
- Conducted comprehensive **Flutter training** for 3 junior developers, significantly enhancing team productivity by **60%**.
- Handled a team of 8 developers, ensuring successful project milestones and timely goal achievement.
- Collaborated with cross-functional teams to integrate robust APIs, ensuring seamless communication between frontend and backend systems.

System Engineer | Tata Consultancy Services Ltd., India
September 2019 – March 2022
TCS is an IT giant from India.

- Managed client escalations and ensured timely product delivery for multiple projects, resulting in an **80% reduction in post-launch issues**.
- Led the successful migration of a key project to **Flutter**, significantly improving performance by **100%** and reducing maintenance overhead by **90%**.
- Conducted code reviews for 2 associates, identifying and resolving 5 critical issues, and improving code quality by **40%**.

Projects

GEC Kiosk + Mobile
July 2024 – Present

- **Designed and implemented the robust backend in GoLang** with a GraphQL API, leveraging MongoDB for data persistence, supporting both Kiosk and Mobile applications for healthcare workforce management.
- **Orchestrated the deployment of Go backend services in a containerized environment** (Docker/Kubernetes), establishing an effective CI/CD pipeline for mobile applications.
- Developed and maintained the **Flutter-based** GoEasyCare Kiosk and Mobile applications.

ION Bsense - Battery Management System
March 2022 – June 2024

- Contributed as a **Flutter Developer**, focusing on the client-side implementation for the ION Bsense Battery Management System.
- **Developed and maintained a scalable GoLang backend** to process and store battery data, providing secure API endpoints for the mobile application.

The Stunt
March 2023 – May 2024

- Served as a **Flutter Developer**, contributing to the front-end development and UI/UX implementation of a social media app built around US sports.
- **Built and optimized the core social media backend features using GoLang**, including user authentication, content management, and real-time interaction capabilities.

GIA - Gemmology Institute of America
September 2019 – March 2022

- Implemented UI for interactive tools, API integration for report access, and video playback features using Android for the GIA App.
- Collaborated with product owners and designers to enhance the app's functionality and user experience.
